An International Journal

Volume 121 · Number 3 · December 2014

Transport of oxygen in soil pore-water systems: implications for modeling emissions of carbon dioxide and methane from peatlands
Z. Fan · J.C. Neff · M.P. Waldrop · A.P. Ballantyne · M.R. Turetsky **455**

Changes in soil nitrogen cycling in a northern temperate forest ecosystem during succession
L.E. Nave · J.P. Sparks · J. Le Moine · B.S. Hardiman · K.J. Nadelhoffer · J.M. Tallant · C.S. Vogel · B.D. Strahm · P.S. Curtis **471**

Identifying the sources and uncertainties of ecosystem respiration in Arctic tussock tundra
A.D. Segal · P.F. Sullivan **489**

Spectroscopic (XANES/XRF) characterization of contaminant manganese cycling in a temperate watershed
E.M. Herndon · C.E. Martínez · S.L. Brantley **505**

Formation of biogenic sulphides in the water column of an acidic pit lake: biogeochemical controls and effects on trace metal dynamics
M. Diez-Ercilla · J. Sánchez-España · I. Yusta · K. Wendt-Potthoff · M. Koschorreck **519**

Nitrogen fixation can exceed inorganic nitrogen uptake fluxes in oligotrophic streams
L.A. Kunza · R.O. Hall Jr. **537**

Different effects of warming and cooling on the decomposition of soil organic matter in warm–temperate oak forests: a reciprocal translocation experiment
J. Luan · S. Liu · S.X. Chang · J. Wang · X. Zhu · K. Liu · J. Wu **551**

Stable isotopic evidence of enhanced export of microbially derived NO_3^- following active layer slope disturbance in the Canadian High Arctic
N.L. Louiseize · M.J. Lafrenière · M.G. Hastings **565**

Controls on the oxidative ratio of net primary production in agricultural ecosystems
M.E. Gallagher · C.A. Masiello · W.C. Hockaday · J.A. Baldock · S. Snapp · C.P. McSwiney **581**

Soil organic phosphorus transformations along a coastal dune chronosequence under New Zealand temperate rain forest
B.L. Turner · A. Wells · L.M. Condron **595**

Cover Image: Model schematic that was used to simulate the vertical (Panel a) and radial movement (Panel b) of oxygen in the soil–water systems.
