# Design and Strategy in Organic Synthesis

From the *Chiron Approach* to Catalysis

*Stephen Hanessian, Simon Giroux,  
and Bradley L. Merner*

## **Design and Strategy in Organic Synthesis**

*From the Chiron Approach to Catalysis*

**WILEY-VCH**  
Verlag GmbH & Co. KGaA

## The Authors

**Prof. Dr. Stephen Hanessian**

Department of Chemistry  
University of Montreal  
2900 Edouard Montpetit  
Montreal, QC H3T 1J4  
Canada

and

Departments of Pharmaceutical Sciences  
and Chemistry  
University of California, Irvine  
Irvine, CA, 92697-2025  
USA

**Dr. Simon Giroux**

Vertex Pharmaceuticals  
130, Wavelly Street  
Cambridge, MA 02139-4242  
USA

**Prof. Dr. Bradley L. Merner**

Department of Chemistry  
and Biochemistry  
Auburn University  
179 Chemistry Building  
Auburn, AL 36849-5312  
USA

### Cover:

The completion of a total synthesis of a complex organic molecule is often likened to climbing a mountain and reaching the summit. The cover depicts the structures of nymania 1 (rubrin A) and bipleophylline two molecules representing a high level of structural complexity that have not yet succumbed to total synthesis.

All books published by Wiley-VCH are carefully produced. Nevertheless, authors, editors, and publisher do not warrant the information contained in these books, including this book, to be free of errors. Readers are advised to keep in mind that statements, data, illustrations, procedural details or other items may inadvertently be inaccurate.
