Contents

PART I

Coordination Chemistry (Metal Complexes)

1. Historical Background	3–4
1.1 Complexes	3
1.2 Difference between Double Salts and Complex Substances	4
□ <i>Summary</i>	4
2. Introduction	5–16
2.1 Coordination Sphere	5
2.2 Formation of a Complex	6
2.3 Bridging Ligands	8
2.3.1 Non-Chelates	12
2.3.2 Chelates	12
□ <i>Summary</i>	15
3. Correct Empirical Formula of Complexes	17–26
3.1 Precipitation Method	17
3.2 Molar Conductivity Method	18
3.3 Effective Atomic Number (EAN Rule)	19
3.4 Blomstrand–Jorgensen Chain Theory	20
3.5 Werner's Coordination Theory	21
□ <i>Summary</i>	24
4. IUPAC Nomenclature	27–34
4.1 Nomenclature of Coordination Compounds	27
4.2 General Rules	27
4.3 Naming the Metal Ion	27
4.4 Naming the Ligand	28
□ <i>Summary</i>	33
5. Isomerism and Stereochemistry	35–52
5.1 Isomerism	35
5.2 Structural Isomerism	35
5.3 Stereoisomerism	39
□ <i>Summary</i>	50
6. Bonding in Complexes	53–86
6.1 Nature of Metal-ligand Bond	53
6.2 Lewis Acid-base Theory	53

6.3	Valence Bond Theory	54
6.4	Crystal Field Theory (CFT)	62
6.5	Ligand Field Theory (LFT)	76
	□ Summary	83
7.	Preparation and Isolation of Complexes	87–92
7.1	Preparation	87
7.2	Isolation	90
	□ Summary	91
8.	Stability of Complex Ion	93–98
8.1	Introduction	93
8.2	Factors Influencing Stability	94
	□ Summary	96
9.	Kinetics of Inert and Labile Complexes	99–108
9.1	Introduction	99
9.2	Inert and Labile Complexes	101
	9.2.1 Classification of Inert and Labile Complexes on the Basis of Electrons in <i>d</i> Orbitals	102
	9.2.2 Inert and Labile on the Basis of CFSE	102
	9.2.3 Role of a Catalyst (Kinetics)	103
	□ Summary	105
10.	Substitution Reactions in Complexes	109–116
10.1	Introduction	109
10.2	Mechanism of Substitution	110
10.3	Substitution in Non-aqueous Solvents	111
10.4	Substitution when no Solvent is Used	112
10.5	Mechanisms of Substitution	113
	□ Summary	114

SELECT TOPICS

11.	Metal Carbonyls and Nitrosyls	119–146
11.1	Introduction	119
11.2	Preparation of Metal Carbonyls	120
11.3	Structure and Bonding in Carbonyls	123
11.4	Iron I Pentacarbonyl [Fe(CO) ₅]	125
11.5	Polynuclear Metal Carbonyls	130
11.6	Dicobalt Octacarbonyl [Co ₂ (CO) ₈]	133
	□ Summary	142

ORGANOMETALLICS

12.	Organometallics	149–184
12.1	Introduction	149
12.2	Definition	149
12.3	Classification	150

12.4	Nomenclature	150
12.5	Synthesis of Organometallic Compounds	152
12.6	Metal-Alkene Complexes of π -Bonded Organometallics	163
12.7	Sandwich Organometallics or Metallocenes	165
12.8	Molecular Orbital Theory (MOT)	171
	□ Summary	174

PART II

Coordination Chemistry (Transition Metal Chemistry)

1.	General Characteristics of <i>d</i>-block Elements	3–32
1.1	Introduction	3
1.2	Placement in the Periodic Table	5
1.2.1	Electronic Configuration	6
1.2.2	Second Transition Series (<i>4d</i> -series)	7
1.2.3	Third Transition Series or <i>5d</i> -series	8
1.2.4	Fourth Transition Series or <i>6d</i> -series	8
1.2.5	Electronic Configuration of Transition Metal Ions	9
1.2.6	Atomic and Ionic Radii	10
1.2.7	Metallic Behaviour	11
1.2.8	Atomic Volume and Density	11
1.2.9	Melting and Boiling Points	12
1.2.10	Variable Oxidation States	13
1.2.11	Ionisation Energies	15
1.2.12	Reducing Action	16
1.2.13	Colour of Transition Metal Ions	18
1.2.14	Magnetic Properties	20
1.2.15	Diamagnetism	23
1.2.16	Ferromagnetism	23
1.2.17	Antiferromagnetism	23
1.2.18	Complex Formation Tendency	24
1.2.19	Stability of Complex Compounds	24
1.2.20	Catalytic Property	25
1.2.21	Interstitial Compound	26
1.2.22	Alloy Formation	27
1.2.23	Reactivity	27
1.3	Group Study of Physical and Chemical Characteristics of Transition Elements	28
1.3.1	Scandium Group	28
1.4	Physical Characteristics	29
1.4.1	Occurrence	29
1.4.2	Atomic Size	29
1.5	Chemical Characteristics	29
1.5.1	Electronic Configuration	30
1.5.2	Oxidation States	30
1.5.3	Halides	31
1.5.4	Complexes	31

2. Titanium Group	33–40
2.1 Introduction	33
2.2 Physical Characteristics	33
2.2.1 Electronic Configuration	33
2.2.2 Oxidation States	33
2.2.3 Extraction of Metals	34
2.2.4 Physical Constants	34
2.2.5 Atomic Size	35
2.3 Chemical Characteristics	35
2.3.1 Reactivity and Passivity	35
2.3.2 Behaviour of Ti group Compounds in Different Oxidation States	36
2.3.3 Halides	38
2.3.4 Organometallic Compounds	39
3. Vanadium Group	41–48
3.1 Introduction	41
3.2 Physical Characteristics	41
3.2.1 Occurrence and Extraction	41
3.2.2 Electronic Configuration and Oxidation States.	42
3.2.3 Atomic Size	42
3.2.4 Graded General Properties	42
3.3 Compounds of V, Nb and Ta	44
3.3.1 Halides	44
3.3.2 Oxides	46
3.3.3 Vanadates	47
3.3.4 Organometallic Compounds	48
4. Chromium Group	49–86
4.1 Introduction	49
4.2 Physical Characteristics	49
4.2.1 Abundance, Occurrence and Extraction	49
4.2.2 Electronic Configuration and Oxidation States	50
4.2.3 Oxidation States	50
4.3 General Characteristics	51
4.3.1 Compounds in (+6) State	53
4.3.2 Chromium trioxide or Chromic anhydride	54
4.3.3 Halides	55
4.3.4 Zero (–1) and (–11) State Compounds	58
4.3.5 Chromates, Molybdates and Tungstates	59
4.3.6 Tungsten Bronzes	60
4.4 The Manganese Group	60
4.4.1 Electronic Configuration and Oxidation States	60
4.4.2 Occurrence and Uses	60
4.4.3 Oxidation States	61
4.5 General Characteristics	62
4.5.1 Mn(III) Oxidation State Compounds	65
4.5.2 Mn(III) Complexes	65
4.5.3 +IV Oxidation State Compounds	66
4.5.4 +V State Compounds	67
4.5.5 +VI State Compounds	68
4.5.6 +VII State Compounds	68
4.5.7 Biological Use	69

4.6	The Iron Group	69
4.6.1	Electronic Structures and Oxidation States	69
4.6.2	Occurrence and Extraction	70
4.6.3	Steel Manufacture	72
4.6.4	Bessemer Process	72
4.6.5	Common Oxidation States	73
4.7	General Characteristics	73
4.7.1	Low Oxidation State Compounds	74
4.7.2	[Fe(CO) ₅]	75
4.7.3	+II Oxidation State Compounds	76
4.7.4	Oxides	76
4.7.5	Halides	77
4.7.6	Complexes	77
4.7.7	Test for NO ₃ ⁻ or NO ₂ ⁻	78
4.7.8	Compounds with Oxidation State (III)	79
4.7.9	Oxides	79
4.7.10	Halides	79
4.7.11	Complexes	81
4.7.12	Cyclopentadienyl Compounds	83
4.7.13	Bioinorganic Chemistry of Iron	84
5.	The Cobalt Group	87–114
5.1	Introduction	87
5.1.1	Compounds of (+I) State	92
5.1.2	Compounds with (+II) State	92
5.1.3	Compounds of (+III) Oxidation State	95
5.1.4	Compounds with (+IV) Oxidation State	96
5.2	The Nickel Group	97
5.2.1	Occurrence and Extraction	98
5.2.2	Common Oxidation States	99
5.3	General Properties	99
5.3.1	Compounds with Oxidation States (-I), 0, (+I)	100
5.3.2	Compounds with (+II) State	101
5.3.3	Compounds with (+III) Oxidation State	103
5.3.4	Compounds of (+IV) Oxidation States	103
5.3.5	Compounds with (+V) and (+VI) States	104
5.4	The Copper Group of Coinage Metals	104
5.4.1	Abundance and Extraction	105
5.5	General Properties	107
5.5.1	Compounds in (+I) Oxidation State	108
5.5.2	Use of Ag Compounds in Photography	110
5.5.3	Compounds with (+II) Oxidation State	111
5.5.4	Compounds in (+III) Oxidation States	113
5.5.5	Compounds in (+V) State	113
5.5.6	Biological Use of Copper	113
6.	The Zinc Group	115–130
6.1	Introduction	115
6.1.1	Occurrence	115
6.1.2	Extraction	116
6.1.3	Uses of Zinc, Cadmium and Mercury	117
6.1.4	Important and Common Oxidation States	117
6.1.5	Ionic Size and Some Physical Properties	118

6.2	General Characteristics	118
6.2.1	Oxides	120
6.2.2	Complexes	121
6.2.3	Mercury (+I) Compounds	121
6.2.4	Organometallic Compounds	122
6.2.5	Biological Role of Zn	123
6.2.6	Toxic Nature of Cd and Hg	123
7.	Inner Transition of <i>f</i>-block Elements: The Lanthanides	131–146
7.1	Introduction	131
7.1.1	The Electronic Configuration	131
7.1.2	Abundance and Isotopes	132
7.1.3	Extraction	133
7.1.4	Lanthanide Contraction	136
7.1.5	Properties of (+III) Compounds	137
7.1.6	Compounds with (+IV) Oxidation State	139
7.1.7	Compounds of (+II) Oxidation State	139
7.1.8	Solubility	140
7.1.9	Colour and Spectra	140
7.1.10	Magnetic Moment	141
7.1.11	Coordination Complexes	143
8.	The Actinides	147–160
8.1	Introduction	147
8.1.1	Electronic Configuration	148
8.1.2	Important Oxidation States	149
8.1.3	Occurrence	150
8.1.4	Preparation of Transuranium Elements	150
8.2	General Characteristics	152
8.2.1	Thorium, Protactinium and Uranium	152
8.2.2	Chemical Characteristics	154
8.2.3	Neptunium, Plutonium and Americium	156
8.3	Completing and Extending the Periodic Table and its Series	158
Bibliophile		161–162
Index		163–170
