Contents

Preface	xv
Acknowledgements	xvii
List of Contributors	xix
1. Elements of Sustainability and Bioremediation	1
<i>Ackmez Mudhoo and Romeela Mohee</i>	
The Sustainability, Remediation and Biotechnology Link	1
Features and Concepts in Sustainability	2
Sustainability and Scale of Environmental Pollution Clean-up	3
Biotechnology and Bioremediation	4
Environmental Pollution and Biotreatment Variants	5
Main Features of Bioremediation	7
Advantages of Bioremediation	7
Disadvantages of Bioremediation	8
General Approach to Bioremediation	9
<i>In Situ</i> Bioremediation Technologies	10
Bioventing	10
Biostimulation	11
Air-sparging	12
Natural Attenuation	13
Landfarming	14
Phytoremediation	15
<i>Ex Situ</i> Bioremediation	16
Composting	16
Controlled Solid Phase Biotreatment	20
Slurry Phase Bioremediation	21
Anaerobic Digestion Processes	21
Principles of Anaerobic Digestion Processes	22
Pollutant Remediation by Anaerobic Processes	23

Biosorption of Heavy Metals	24
Science of Biosorption	25
Biosorption and Heavy Metal Removal	27
Factors Influencing Bioremediation Rates	27
pH	28
Temperature	28
Metals	29
Toxic Compounds	29
Water Content	30
Nutrient Availability	31
Bioavailability of Pollutants	31
Co-metabolism	33
Bioaugmentation	33
Trends in Bioremediation Research	34
Concluding Note	35
Acknowledgements	36
References	36
2. Natural Attenuation	43
<i>R. Ryan Dupont</i>	
The Natural Attenuation and Sustainability Link	43
Features and Concepts in Natural Attenuation	44
Site Assessment, Mass Assimilation and the Need for Active Remedies	45
Contaminant Transformation Under Natural Site Conditions	46
Monitoring for Natural Attenuation	50
Source Area Evaluation	51
Source Area and Plume Connection	51
Source Area Delineation and Source Mass Analysis	55
Source Area Mass Flux Analysis	61
Source Area Lifetime Estimates	63
Quantitative Analysis of Natural Attenuation Data	70
Plume Stability Determination	70
Thiessen Polygon Method	71
Contaminant Degradation Rate Estimates	77
Plume Response to Source Removal	89
Decision Making Regarding Source Area Treatment	91
Concluding Note	97
References	100

3. Anaerobic Digestion Processes	103
<i>Steven I. Safferman, Dana M. Kirk, Louis L. Favior and Wei Wu-Haan</i>	
Anaerobic Digestion Fundamentals	103
Microbial Populations	104
Operational Parameters	105
Nutrients	105
Inhibition	106
Applications	108
Renewable Energy	108
Waste Management	109
Nuisance Avoidance	109
Nutrient Management Plan	110
Frequency of Use	110
Project Development	110
Feedstock Characterization	111
Estimating Energy Potential	114
Biochemical Methane Potential	115
Pilot-Scale Testing	115
Design	117
Safety	123
Anaerobic Digestion Economics	124
Anaerobic Digestion Monitoring	125
Conclusions & Future Developments	128
References	132
4. Biosurfactants: Synthesis, Properties and Applications in Environmental Bioremediation	137
<i>Ramkrishna Sen, Ackmez Mudhoo and Gunaseelan, D.</i>	
Introduction	138
Enzymatic Syntheses of Surfactants	138
Enzymatic Synthesis of Monoglycerides	139
Enzymatic Synthesis of Sugar Esters	140
Enzymatic Synthesis of Fatty Amides	142
Enzymatic Synthesis of Alkyl Glycosides	145
Enzymatic Synthesis of Lysophospholipids	146
Microbial Synthesis of Biosurfactants	148
Surfactin	149
Sophorolipids	150
Rhamnolipids	151

Properties of Biosurfactants	152
Surface and Interface Activity	152
Temperature, pH and Ionic Strength Tolerance	153
Emulsion Forming	153
Low Toxicity	154
Biodegradability	155
Biosurfactants in Pollutant Remediation	155
Biosurfactants Versus Synthetic Surfactants	157
Heavy Metals Removal	167
Oil and Petroleums Degradation	173
Pesticides Degradation	182
PAHs Removal	186
PCBs Degradation	198
Concluding Notes	199
Acknowledgements	201
References	201

5. Phytoremediation: An Efficient Approach for Bioremediation of Organic and Metallic Ions Pollutants	213
<i>Divya Gupta, Lalit Kumar Singh, Ashish Deep Gupta and Vikash Babu</i>	
Introduction	213
Types of Phytotechnology	215
Phytoextraction	215
Rhizofiltration	217
Phytovolatilization	218
Phytodegradation/Phytotransformation	218
Phytostabilization	219
Strategies Used in Phytoremediation of Inorganic Pollutant	219
Accumulation of Heavy Metals in Plants	219
Chelate Enhanced Phytoextraction and Translocation	222
Transport	223
Phytotransformation	223
Strategies Used in Phytoremediation of Organic Pollutant	225
Direct Phytoremediation	225
Indirect Phytoremediation/Rhizoremediation	232

Concluding Note	236
References	236
6. Bioleaching	241
<i>Leo G. Leduc and Garry D. Ferroni</i>	
Introduction	241
Mechanisms of Bioleaching	242
Strategies of Bioleaching	244
Microorganisms of Bioleaching	245
Factors Affecting Bioleaching	248
Temperature	249
pH	251
Nutrients	252
Toxic Substances	253
Environmental Considerations	255
Conclusions	256
Acknowledgements	256
References	257
7. Biosorption of Heavy Metals – New Perspectives	261
<i>Teresa Tavares and Hugo Figueiredo</i>	
Biosorption of Heavy Metals – New Perspectives	262
Materials and Processes	263
Downstream Reuse: Biosorbents based Catalysis	270
A Particular Ion: Biosorption of Hexavalent Chromium	272
The Role of Supports: Usage of Zeolites for the Treatment of Cr ^{VI} Solutions	274
Inside the Industrial Circuit: Cr as Catalyst for Oxidation Reactions	275
References	279
8. Biofiltration: Essentials, Research and Applications	285
<i>Smita Raghuvanshi, Subhajit Majumder and Suresh Gupta</i>	
Introduction	286
Abatement Techniques	287
Removal of VOCs from Waste Air	287
Removal of Heavy Metals from Wastewater	289
Biological Based Methods for the Removal of VOCs and Heavy Metals	291

Biofiltration	291
Performance Parameters of Biofiltration	297
Effect of Time	298
Effect of Flow Rate	299
Effect of Shock Loads	299
Effect of Bed Height	299
Analysis of Product Streams in Biofilter Column	300
Liquid Collected at Bottom	300
CO ₂ Present in Gaseous Stream	301
Research Status of Biofiltration	301
Biofiltration for removal of VOCs	302
Biofiltration for Removal of Ammonia	305
Biofiltration for Removal of Hydrogen Sulfide	306
Biofiltration for Removal of Metal Ions	307
Mechanisms of Biofiltration	308
Mechanism for Degradation of Organic Contaminants	308
Mechanism of Degradation of Metal Ions	309
Applications of Biofiltration	310
Conclusions	311
References	312
9. Modeling and Implementation of Sustainable Remediation Based on Bioventing	317
<i>Hillel Rubin, Eran Rubin and Holger Schüttrumpf</i>	
Introduction	318
Basic Features of Sustainable Remediation Based on Bioventing	321
Understanding the Environment Domain - Possible Difficulties in Using Bioventing	327
The Difference Between Layouts of Bioventing and SVE Systems	327
Cases of Bioventing as a Byproduct of Air Sparging	328
Difficulties in Using Bioventing	329
Bioventing Implementation	330
Theoretical Background	330
Bioventing Degradation Implementation Model	334
Sustainable Bioventing Practice	338
General Comments	338

Preliminary Information and Basic Know-How	339
Initial Evaluation of Bioventing Effectiveness	341
Detailed Evaluation of Bioventing Effectiveness	342
Pilot Studies	350
Evaluating the Design of Bioventing Systems	352
Evaluating the Operation and Monitoring Plans	361
Concluding Note	363
References	365
10. Bioremediation of Xenobiotics	367
<i>Komal Saxena, Gajendra Kumar Aseri, Ashish Deep Gupta and Vikash Babu</i>	
Introduction	367
Types of Bioremediation	370
<i>In-Situ</i> Bioremediation	370
<i>In situ</i> Bioremediation Comprises of	370
<i>Ex-Situ</i> Bioremediation	372
Methods for the Bioremediation of Xenobiotic Compounds	372
Biosparging	372
Bioaugmentation	372
Phytoremediation	373
Biostimulations	373
Photovolatilization	373
Phytodegradation (Phytotransformation)	374
Biopiling	374
Composting	374
Bioreactors Used for the Bioremediation of Xenobiotic Compound	375
Slurry Bioreactors	375
Bioreactors Having Aerobic Condition Coupled with Anaerobic Conditions	378
Two-Phase Partitioning Bioreactors (TPPBs)	379
Metabolic Pathways for Bioremediation of Xenobiotics	380
Aerobic Pathways	380
Anaerobic Pathways	384
Co-Metabolic Pathway	385
Bioremediation of Various Classes of Xenobiotic Compounds	386
Explosives	386

xiv CONTENTS

Bioremediation of BTEX	388
Bioremediation of Pesticides	389
Bioremediation of Organochloro Pesticides	391
Bioremediation of Weedicides and Herbicides	392
Bioremediation of Dyes	393
The Decolorisation of the Dyes is Assayed by Beer- Lambert's Law	394
Bioremediation of Waste Water Containing Synthetic Detergents	395
Bioremediation of Tannery Waste Water	396
Concluding Note	397
References	397
Index	399
