# Contents

<b>Preface</b>	ix
<b>Part 1: Fundamentals of Superhydrophobicity</b>	
Fabrication of Superhydrophobic Surfaces <i>S. H. Kim</i>	3
Ultra-hydrophobicity Through Stochastic Surface Roughness <i>M. Flemming, L. Coriand and A. Duparré</i>	19
Optimizing Super-Hydrophobic Surfaces: Criteria for Comparison of Surface Topographies <i>E. Bittoun and A. Marmur</i>	39
Hydrophobicity of Surfaces with Cavities: Making Hydrophobic Substrates from Hydrophilic Materials? <i>N. A. Patankar</i>	51
Dynamics of Fakir Liquids: From Slip to Splash <i>C. Duez, C. Ybert, C. Barentin, C. Cottin-Bizonne and L. Bocquet</i>	73
Static and Dynamic Wetting Characteristics of Nano-patterned Surfaces <i>P. M. Harder, T. A. Shedd and M. Colburn</i>	91
<b>Part 2: Superhydrophobic Surfaces from Polymers</b>	
Wettability Alteration of Polymer Surfaces Produced by Scraping <i>C. Guo, S. Wang, H. Liu, L. Feng, Y. Song and L. Jiang</i>	111
Surface Properties of Honeycomb and Pincushion Structures of Various Hydrophobic Polymer Materials Prepared by Self-Organization <i>H. Yabu, Y. Hirai, M. Kojima and M. Shimomura</i>	119
Hydrophobic and Superhydrophobic Polyphosphazenes <i>H. R. Allcock, L. Steely, A. Singh and M. Hindenlang</i>	127
Superhydrophobic Fluorinated Polyurethane Films <i>D. Wu, W. Ming, R. A. T. M. van Benthem and G. de With</i>	139
A Simple Approach for Fabricating a Superhydrophobic Surface Based on Poly(methyl methacrylate) <i>X. Lu, Y. Jin, S. Tan, L. Zhang, Y. Liu, X. Zhang and J. Xu</i>	153

Superhydrophobic Polyethylene Films by Catalytic Ethylene Polymerization <i>P. C. Thüine, W. Han, W. Ming and H. J. W. Niemantsverdriet</i>	165
Plasma-Treated Superhydrophobic Polyethylene Surfaces: Fabrication, Wetting and Dewetting Properties <i>J. Fresnais, J. P. Chapel, L. Benyahia and F. Poncin-Epaillard</i>	177
Generation and Characterization of Super-Hydrophobic Micro- and Nano-structured Surfaces <i>O. Mertsch, D. Schondelmaier, I. Rudolph, O. Kutz, A. D. Walter, A. Schleunitz, J. Kouba, C. Waberski and B. Loechel</i>	199
Reversibly Photo-Responsive Polymer Surfaces for Controlled Wettability <i>S. H. Anastasiadis, M. I. Lygeraki, A. Athanassiou, M. Farsari and D. Pisignano</i>	217
Superhydrophobic Metallic Surfaces and Their Wetting Properties <i>E. Bormashenko, T. Stein, G. Whyman, R. Pogreb, S. Sutovsky, Y. Danoch, Y. Shoham, Y. Bormashenko, B. Sorokov and D. Aurbach</i>	233
A Review of Recent Results on Superhydrophobic Materials Based on Micro- and Nanofibers <i>M. Ma, R. M. Hill and G. C. Rutledge</i>	241
<b>Part 3: Superhydrophobic Surfaces from Silanes, Colloids, Particles or Sol–Gel Processes</b>	
Superhydrophobic Silicone Nanofilament Coatings <i>J. Zimmermann, G. R. J. Artus and S. Seeger</i>	263
A Translucent and Superhydrophobic Surface Prepared with a Sol–Gel Method Based on Alumina Nanoparticles <i>M. Shi, J. Xi, H. Wang and X. Wu</i>	277
Fabrication and Superhydrophobic Behavior of Fluorinated Silica Nanosphere Arrays <i>C.-T. Hsieh, W.-Y. Chen, F.-L. Wu and Y.-S. Shen</i>	285
UV-Resistant and Superhydrophobic Self-Cleaning Surfaces Using Sol–Gel Processes <i>Y. Xiu, D. W. Hess and C. P. Wong</i>	297
Wettability and Superhydrophobicity of 2-D Ordered Nano-structured Arrays Based on Colloidal Monolayers <i>W. Cai, Y. Li and G. Duan</i>	309

Effects of Various Additives during Hot Water Treatment on the Formation of Alumina Thin Films for Superhydrophobic Surfaces <i>K. Tadanaga, N. Yamaguchi, A. Matsuda, T. Minami and M. Tatsumisago</i>	327
Polybenzoxazine–Silica Hybrid Surface with Environmentally Responsive Wettability Behavior <i>H.-C. Lin, H.-L. Chang, C.-F. Wang, C.-F. Huang and F.-C. Chang</i>	335
Wettability of Rough Polymer, Metal and Oxide Surfaces as well as of Composite Surfaces <i>X. Jia</i>	345
<b>Part 4: Superhydrophobic Surfaces from Electrochemical Processes</b>	
Electrochemical Fabrication of Superhydrophobic Surfaces on Metal and Semiconductor Substrates <i>H. Bai, C. Li and G. Shi</i>	361
Fabrication of Superhydrophobic Surfaces by Electropolymerization of Thiophene and Pyrrole Derivatives <i>M. Nicolas</i>	383
Wettability of Methacrylate Copolymer Films Deposited on Anodically Oxidized and Roughened Aluminium Surfaces <i>R. Frenzel, C. Blank, K. Grundke, V. Hein, B. Schmidt, F. Simon, M. Thieme and H. Worch</i>	397
<b>Part 5: Applications and New Insights</b>	
Recent Approaches to Highly Hydrophobic Textile Surfaces <i>T. Bahners, T. Textor, K. Opwis and E. Schollmeyer</i>	413
Superhydrophobic Coatings for Microdevices <i>J.-Y. Shiu, W.-T. Whang and P. Chen</i>	439
Electrowetting on Superhydrophobic Surfaces: Present Status and Prospects <i>J. Heikenfeld and M. Dhindsa</i>	449
Wetting of Single and Mixed Surfactant Solutions on Superhydrophobic Surfaces <i>M. Ferrari, F. Ravera and L. Liggieri</i>	465
Characterisation of Wetting by Solidification of Agarose Solution Sessile Drops <i>O. Werner, B. Pettersson and L. Wågberg</i>	475
The Role of Adaptive-Deformation of Water Strider Leg in Its Walking on Water <i>Q.-S. Zheng, Y. Yu and X.-Q. Feng</i>	487

Effects of Various Additives during Hot Water Treatment on the Formation of Alumina Thin Films for Superhydrophobic Surfaces <i>K. Tadanaga, N. Yamaguchi, A. Matsuda, T. Minami and M. Tatsumisago</i>	327
Polybenzoxazine–Silica Hybrid Surface with Environmentally Responsive Wettability Behavior <i>H.-C. Lin, H.-L. Chang, C.-F. Wang, C.-F. Huang and F.-C. Chang</i>	335
Wettability of Rough Polymer, Metal and Oxide Surfaces as well as of Composite Surfaces <i>X. Jia</i>	345
<b>Part 4: Superhydrophobic Surfaces from Electrochemical Processes</b>	
Electrochemical Fabrication of Superhydrophobic Surfaces on Metal and Semiconductor Substrates <i>H. Bai, C. Li and G. Shi</i>	361
Fabrication of Superhydrophobic Surfaces by Electropolymerization of Thiophene and Pyrrole Derivatives <i>M. Nicolas</i>	383
Wettability of Methacrylate Copolymer Films Deposited on Anodically Oxidized and Roughened Aluminium Surfaces <i>R. Frenzel, C. Blank, K. Grundke, V. Hein, B. Schmidt, F. Simon, M. Thieme and H. Worch</i>	397
<b>Part 5: Applications and New Insights</b>	
Recent Approaches to Highly Hydrophobic Textile Surfaces <i>T. Bahners, T. Textor, K. Opwis and E. Schollmeyer</i>	413
Superhydrophobic Coatings for Microdevices <i>J.-Y. Shiu, W.-T. Whang and P. Chen</i>	439
Electrowetting on Superhydrophobic Surfaces: Present Status and Prospects <i>J. Heikenfeld and M. Dhindsa</i>	449
Wetting of Single and Mixed Surfactant Solutions on Superhydrophobic Surfaces <i>M. Ferrari, F. Ravera and L. Liggieri</i>	465
Characterisation of Wetting by Solidification of Agarose Solution Sessile Drops <i>O. Werner, B. Pettersson and L. Wågberg</i>	475
The Role of Adaptive-Deformation of Water Strider Leg in Its Walking on Water <i>Q.-S. Zheng, Y. Yu and X.-Q. Feng</i>	487
