Kuopio, Finland, 1991**

CONTENTS / SECTIONS AND SYMPOSIA

Section 1. NERVOUS AND NEUROMUSCULAR SYSTEMS	
1.1 Neuronal hyperactivity	17
1.2 Receptors and central nervous system disorders	24
1.3 Recovery-plasticity CNS changes after damage	30
1.4 Disturbances of intrabrain regulation in higher nervous activity pathology	38
1.5 Pathophysiology of pain	47
1.6 Parkinsonism: mechanisms of development and correction	56
1.7 Pathophysiology of motor units and motor system	60
1.8 Pathophysiology of motor axons and neurotrophic problems	65
1.9 Pathophysiology of neuro-muscular transmission	70
Section 2. CARDIOVASCULAR SYSTEM	
2.1 Ischemic and reperfusion heart damage	74
2.2 Primary regulation disorders and pathogenesis of arrhythmias	79
2.3 Neurogenic and cellular factors in pathogenesis of cardiopathies	83
2.4 Protection of the heart	87
2.5 Hypertension and arterial tone	93
2.6 Endothelial - dependent reactions and their correction in brain ischemia	103
2.7 Mechanisms of the microcirculatory disorders and their correction	108
2.8 Ischemic disturbances of microcirculation	116
Section 3. BLOOD SYSTEM	
3.1 Regional mechanisms of haemostasis and problems of thrombolytic therapy	120
3.2 Hemopoietic stem cells and regulation of hemopoiesis in pathological states	128
Section 4. RESPIRATORY SYSTEM	
4.1 Disturbances of central respiratory control and pulmonary defence mechanisms	133
4.2 Pulmonary circulation and gas exchange regulation disturbances in experimental and clinical lung	140
4.3 Lung surfactants and its role in the development of lung pathology	146
Section 5. DIGESTIVE SYSTEM	
5.1 Regulatory mechanisms of stomach and duodenum functions in ulceration	150
5.2 Changes in secretory and motility processes in digestive organs: lesion and peptidergic control	155
5.3 Dysregulation of liver function	162
Section 6. EXCRETORY SYSTEMS AND WATER-ELECTROLYTE METABOLISM	
6.1 Disturbances of renal processes and metabolic regulation	164
6.2 Disturbances in regulation of water-electrolyte metabolism	167
Section 7. IMMUNE SYSTEM	
7.1 Autoregulation and dysregulation of immune system	172
7.2 Neuroimmune interactions in normal and pathological conditions	181
7.3 Cellular and molecular mechanisms of neuroimmunopathology	186
7.4 Endocrine regulation disturbance of the immune system	193
Section 8. ENDOCRINE SYSTEM	
8.1 Disorders of central regulatory mechanisms of endocrine function	196
8.2 Receptor mechanisms of hormonal - metabolic disorders	203
8.3 Immunogenetic and molecular mechanisms of endocrine pathology	207
Section 9. RECEPTORS, MEMBRANE PROCESSES AND INTRACELLULAR SIGNAL SYSTEM	
9.1 Disturbances of ion transport systems	213
9.2 Transmembrane signalling and cell pathology	218
9.3 Free radicals, biomembrane injury and diseases	224
Section 10. ADAPTATION PROCESSES	
10.1 Adaptation to physical loads	241
10.2 Adaptation to hypoxia	246
10.3 Adaptation to stress exposure	252

10.4	Adaptation to cold and heat	258
10.5	Cardiovascular functions in emotional stress	263
Section 11. CHRONOPATHOBIOLOGY		
11.1	Mechanisms of disturbances in biological rhythms system	268
11.2	Optimization of diagnosis and therapy of diseases: chronobiological approach	274
Section 12. INFLAMMATION		
12.1	Cellular and molecular bases of organism reactivity and inflammatory process ..	282
Section 13. ALLERGY		
13.1	Pathophysiology of dysregulation of allergic process and their correction	291
Section 14. SHOCK		
14.1	General problems of shock pathogenesis	299
14.2	Correction of shock disturbances	307
Section 15. HYPOXIA		
15.1	Pathogenesis and systematization of hypoxic states	312
15.2	Regulation of metabolism and physiological functions in hypoxia	317
15.3	Correction of hypoxic states	322
Section 16. POSTRESUSCITATION PROBLEMS		
16.1	Mechanisms and methods of correction of postresuscitation pathology	328
Section 17. REGULATORY PROCESSES IN TRANSPLANTED ORGANS		
17.1	Damage and disregulatory effect of transplantation factors	337
17.2	Correction of graft function in the organism	342
Section 18. REPRODUCTIVE SYSTEM PATHOPHYSIOLOGY		
18.1	Reproductive system pathophysiology	347
Section 19. SPACE FLIGHT PATHOPHYSIOLOGY		
19.1	Changes in regulatory mechanisms and their correction in space flights	352
Section 20. VETERINARY PATHOPHYSIOLOGY		
20.1	Immune system and adaptation in farm animals	357

WORKSHOPS

WS I	Teaching Pathophysiology	365
WS II	Microscopy in Pathophysiologic Research	367
WS III	Microcomputers in Scientific Research	367
WS IV	Laboratory Animals	367
WS V	Current Methods of Electromyography	370

ADDENDUM	371
