Contents

| | |
|---|-----------|
| <i>Preface</i> | xiii |
| 1 Microbial Manganese(II) Oxidation: A Potential Tool for Treatment of Metal-Contaminated Waters | 1 |
| <i>Naoyuki Miyata and Yukinori Tani</i> | |
| 1.1 Introduction | 1 |
| 1.2 Microbial Mn(II) Oxidation | 2 |
| 1.3 Interaction of Biogenic Mn Oxides with Trace Metal Ions | 4 |
| 1.4 Investigations with Mn(II)-Oxidizing Bioreactors | 5 |
| 1.5 Conclusions and Outlook | 7 |
| 2 Biological Treatment for Removal of Iron, Manganese, and Arsenic from Groundwater | 11 |
| <i>Ichiro Suzuki and Danladi Mahuta Sahabi</i> | |
| 2.1 Introduction | 11 |
| 2.2 Biological Removal of Fe and Mn | 12 |
| 2.2.1 Biological Treatment Plant for Removal of Fe and Mn | 12 |
| 2.3 Principles of Biological Fe and Mn Removal | 13 |
| 2.3.1 Maturation and “Aging” of Biological Filter Media | 14 |
| 2.3.2 Physicochemical and Biological Removal of Mn by Aged Biofilter | 15 |
| 2.4 Microorganisms in Biological Removal of Fe and Mn | 16 |
| 2.4.1 Iron Bacteria | 17 |
| 2.4.2 Nitrifying and Denitrifying Microorganisms | 18 |

| | | |
|----------|--|-----------|
| 2.4.3 | Molecular Diversity of Bacterial Consortia Involved in Biological Removal of Fe and Mn | 18 |
| 2.5 | Integration of Biological Fe and Mn Oxidation with As Removal | 20 |
| 2.5.1 | Removal of As by Biological Sorptive Filtration | 21 |
| 2.5.2 | Pilot Plant Studies for Simultaneous Removal of Fe, Mn, and As by Biological Processes | 21 |
| 2.6 | Conclusion | 22 |
| 3 | Removal of Selenium from Wastewater Using a Selenium-Reducing Bacterium | 27 |
| | <i>Michihiko Ike and Satoshi Soda</i> | |
| 3.1 | Introduction | 27 |
| 3.2 | Selenate- and Selenite-Reducing Bacterium <i>B. Selenatarsenatis</i> SF-1 | 29 |
| 3.3 | Lab-Scale Sequencing Batch Reactor | 31 |
| 3.4 | Lab-Scale Continuous Reactor | 33 |
| 3.5 | Conclusions and Outlook | 34 |
| 4 | Microbial Reduction and Mobilization of Arsenic for Bioremediation of Contaminated Soil | 39 |
| | <i>Shigeki Yamamura</i> | |
| 4.1 | Introduction | 39 |
| 4.2 | Microbial As Mobilization | 41 |
| 4.3 | Role of Dissimilatory As(V)-Reducing Bacteria in As Mobilization | 41 |
| 4.4 | Effect of the Electron Shuttle on Microbial As Mobilization | 44 |
| 4.5 | As Removal from Contaminated Soils by Use of DARB and AQDS | 46 |
| 4.6 | Conclusions and Outlook | 47 |
| 5 | Phytoremediation of Boron Polluted Soil and Water | 53 |
| | <i>Kazuhiro Mori and Motoyuki Asada</i> | |
| 5.1 | Introduction | 53 |
| 5.2 | Boron Uptake Capabilities | 54 |

| | | |
|----------|--|-----------|
| 5.3 | Boron Uptake and Removal from Soil by Plants | 56 |
| 5.3.1 | Effects of Boron on Komatsuna Plant After Germination in the Soil | 57 |
| 5.4 | Plants Detected in the Boron Contaminated Fields | 58 |
| 5.5 | Conclusion | 59 |
| 6 | Phytoremediation of Cadmium Contaminated Soil: Acceleration of Phytoremediation by Combination Use of Chelating Agents | 61 |
| | <i>Kazunari Sei</i> | |
| 6.1 | Introduction | 61 |
| 6.2 | Biodegradability and Cd Elution Effect of Chelating Agents | 63 |
| 6.3 | Effect of Chelating Agents on the Growth of <i>B. juncea</i> | 65 |
| 6.4 | Effect of Chelating Agents on the Accumulation of Cd in <i>B. juncea</i> | 67 |
| 6.5 | Feasibility Study on Phytoremediation of Cd Contaminated Soil by Combination Use of <i>B. juncea</i> and Chelating Agents | 68 |
| 6.6 | Future Perspective for the Effective Induced Phytoremediation of Cd Contaminated Soil | 69 |
| 7 | Phytoremediation for Soils Contaminated with Heavy Metals Using the Symbiosis Between <i>Astragalus Sinicus</i> with Rhizobia | 73 |
| | <i>Mitsuo Yamashita</i> | |
| 7.1 | Introduction | 73 |
| 7.2 | Remediation Treatment | 75 |
| 7.2.1 | Groundwater Bioremediation | 75 |
| 7.2.2 | Soil Bioremediation | 76 |
| 7.2.2.1 | <i>In situ</i> bioremediation | 76 |
| 7.2.2.2 | Land improvement | 77 |
| 7.2.2.3 | Bioreactors | 77 |
| 7.2.3 | Heavy Metal Contaminants and Remediation Technologies | 77 |
| 7.2.4 | Cd Purification | 79 |
| 7.3 | Plant–Microbe Interactions | 80 |

| | | |
|-----------|---|------------|
| 7.4 | Development of Platform in Symbiosis Engineering | 81 |
| 7.5 | Application of Symbiosis Engineering in Remediation | 82 |
| 7.6 | Development of Phytoremediation Technology for Metal Contaminants | 84 |
| 7.7 | Future of Metalbiotechnology in Symbiosis Technology | 85 |
| 8 | Construction of Yeast Bioadsorbent by Cell Surface Engineering | 89 |
| | <i>Kouichi Kuroda and Mitsuyoshi Ueda</i> | |
| 8.1 | Introduction | 89 |
| 8.2 | Metal Adsorption on Microbial Cell Surface | 90 |
| 8.3 | Biological Technique for Metal Adsorption by Novel Strategy | 91 |
| 8.4 | Cell Surface Display of Metal-Binding Proteins and Peptides on Yeast | 94 |
| 8.5 | Additional Improvement of Cell Surface-Engineered Yeast | 96 |
| 8.6 | Conclusion | 97 |
| 9 | Bioleaching of Metals from Solid Waste Incineration Ash | 101 |
| | <i>Tomonori Ishigaki</i> | |
| 9.1 | Waste Incineration Ash | 101 |
| 9.2 | Recovery of Metals from Solids | 102 |
| 9.3 | Bioleaching | 103 |
| | 9.3.1 Overview of Bioleaching | 103 |
| | 9.3.2 Mechanisms of Bioleaching | 104 |
| | 9.3.3 Bioleaching of Metals from MSWI ash | 105 |
| 9.4 | Bioleaching of/from MSWI Ash in Waste Landfills | 107 |
| 9.5 | Conclusion | 108 |
| 10 | Dissolution of Precious Metals from Waste Printed Circuit Boards by Using Bacteria | 111 |
| | <i>Tadashi Takemoto</i> | |
| 10.1 | Introduction | 111 |

| | | |
|-----------|--|------------|
| 10.2 | Dissolution of Au by Cyan Generating Bacteria | 112 |
| 10.3 | Dissolution of Au from Waste PWBs | 115 |
| 10.4 | Increase of Dissolution Rate of Au | 117 |
| 10.5 | Decomposition of Cyan After Bioleaching | 120 |
| 10.6 | Summary | 122 |
| 11 | Biosorption of Uranium and/or Thorium Using Microorganism | 125 |
| | <i>Takehiko Tsuruta</i> | |
| 11.1 | Introduction | 125 |
| 11.2 | Screening of the Microorganism to Absorb Uranium and/or Thorium | 126 |
| 11.3 | The Effect of PH on the Biosorption of Uranium Using <i>S. Levoris</i> Cells | 128 |
| 11.4 | The Effect of External Uranium and Thorium Effect on Their Metals Absorption from the Solution Containing Constant Thorium Concentration and Desired Uranium Concentration Using <i>S. Levoris</i> Cells | 129 |
| 11.5 | Time Course of Uranium and Thorium Absorption from the Solution Containing Constant Thorium Concentration and Desired Uranium Concentration Using <i>S. Levoris</i> Cells | 130 |
| 11.6 | The Effect of External Uranium and Thorium Effect on Their Metals Absorption from the Solution Containing Constant Uranium and Desired Thorium Concentration Using <i>S. Levoris</i> Cells | 132 |
| 11.7 | Effect of Thorium Addition After Uranium Absorption | 133 |
| 11.8 | Removal and Recovery of Uranium Using Microorganisms Isolated from Uranium Deposits | 134 |
| | 11.8.1 Removal of Uranium from Uranium Refining Wastewater Using Microorganisms Isolated from Uranium Deposits | 135 |
| | 11.8.2 Removal of Uranium from Seawater Using Microorganisms Isolated from Uranium Deposits | 135 |

| | | |
|-----------|---|------------|
| 12 | Characteristics of Biogenous Iron Oxide Microtubes Formed by Iron-Oxidizing Bacteria, <i>Leptothrix Ochracea</i> | 139 |
| | <i>Jun Takada and Hideki Hashimoto</i> | |
| 12.1 | Introduction | 139 |
| 12.2 | Iron Oxides Produced by Iron-Oxidizing Bacteria | 141 |
| 12.2.1 | Iron-Oxidizing Bacteria | 141 |
| 12.2.2 | Water Purification Method by Iron-Oxidizing Bacteria | 143 |
| 12.2.3 | Characteristics of Biogenous Iron Oxide Microtubes | 144 |
| 12.3 | Conclusions and Outlook | 146 |
| 13 | Microbial Formation of Semiconductor Nano-Particles Contained Selenium or Tellurium and Metals | 149 |
| | <i>Toshifumi Sakaguchi</i> | |
| 13.1 | Introduction | 149 |
| 13.2 | Isolation and Enrichment | 151 |
| 13.3 | Extraction of Nano-Particles | 154 |
| 13.4 | Elemental and Crystal Analysis of Nano-Particles | 155 |
| 13.5 | Isolation of Microbe and Denaturing Gradient Gel Electrophoresis Analysis in Enrichments | 158 |
| 13.6 | Recovery and Conversion of Heavy Metals and Te | 160 |
| 13.7 | Conclusions | 162 |
| 14 | Biomachining–Micromachining of Metals by Bacteria | 167 |
| | <i>Yoshiyuki Uno and Akira Okada</i> | |
| 14.1 | Introduction | 167 |
| 14.2 | Definition of Biomachining | 168 |
| 14.3 | <i>A. Ferrooxidans</i> | 168 |
| 14.4 | Culture of <i>A. Ferrooxidans</i> | 170 |
| 14.5 | Metal Removal Experiment | 171 |
| 14.6 | Material Removal Mechanism in Biomachining | 173 |
| 14.7 | Electric Field Assisted Biomachining | 174 |
| 14.8 | Jet Biomachining and Stirring Biomachining | 175 |

| | | |
|-----------|--|------------|
| 14.9 | Culture Agar Biomachining | 176 |
| 14.10 | Summary | 177 |
| 15 | Biosensors for Toxic Heavy Metals | 179 |
| | <i>Kazumasa Hirata and Hitoshi Miyasaka</i> | |
| 15.1 | Introduction | 179 |
| 15.2 | Whole-Cell-Based Biosensor | 181 |
| 15.3 | Enzyme-Based Biosensors | 184 |
| 15.4 | Antibody-Based Biosensors | 188 |
| 15.5 | Nucleic Acid-Based Biosensors | 190 |
| 15.6 | Biosensors Based on other Molecules | 190 |
| 15.7 | Conclusions | 191 |
| 16 | Cell Surface Design for Selective Recovery of Rare Metal Ions | 195 |
| | <i>Kouichi Kuroda and Mitsuyoshi Ueda</i> | |
| 16.1 | Introduction | 195 |
| 16.2 | Social Significance of Metals | 196 |
| 16.3 | Cell Surface Adsorption for Recovery of Metal Resources | 197 |
| 16.4 | Molybdate Recovery by Cell Surface Design of Yeast | 198 |
| 16.5 | Further Potential of Cell Surface Design for Recovery of Rare Metal Ions | 201 |
| 16.6 | Conclusion | 204 |
| 17 | Bioinformatics Tools for the Next Generation of Metal Biotechnology | 207 |
| | <i>Hideki Nakayama</i> | |
| 17.1 | Introduction | 207 |
| 17.2 | Public Protein Database as a Gold Mine | 208 |
| | 17.2.1 Universal Protein Resource | 209 |
| | 17.2.2 Worldwide Protein Data Bank | 211 |
| 17.3 | Mining of Protein Domains | 212 |
| | 17.3.1 InterPro: The Integrative Protein Signature Database | 213 |

| | |
|--|-----|
| 17.3.1.1 Protein family and domain databases integrated with InterPro | 213 |
| 17.3.1.2 Functional molecules for metal ion binding found in InterPro | 216 |
| 17.3.2 Bioinformatics Tools for Prediction of Metal-Binding Domains | 216 |
| 17.4 The Next Generation of Metal Biotechnology | 218 |
| <i>Index</i> | 223 |
