## INTERNATIONAL ADVISORY COMMITTEE

E. F. Bertaut  
K. P. Bielow  
A. J. Freeman  
S. Imoto  
B. Jeżowska-Trzebiatowska  
V. I. Spitsyn  
K. W. H. Stevens  
W. Trzebiatowski  
W. E. Wallace  
E. F. Westrum, Jr.

## LOCAL COMMITTEE

J. Leciejewicz  
J. Mulak  
J. Przystawa  
W. Suski  
B. Staliński — chairman  
R. Troć — scientific secretary  
W. Ziętek

## SPONSORS

Polish Academy of Sciences, and the International Union of Pure and Applied Physics

Zakład Narodowy im. Ossolińskich — Wydawnictwo. Wrocław 1977.  
Nakład: 550 egz. Objętość: ark. wyd. 26,40, ark. druk. 33,63. A1-44.  
Papier offsetowy kl. III, 80 g, 70 x 100. Druk ukończono w marcu 1977.  
Wrocławska Drukarnia Naukowa.

## CONTENTS

### WELCOME ADDRESS

B. Staliński	11
W. Trzebiatowski	12
L. Sosnowski	13

### I. ATOMS AND IONS

Chairmen: B. Staliński, K.W.H. Stevens

1. Some remarks on the physics and chemistry of actinides. W. Trzebiatowski	17
2. Electronic structures of atoms and unusual valencies of actinides. V.I. Spitsyn	25
3. Stability of low oxidation states of actinide elements on the quantum-chemistry basis. G.V. Ionova, V.I. Spitsyn and N.B. Mikheev	39
4. Valence states and nature of f-electrons in f-systems. B. Johansson	49
5. Calculation on ground-state and excited-state configuration of neutral uranium. S. Imoto, H. Adachi and S. Asai	61
6. Ions of superheavy elements. J.T. Waber	67

### II. IONIC CRYSTALS

Chairmen: W.T. Carnall, V.I. Spitsyn

1. Long term chemical and physical integrity and stability of condensed phases of actinides M.V. Nevitt	81
--	----

2. The Jahn-Teller effect in the actinides.  
B.R. Judd 93
3. Crystal-field calculations for trivalent actinides in high symmetry host crystals.  
W.T. Carnall, H.M. Crosswhite, H. Crosswhite,  
J.P. Hessler, C. Aderhold, J.A. Caird, A. Paszek,  
and F.W. Wagner 105
4. Study of the solid-state phase transformation of  $^{249}\text{BkBr}_3$  via absorption spectroscopic and X-ray diffraction techniques.  
J.R. Peterson and R.L. Fellows 111
5. Crystal field parameters in  $\text{USiO}_4$  from temperature dependence of paramagnetic susceptibility.  
J. Mulak 117
6. Magnetic susceptibility and crystal field parameters of  $\text{UCl}_4$ .  
J. Mulak and Z. Żoźnierek 125
7. Energy levels of pentavalent uranium in lithium fluoride crystals.  
R. Parrot and C. Naud 133
8. Electronic structure of uranium and thorium compounds: further studies by E.S.C.A. and E.P.R.  
E. Thibaut, J.J. Pireaux, J. Riga, C. Tenret-Noël,  
R. Caudano, E.G. Derouane and J. Verbist 139
9. XPS studies of actinide materials.  
B.W. Veal, D.J. Lam, H.R. Hoekstra, H. Diamond,  
and W.T. Carnall 145
10. Analysis of optical properties of actinide dioxides.  
M.S.S. Brooks and J. Naegele 157
11. Optical reflectivities of  $\text{ThO}_2$  and  $\text{PuO}_2$  and their relation to electronic structure.  
J. Naegele, L. Manes, and H. Winkelmann 163

## III. COMPLEX COMPOUNDS

Chairman: B. Jeżowska-Trzebiatowska

1. The study of f-element complexes by X-ray photo-electron spectroscopy.  
E.G. Chudinov 171
2. f-covalency of actinides in cubic crystals  $Cs_2NaAnCl_6$ .  
Yu.A. Barbanel, R.B. Dushin, V.V. Kolin,  
V.P. Kotlin and G.P. Chudnovskaya 179
3. Vibronic spectra of Np(V), (VI), Pu(VI) dioxocations and actinide-oxygen bond stability in the excited state.  
V.A. Vodovatov, N.G. Gorshkov, I.N. Ladygin,  
L.G. Mashirov, and D.N. Suglov 185
4. Gyrotropy of uranyl compounds and symmetry of electronic states.  
V.I. Burkov and V.V. Zelentsov 191
5. Vibronic interactions and exciton effects in optical spectra of uranyl compounds.  
V.A. Kizel, Ju.I. Krasilov, V.A. Madii and  
S.I. Trofimova 193
6. Vibronic interaction in circular dichroism spectra of uranyl compounds.  
G.S. Syomin and V.I. Burkov 195
7. Peculiarity of the complexochemical behavior of the diacidotype uranyl compounds.  
R.N. Shchelokov, I.M. Orlova, G.T. Bolotova, and  
Ju, N. Mikhailov 197
8. Effect of the  $Br^-$  ligand field of  $O_h$  symmetry on the 5f orbitals in the  $U^{4+}$  ion. Spectroscopic and magnetic properties of complex compound  $[(C_2H_5)_4N]_2 UBr_6$ .  
B. Jeżowska-Trzebiatowska and C.K. Jańczak 199
9. Uranium /+3/ complex chlorides. Energy level scheme of uranium /+3/.  
J. Drozdzyński 205

10. Interpretation of low-temperature magnetic susceptibility of  $UCl_4 \cdot 1,5/C_6H_5/2PCl$  and  $UCl_4 \cdot 2/C_6H_5/2PCl$ .  
M. Duczmal and A. Jabłoński 215

#### IV. METALS AND ALLOYS

Chairman: W. Müller

1. Magnetism in actinide systems.  
B. Coqblin, A.A. Gomès, J.R. Iglesias-Sicardi and R. Jullien 223
2. Theoretical study of an actinide impurity in a disordered transition host.  
J.R. Iglesias-Sicardi, A.A. Gomès, R. Jullien, B. Coqblin and F. Ducastelle 239
3. Nuclear magnetic resonance and the question on 5f electron localization in the actinides.  
F.Y. Fradin 247
4. Superconductivity in metastable BCC alloys containing neptunium.  
J.L. Smith and R.O. Elliot 257
5. The electrical and thermoelectric properties of metallic thorium and its continuous solid solutions with lanthanum and cerium.  
M.V. Vedernikov and G.I. Terehov 263
6. Electrical properties of  $^{241}Am$  metal.  
R. Schenkel, R.O.A. Hall, H.E. Schmidt, and J.C. Spirlet 269
7. Optical reflectivity of americium metal.  
J. Naegele, J.C. Spirlet, and H. Winkelmann 275
8. Study of binary systems plutonium-admixture.  
L. Kuchar, and B. Wozniakova 281
9. Absolute structure-factor measurements in imperfect single crystals by means of 412 keV  $\gamma$ -radiation. Possible application to actinides.  
J.R. Schneider 287

## V. INTERMETALLICS

Chairmen: B.R. Cooper, V.A. Kizel

1. Band structure studies of actinide systems.  
D.D. Koelling 295
2. dHvA effect in actinide compounds.  
A.J. Arko 309
3. Magnetic properties of actinide Laves phases.  
A.T. Aldred, B.D. Dunlap, and G.H. Lander 315
4. Exchange interactions in the magnetically  
ordered actinide compounds.  
S.K. Chan 327
5. New ternary uranium compounds.  
A. Zygmunt 335
6. Magnetic susceptibility of protactinium mono-  
carbide.  
Y. Hery, A. Wojakowski, M. Boidron, C.H. de  
Novion 343
7. The specific heat of  $\text{PuC}_{1-x}$ ,  $\text{Pu}_2\text{C}_3$  and  $\text{Pu}_3\text{C}_2$   
between 10-300 K.  
H.R. Haines, R.O.A. Hall and J.A. Lee 349
8. Rare earth and actinide intermetallics as  
catalysts.  
W.E. Wallace, A. Elattar, T. Takeshita, V. Coon,  
C.A. Bechman and R.S. Craig 357

## VI. SEMIMETALLICS

Chairmen: B. Coqblin, G.H. Lander, W. Trzebiatowski

1. Anisotropic behavior and complex colinear magne-  
tic structures of cerium and actinide intermetal-  
lics.  
B.R. Cooper 369
2. Representation analysis of antiferromagnetic  
transitions in UAs and  $\text{UO}_2$ .  
J. Przystawa and A. Mrozińska 381

3. Some remarks on the influence of comparable exchange interactions and crystal field interactions on the magnetic symmetry and properties of ferromagnets.  
J. Klamut, J. Mulak, and W. Suski 389
4. Magnetic excitations and phonons in  $UO_2$  and UN.  
W.J.L. Buyers, T.M. Holden, G. Dolling and E.C. Svensson 395
5. Magnetic phase diagram of the UAs - USe system.  
M. Oboleński and R. Troć 397
6. Magnetic properties of UP-USe alloys in high magnetic field.  
C.J. Schinkel, W. Suski, and T. Mydlarz 403
7. Recent neutron experiments on uranium compounds performed at Swierk.  
A. Murasik, J. Leciejewicz, H. Ptasiewicz-Bąk, R. Troć, A. Zygmunt and Z. Żoźnierek 405
8. On thermodynamical properties of  $U_3P_4$ .  
H. Kasprzyk, B. Kowalczyk, A. Pawlikowski 415
9. The study of the Barkhausen effect on the  $U_3As_4$  single crystal.  
S. Filka, A. Menovsky and A. Zentko 419
10. Semiconducting properties of thorium phosphides and arsenides with  $Th_3P_4$  structure.  
Z. Henkie, P.J. Markowski, E. Żdanowicz 425
11. High-field magnetoresistivity and Fermi surface of  $U_3P_4$ .  
C. Bazan, Z. Henkie and Z. Pawłowska 431
12. Thermophysical properties, electronic levels, and ferromagnetic transitions of  $U_3As_4$  and  $U_3Sb_4$ .  
E.F. Westrum, Jr. and F. Grönvold 437
13. The application of Bond method in the study of the thermal expansion of  $UP_2$ ,  $UAs_2$ ,  $USb_2$ ,  $UBi_2$  in the region of magnetic phase transitions.  
K. Łukaszewicz, A. Pietraszko, D. Kucharczyk, and M. Malinowski 443

14. Positron annihilation in semimetallic  $UX_2$  and  $UAsY$  compounds / $X = P, As, Sb$  and  $Y = S, ^2Se, Te$ /.  
S. Dębowska, B. Rozenfeld, Z. Henkie, A. Wojakowski and A. Zygmunt 447
15. Positron annihilation as a perspective method of investigating the electronic structure of actinides and their compounds.  
G. Kontrym-Sznajd and H. Stachowiak 453
16. Thermodynamical study of phase transitions in uranium compounds of  $UGeTe$  and  $U_2N_2Z$  types.  
J. Klamut, J. Lorenc, J. Przystawa and E. Sobula 459
17. Ternary neptunium and plutonium compounds  $MX_Y$   
 $X = M, P, As, Sb, Bi - Y = S, Se, Te$  .  
J.P. Charvillat, A. Wojakowski and D. Damien 469
18. Magnetic properties of some ternary neptunium and plutonium compounds  $AnAsY$   $Y = \text{chalcogen}$  .  
A. Blaise, J.P. Charvillat, P. Salmon, and A. Wojakowski 475
19. Magnetic structure of  $FeU_2S_5$ .  
P. Wolfers and M. Bacmann 483
20. Magnetization measurements on the ternary uranium selenides  $VUSe_3$ ,  $CrUSe_3$  and  $CoUSe_3$ .  
H. Noël, P. Wolfers, and G. Fillion 489

## VII. THEORY

Chairman: B.R. Judd

1. When and why do spin-Hamiltonians work?  
K.W.H. Stevens 497
2. Spin Hamiltonians for actinide ions.  
M.S.S. Brooks 503
3. A pseudo-relativistic effective Hamiltonian.  
J. Karwowski and M. Kłobukowski 509
4. On the theory of double exchange.  
B.V. Karpenko 515

5. Bound states of collective excitations in d and f transition metals.  
S. Krompiewski 521
  6. Correlation effects on the electric-dipole transition probabilities between levels of the  $f^n$  configuration.  
K. Jankowski and L. Smentek-Mielczarek 527
- AUTHOR INDEX 535
