All brand names and product names used in this book are trade names, service marks, trademarks or registered trademarks of their respective owners. The publisher is not associated with any product or vendor mentioned in this book. This publication is designed to provide accurate and authoritative information in regard to the subject matter covered. It is sold on the understanding that the publisher is not engaged in rendering professional services. If professional advice or other expert assistance is required, the services of a competent professional should be sought.

The publisher and the author make no representations or warranties with respect to the accuracy or completeness of the contents of this work and specifically disclaim all warranties, including without limitation any implied warranties of fitness for a particular purpose. This work is sold with the understanding that the publisher is not engaged in rendering professional services. The advice and strategies contained herein may not be suitable for every situation. In view of ongoing research, equipment modifications, changes in governmental regulations, and the constant flow of information relating to the use of experimental reagents, equipment, and devices, the reader is urged to review and evaluate the information provided in the package insert or instructions for each chemical, piece of equipment, reagent, or device for, among other things, any changes in the instructions or indication of usage and for added warnings and precautions. The fact that an organization or Website is referred to in this work as a citation and/or a potential source of further information does not mean that the author or the publisher endorses the information the organization or Website may provide or recommendations it may make. Further, readers should be aware that Internet Websites listed in this work may have changed or disappeared between when this work was written and when it is read. No warranty may be created or extended by any promotional statements for this work. Neither the publisher nor the author shall be liable for any damages arising herefrom.

Library of Congress Cataloging-in-Publication Data

Power ultrasound in electrochemistry : from versatile laboratory tool to engineering solution sonoelectrochemistry / edited by Bruno G. Pollet.

p. cm.

Includes bibliographical references and index.

ISBN 978-0-470-97424-7 (cloth)

1. Sonochemistry. 2. Sonic waves—Industrial applications. 3. Electrochemistry. I. Pollet, Bruno G.

QD801.P69 2012

541'.370284—dc23

2011043940

A catalogue record for this book is available from the British Library.

HB ISBN: 9780470974247

Set in 10/12pt Times by Aptara Inc., New Delhi, India.

Contents

<i>Foreword</i>	xiii
<i>About the Editor</i>	xv
<i>List of Contributors</i>	xvii
<i>Acknowledgements</i>	xix
Introduction to Electrochemistry	1
<i>Bruno G. Pollet and Oliver J. Curnick</i>	
I.1 Introduction	1
I.2 Principles of Electrochemistry	1
I.3 Electron-Transfer Kinetics	2
I.4 Determination of Overpotentials	10
I.4.1 Decomposition Voltages	10
I.4.2 Discharge Potentials	10
I.5 Electroanalytical Techniques	11
I.5.1 Voltammetry	11
I.5.2 Amperometry	17
References	20
1 An Introduction to Sonoelectrochemistry	21
<i>Timothy J. Mason and Verónica Sáez Bernal</i>	
1.1 Introduction to Ultrasound and Sonochemistry	21
1.2 Applications of Power Ultrasound through Direct Vibrations	23
1.2.1 Welding	23
1.3 Applications of Power Ultrasound through Cavitation	25
1.3.1 Homogeneous Reactions	26
1.3.2 Heterogeneous Reactions Involving a Solid/Liquid Interface	26
1.3.3 Heterogeneous Liquid/Liquid Reactions	27
1.4 Electrochemistry	27
1.5 Sonoelectrochemistry – The Application of Ultrasound in Electrochemistry	28
1.5.1 Ultrasonic Factors that Influence Sonoelectrochemistry	29
1.6 Examples of the Effect of Ultrasound on Electrochemical Processes under Mass Transport Conditions	32
1.7 Experimental Methods for Sonoelectrochemistry	34

1.7.1	Cell Construction	34
1.7.2	Stability of the Electrodes Under Sonication	36
1.7.3	Some Applications of Sonoelectrochemistry	38
	References	40
2	The Use of Electrochemistry as a Tool to Investigate Cavitation Bubble Dynamics	45
	<i>Peter R. Birkin</i>	
2.1	Introduction	45
2.2	An Overview of Bubble Behaviour	46
2.3	Mass Transfer Effects of Cavitation	48
2.4	Isolating Single Mechanisms for Mass Transfer Enhancement	48
2.5	Electrochemistry Next to a Tethered Permanent Gas Bubble	51
2.6	Mass Transfer from Forced Permanent Gas Bubble Oscillation	55
2.7	Mass Transfer Effects from Single Inertial Cavitation Bubbles	62
2.8	Investigating Non-inertial Cavitation Under an Ultrasonic Horn	65
2.9	Measuring Individual Erosion Events from Inertial Cavitation	67
2.10	Conclusions	73
	Acknowledgements	73
	References	73
3	Sonoelectroanalysis: An Overview	79
	<i>Jonathan P. Metters, Jaanus Kruusma and Craig E. Banks</i>	
3.1	Introduction	79
3.2	Analysis of Pesticides	87
3.3	Quantifying Nitrite	87
3.4	Biogeochemistry	88
3.5	Quantifying Metal in 'Life or Death' Situations	89
3.6	Analysis of Trace Metals in Clinical Samples	90
3.7	Biphasic Sonoelectroanalysis	92
3.8	Applying Ultrasound into the Field: The <i>Sonotrode</i>	93
3.9	Conclusions	93
	References	94
4	Sonoelectrochemistry in Environmental Applications	101
	<i>Pedro L. Bonete Ferrández, María Deseada Esclapez, Verónica Sáez Bernal and José González-García</i>	
4.1	Introduction	101
4.2	Sonoelectrochemical Degradation of Persistent Organic Pollutants	102
	4.2.1 Sonoelectrochemical Applications	102
	4.2.2 Hybrid Sonoelectrochemical Techniques Applications	115
4.3	Recovery of Metals and Treatment of Toxic Inorganic Compounds	121
4.4	Disinfection of Water by Hypochlorite Generation	129
4.5	Soil Remediation	130

4.6	Conclusions	134
	List of Symbols and Abbreviations	134
	References	135
5	Organic Sonoelectrosynthesis	141
	<i>David J. Walton</i>	
5.1	Introduction	141
5.2	Scale-Up Considerations	142
5.3	Early History of Organic Sonoelectrochemistry	143
5.4	Electroorganic Syntheses	144
5.4.1	Electroreductions	144
5.4.2	Organochalcogenides	149
5.4.3	Synthetic Electrooxidations	151
5.4.4	Sonoelectrochemically Produced Electrode Coatings: <i>Desirable and Undesirable</i>	157
5.5	Other Systems	161
5.5.1	Hydrodynamics	161
5.5.2	Low-temperature Effects	162
5.6	Conclusions	163
	Acknowledgements	163
	References	163
6	Sonoelectrodeposition: The Use of Ultrasound in Metallic Coatings Deposition	169
	<i>Jean-Yves Hihn, Francis Touyeras, Marie-Laure Doche, Cédric Costa and Bruno G. Pollet</i>	
6.1	Introduction to Metal Plating	169
6.1.1	Why the Need to Cover Surfaces with Metals?	169
6.1.2	Process and Technology of Plating	170
6.2	The Use of Ultrasound in Surface Treatment	170
6.2.1	Ultrasound in the Cleaning Step for Surface Treatment Processes	170
6.3	Ultrasound and Plating: Why Study Plating under Sonication?	172
6.4	Electrodeposition Assisted by Ultrasound	173
6.4.1	The Electrodeposition Process	173
6.4.2	Ultrasonic Effects on Electrodeposited Coating Properties	175
6.4.3	Microscopic Effects of Ultrasound on Electrodeposited Metal Coatings	179
6.4.4	The Influence of Acoustic Energy Distribution on Coatings	182
6.4.5	Influence of Ultrasound on Copper Electrodeposition in Unconventional Solvents	187
6.4.6	Incorporation of Particles Assisted by Ultrasound	195
6.5	Electroless Coating Assisted by Ultrasound	198
6.5.1	The Electroless Process	198
6.5.2	Ultrasound Effects upon Electroless Coating Properties	198

6.5.3	Copper Coating on Non-conductive Substrates under Insonation	201
	References	209
7	Influence of Ultrasound on Corrosion Kinetics and its Application to Corrosion Tests	215
	<i>Marie-Laure Doche and Jean-Yves Hihn</i>	
7.1	Introduction to Metal Corrosion	215
7.1.1	What Exactly is Corrosion?	215
7.1.2	Why Do Metals Corrode?	215
7.1.3	The Price to Pay: the Economical Impact of Corrosion	216
7.1.4	Corrosion Control Technology: the Need for Reliable Corrosion Tests	217
7.1.5	Why Study Corrosion Under Sonication?	219
7.1.6	Corrosion and Corrosion-Cavitation Mechanisms	220
7.1.7	Corrosion Rate	221
7.1.8	Electrochemical Study of Corrosion Reactions	222
7.1.9	Forms of Corrosion	223
7.1.10	Cavitation-Corrosion	223
7.2	Influence of Ultrasound on the Corrosion Mechanisms of Metals	231
7.2.1	Influence of Ultrasound on General Corrosion	232
7.2.2	Influence of Ultrasound on Passivity of Metals	240
7.3	Ultrasound as a Tool to Develop Accelerated Corrosion Testing	242
7.3.1	Atmospheric Corrosion of Zinc Plated Steel	242
7.3.2	Accelerated Corrosion Test for Stainless Steel Used in Exhaust Systems	243
7.3.3	Accelerated Corrosion Test for Evaluating Oilfield Corrosion Inhibitors	243
7.3.4	Accelerated Corrosion Test for Surgical Implant Materials in Body Fluids	244
	References	244
8	Sonoelectropolymerisation	249
	<i>Fabrice Lallemand, Jean-Yves Hihn, Mahito Atohe and Abdeslam Et Taouil</i>	
8.1	Introduction to Electropolymerisation	249
8.2	Innovative Processes for Electrode Activation	251
8.3	Solubilisation of Monomers with Ultrasound	256
8.4	Chemical Polymerisation	257
8.5	Electropolymerisation under Ultrasonic Irradiation	259
8.6	Effects of Ultrasound on Film Properties	262
8.6.1	Mass-Transfer Effect	262
8.6.2	Morphology Effect	264
8.6.3	Doping Effect	272
8.6.4	Effect on Local Control of Surfaces	276
	References	278

9 Sonoelectrochemical Production of Nanomaterials	283
<i>Jonathan P. Metters and Craig E. Banks</i>	
9.1 Introduction	283
9.2 Experimental Configurations	286
9.3 Pure Metals	287
9.3.1 Cobalt, Iron and Nickel	287
9.3.2 Silver	287
9.3.3 Copper	288
9.3.4 Magnesium	288
9.3.5 Aluminium	289
9.3.6 Lead and Cadmium	290
9.3.7 Core Shell Nanoparticles	290
9.3.8 Gold	292
9.3.9 Tungsten	295
9.4 Alloy Nanoparticles	295
9.5 Polymer Nanoparticles	296
9.6 Conclusions	296
References	296
10 Sonochemistry and Sonoelectrochemistry in Hydrogen and Fuel Cell Technologies	301
<i>Bruno G. Pollet</i>	
10.1 Introduction	301
10.2 Sonoelectrochemical Production of Hydrogen	303
10.3 Sonochemical Production of Noble Metals and Fuel Cell Electro-catalysts	305
10.3.1 Sonochemical Mono-Metallic Syntheses	306
10.3.2 Sonochemical Bi-Metallic Syntheses	309
10.3.3 Sonochemical Perovskite Oxides Syntheses	311
10.4 Sonoelectrochemical Production of Noble Metals and Fuel Cell Electro-catalysts	311
10.4.1 Effect of Surfactants and Polymers	315
10.4.2 Effect of Aqueous Solutions	317
10.5 Sonochemical and Sonoelectrochemical Preparation of Fuel Cell Electrodes	318
10.6 Industrial Applications of the Use of Ultrasound for the Fabrication of Fuel Cell Materials	319
10.7 Conclusions	320
Acknowledgement	321
List of Abbreviations	321
References	322
Appendix: Sonochemical Effects on Electrode Kinetics	327
Index	335
