Contents

Series Preface	xi
Foreword	xiii
Preface.....	xvii
Acknowledgments	xix
Author.....	xxiii
How to Make Use of This Book	xxv

1 Introduction.....	1
1.1 Motivating Examples.....	1
1.2 Process Synthesis and Analysis.....	6
1.3 Process Integration: A Brief Overview	8
1.4 Strategies for Material Recovery and Types of RCNs.....	12
1.5 Problem Statements	14
1.6 Structure of the Book.....	19
References	19

2 Data Extraction for Resource Conservation.....	23
2.1 Segregation for Material Sources.....	23
2.2 Extraction of Limiting Data for Material Sink for Concentration-Based RCN.....	25
2.3 Data Extraction for Mass Exchange Processes	28
2.4 Data Extraction for Hydrogen-Consuming Units in Refinery	33
2.5 Data Extraction for Property Integration	36
2.6 Additional Readings.....	44
Problems.....	44
References	55

Part I Insight-Based Pinch Analysis Techniques

3 Graphical Targeting Techniques for Direct Reuse/Recycle	59
3.1 Material Recovery Pinch Diagram	59
3.2 Significance of the Pinch and Insights from MRPD	64
3.3 Targeting for Multiple Resources	71
3.4 Targeting for Threshold Problems.....	75
3.5 Targeting for Property Integration.....	78
3.6 Additional Readings.....	82
Problems.....	83
References	89

4 Algebraic Targeting Techniques for Direct Reuse/Recycle	91
4.1 Generic Procedure for Material Cascade Analysis Technique.....	91
4.2 Targeting for Multiple Fresh Resources.....	97
4.3 Targeting for Threshold Problems.....	101
4.4 Targeting for Property Integration with Inferior Property Operator Level	105
Problems.....	107
References	116
5 Process Changes for Resource Conservation Networks	119
5.1 Plus–Minus Principle	119
Problems.....	124
References	126
6 Algebraic Targeting Approach for Material Regeneration Networks	127
6.1 Types of Interception Units	127
6.2 Targeting for Single Pass Interception Unit	128
6.3 Modeling of Mass Exchange Operation as Interception Unit.....	141
6.4 Additional Readings.....	151
Problems.....	151
References	153
7 Network Design and Evolution Techniques	155
7.1 Procedure for Nearest Neighbor Algorithm.....	155
7.2 Design for Direct Material Reuse/Recycle and the Matching Matrix.....	157
7.3 Design for Material Regeneration Network.....	166
7.4 Network Evolution Techniques.....	172
7.4.1 Source Shift Algorithm	173
7.4.2 Material Path Analysis.....	175
7.5 Additional Readings.....	182
Problems.....	183
References	188
8 Targeting for Waste Treatment and Total Material Networks	191
8.1 Total Material Network.....	191
8.2 Generic Procedure for Waste Stream Identification.....	193
8.3 Waste Identification for Material Regeneration Network	196
8.4 Targeting for Minimum Waste Treatment Flowrate.....	200
8.5 Insights from the WTPD.....	206
8.6 Additional Readings.....	209
Problems.....	210
References	213

9 Synthesis of Pretreatment Network	215
9.1 Basic Modeling of a Partitioning Interception Unit	215
9.2 Pretreatment Pinch Diagram	216
9.3 Insights on Design Principles from PPD	225
9.4 Pretreatment Network Design with Nearest Neighbor Algorithm	226
Problems	228
Reference	229
10 Synthesis of Inter-Plant Resource Conservation Networks	231
10.1 Types of IPRCN Problems	231
10.2 Generic Targeting Procedure for IPRCN	232
10.3 Design of IPRCN	256
10.4 IPRCN with Material Regeneration and Waste Treatment	260
10.5 Additional Readings	267
Problems	267
References	270
11 Synthesis of Batch Material Networks	271
11.1 Types of Batch Resource Consumption Units	271
11.2 Targeting Procedure for Direct Reuse/Recycle in a BMN without Mass Storage System	272
11.3 Targeting Procedure for Direct Reuse/Recycle in a BMN with Mass Storage System	276
11.4 Targeting for Batch Regeneration Network	283
11.5 Design of a BMN	289
11.6 Waste Treatment and Batch Total Network	291
11.7 Additional Readings	294
Problems	295
References	301

Part II Mathematical Optimization Techniques

12 Synthesis of Resource Conservation Networks:	
A Superstructural Approach	305
12.1 Superstructural Model for Direct Reuse/Recycle Network	305
12.2 Incorporation of Process Constraints	311
12.3 Capital and Total Cost Estimations	313
12.4 Reducing Network Complexity	320
12.5 Superstructural Model for Material Regeneration Network	323
12.6 Superstructural Model for Inter-Plant Resource Conservation Networks	334
12.7 Additional Readings	346
Problems	349
References	354

13 Automated Targeting Model for Direct Reuse/Recycle Networks	357
13.1 Basic Framework and Mathematical Formulation of ATM	357
13.2 Incorporation of Process Constraints into ATM.....	364
13.3 ATM for Property Integration with Inferior Operator Level.....	366
13.4 ATM for Bilateral Problems	371
Problems.....	378
References	380
14 Automated Targeting Model for Material Regeneration and Pretreatment Networks	383
14.1 Types of Interception Units and Their Characteristics.....	383
14.2 ATM for RCN with Single Pass Interception Unit of Fixed Outlet Quality Type.....	384
14.3 ATM for RCN with Single Pass Interception Unit of Removal Ratio Type	393
14.4 Modeling for Partitioning Interception Unit(s) of Fixed Outlet Quality Type.....	399
14.5 Modeling for Partitioning Interception Unit(s) of Removal Ratio Type.....	401
14.6 ATM for RCN with Partitioning Interception Unit(s).....	404
14.7 ATM for Pretreatment Networks.....	410
14.8 Additional Readings.....	417
Problems.....	417
References	422
15 Automated Targeting Model for Waste Treatment and Total Material Networks	423
15.1 ATM for Waste Treatment Network.....	423
15.2 ATM for TMN without Waste Recycling.....	434
15.2.1 TMN with Single Pass Interception Unit of Fixed Outlet Quality Type.....	434
15.2.2 TMN with Removal Ratio Type Single Pass Interception Unit.....	436
15.2.3 TMN with Partitioning Interception Unit.....	436
15.3 ATM for TMN with Waste Recycling	456
15.4 Additional Readings.....	464
Problems.....	464
References	467
16 Automated Targeting Model for Inter-Plant Resource Conservation Networks	469
16.1 ATM for Direct Integration Scheme—Direct Material Reuse/Recycle	469
16.2 ATM for Direct Integration Scheme: RCNs with Individual Interception Unit	479

16.3	ATM for IPRCNs with Centralized Utility Facility.....	490
16.4	Insights from ATM for IPRCN Synthesis	507
16.5	Further Reading	512
	Problems.....	512
	References	515
17	Automated Targeting Model for Batch Material Networks	517
17.1	Basic ATM Procedure for Batch Material Networks.....	517
17.2	ATM for Direct Reuse/Recycle Network	518
17.3	ATM for Batch Regeneration Network	536
17.4	ATM for Batch Total Network	549
17.5	Further Reading	563
	Problems.....	563
	References	566
	Appendix: Case Studies and Examples	569
	Index	573
