NOVEMBER 2013

Articles are published online twice monthly.

November 1, 2013

CALL FOR PAPERS Mitochondria in Cardiovascular Physiology and Disease

The role of mitochondrial bioenergetics and reactive oxygen species in coronary collateral growth (**Review**)

Y. F. Pung, W. J. Sam, J. P. Hardwick, L. Yin, V. Ohanyan, S. Logan, L. Di Vincenzo, and W. M. Chilian

H1275

CALL FOR PAPERS Pathophysiology of Hypertension

Increased vascular smooth muscle cell stiffness: a novel mechanism for aortic stiffness in hypertension

N. L. Sehgel, Y. Zhu, Z. Sun, J. P. Trzeciakowski, Z. Hong, W. C. Hunter, D. E. Vatner, G. A. Meininger, and S. F. Vatner

H1281

Imatinib attenuates monocrotaline pulmonary hypertension and has potent vasodilator activity in pulmonary and systemic vascular beds in the rat

E. A. Pankey, S. Thammasiboon, G. F. Lasker, S. Baber, J. A. Lasky, and P. J. Kadowitz

H1288

VASCULAR BIOLOGY AND MICROCIRCULATION

The bottleneck stent model for chronic myocardial ischemia and heart failure in pigs (**Translational Physiology**)

T. T. Rissanen, J. Nurro, P. J. Halonen, M. Tarkia, A. Saraste, M. Rannankari, K. Honkonen, M. Pietilä, O. Leppänen, A. Kuivanen, J. Knuuti, and S. Ylä-Herttuala

H1297

Role of renin-angiotensin system in activation of macrophages by modified lipoproteins

N. Rafatian, R. W. Milne, F. H. H. Leenen, and S. C. Whitman

H1309

Exercise training enhances multiple mechanisms of relaxation in coronary arteries from ischemic hearts

R. R. Deer and C. L. Heaps

H1321

SIGNALING AND STRESS RESPONSE

Tafazzin knockdown interrupts cell cycle progression in cultured neonatal ventricular fibroblasts

Q. He, M. Wang, N. Harris, and X. Han

H1332
