July 2014

1 of 2

PUBLISHED BY THE AMERICAN PHYSIOLOGICAL SOCIETY

# American Journal of Physiology

July 2014/Volume 307, Issues 1

Issues are published online twice monthly;  
complete contents are listed below.

## American Journal of Physiology- Cell Physiology

July 1, 2014

---

### EDITORIAL

Researching cells: much history, many frontiers

*J. C. Adams*

C1

---

### THEMES

Cellular Mechanisms of Tissue Fibrosis. 8. Current and future drug targets in fibrosis: focus on Rho GTPase-regulated gene transcription

*P.-S. Tsou, A. J. Haak, D. Khanna, and R. R. Neubig*

C2

---

### CALL FOR PAPERS Physical Biology of Cancer

Host endothelial SIPR<sub>1</sub> regulation of vascular permeability modulates tumor growth

*G. Sarkisyan, L. J. Gay, N. Nguyen, B. H. Felding, and H. Rosen*

C14

---

### CALL FOR PAPERS Stem Cell Physiology and Pathophysiology

Type-2 pericytes participate in normal and tumoral angiogenesis

*A. Birbrair, T. Zhang, Z.-M. Wang, M. L. Messi, J. D. Olson, A. Mintz,  
and O. Delbono*

C25

---

Identification and signature profiles for pro-resolving and inflammatory lipid mediators in human tissue

*R. A. Colas, M. Shinohara, J. Dalli, N. Chiang, and C. N. Serhan*

C39

Lysophosphatidic acid stimulation of NHE3 exocytosis in polarized epithelial cells occurs with release from NHERF2 via ERK-PLC-PKC $\delta$  signaling

*B. Cha, T. Chen, R. Sarker, J. Yang, D. Raben, C. M. Tse, O. Kovbasnjuk,  
and M. Donowitz*

C55

Resveratrol induces expression of the slow, oxidative phenotype in *mdx* mouse muscle together with enhanced activity of the SIRT1-PGC-1 $\alpha$  axis

*V. Ljubcic, M. Burt, J. A. Lunde, and B. J. Jasmin*

C66

P2Y<sub>2</sub> nucleotide receptor activation enhances the aggregation and self-organization of dispersed salivary epithelial cells

*F. G. El-Sayed, J. M. Camden, L. T. Woods, M. G. Khalafalla, M. J. Petris, L. Erb,  
and G. A. Weisman*

C83

Enhanced expression of G $\alpha$  and PLC- $\beta$ 1 proteins contributes to vascular smooth muscle cell hypertrophy in SHR: role of endogenous angiotensin II and endothelin-1

*M. E. Atef and M. B. Anand-Srivastava*

C97

---

July 15, 2014

---

**EDITORIAL FOCUS**

*Challenges of assigning protein kinases to in vivo phosphorylation events. Focus on "Use of LC-MS/MS and Bayes' theorem to identify protein kinases that phosphorylate aquaporin-2 at Ser<sup>256</sup>"*  
*R. Prihandoko and A. B. Tobin*

C121

---

**CALL FOR PAPERS**  
**Proteomic and Metabolomic Approaches to**  
**Cell Physiology and Pathophysiology**

Use of LC-MS/MS and Bayes' theorem to identify protein kinases that phosphorylate aquaporin-2 at Ser<sup>256</sup>

*D. Bradford, V. Raghuram, J. L. L. Wilson, C.-L. Chou, J. D. Hoffert, M. A. Knepper, and T. Pisitkun*

C123

---

**CALL FOR PAPERS**  
**Stem Cell Physiology and Pathophysiology**

MMP-14 is necessary but not sufficient for invasion of three-dimensional collagen by human muscle satellite cells

*D. K. Lund, V. Mouly, and D. D. Cornelison*

C140

---

Thyroid hormone inhibition in L6 myoblasts of IGF-I-mediated glucose uptake and proliferation: new roles for integrin  $\alpha\beta 3$

*S. Incerpi, M.-T. Hsieh, H.-Y. Lin, G.-Y. Cheng, P. De Vito, A. M. Fiore, R. G. Ahmed, R. Salvia, E. Candelotti, S. Leone, P. Luly, J. Z. Pedersen, F. B. Davis, and P. J. Davis*

C150

Mucin 3 is involved in intestinal epithelial cell apoptosis via *N*-(3-oxododecanoyl)-L-homoserine lactone-induced suppression of Akt phosphorylation

*R. Taguchi, S. Tanaka, G.-H. Joe, H. Maseda, N. Nomura, J. Ohnishi, S. Ishizuka, H. Shimizu, and H. Miyazaki*

C162

Sphingolipids affect fibrinogen-induced caveolar transcytosis and cerebrovascular permeability

*N. Muradashvili, S. J. Khundmiri, R. Tyagi, A. Gartung, W. L. Dean, M.-J. Lee, and D. Lominadze*

C169

Indispensable functions of ABL and PDGF receptor kinases in epithelial adherence of attaching/effacing pathogens under physiological conditions

*C. F. Manthey, C. B. Calabio, A. Wosinski, E. M. Hanson, B. A. Vallance, A. Groisman, M. G. Martín, J. Y. J. Wang, and L. Eckmann*

C180

Non-weight bearing-induced muscle weakness: the role of myosin quantity and quality in MHC type II fibers

*J.-H. Kim and L. V. Thompson*

C190

Cystic fibrosis transmembrane conductance regulator dysfunction in VIP knockout mice

*N. G. Alcolado, D. J. Conrad, D. Poroca, M. Li, W. Alshafie, F. G. Chappe, R. M. Pelis, Y. Anini, Z. Xu, S. Hamidi, S. I. Said, and V. M. Chappe*

C195

Role of anion exchangers in Cl<sup>-</sup> and HCO<sub>3</sub><sup>-</sup> secretion by the human airway epithelial cell line Calu-3

*D. Kim, J. Kim, B. Burghardt, L. Best, and M. C. Steward*

C208

---

**American Journal of Physiology-**  
**Endocrinology and Metabolism**

July 1, 2014

---

**REVIEW**

Mitochondria: a possible nexus for the regulation of energy homeostasis by the endocannabinoid system?

*C. Lipina, A. J. Irving, and H. S. Hundal*

E1

Sulforaphane reduction of testicular apoptotic cell death in diabetic mice is associated with the upregulation of Nrf2 expression and function <i>Y. Wang, Z. Zhang, W. Guo, W. Sun, X. Miao, H. Wu, X. Cong, K. A. Wintergerst, X. Kong, and L. Cai</i>	E14
A novel oral dual amylin and calcitonin receptor agonist (KBP-042) exerts antiobesity and antidiabetic effects in rats <i>K. V. Andreassen, M. Feigh, S. T. Hjuler, S. Gydesen, J. E. Henriksen, H. Beck-Nielsen, C. Christiansen, M. A. Karsdal, and K. Henriksen</i>	E24
FFA-induced hepatic insulin resistance in vivo is mediated by PKC $\delta$ , NADPH oxidase, and oxidative stress <i>S. Pereira, E. Park, Y. Mori, C. A. Haber, P. Han, T. Uchida, L. Stavar, A. I. Oprescu, K. Koulajian, A. Iovovic, Z. Yu, D. Li, T. A. Bowman, J. Dewald, J. El-Benna, D. N. Brindley, R. Gutierrez-Juarez, T. K. T. Lam, S. M. Najjar, R. A. McKay, S. Bhanot, I. G. Fantus, and A. Giacca</i>	E34
Mediobasal hypothalamic PTEN modulates hepatic insulin resistance independently of food intake in rats <i>T. Sumita, H. Ono, T. Suzuki, G. Sakai, K. Inukai, H. Katagiri, T. Asano, S. Katayama, and T. Awata</i>	E47
Reactive oxygen species induce the association of SHP-1 with c-Src and the oxidation of both to enhance osteoclast survival <i>K. Ke, O.-J. Sul, E.-K. Choi, A. M. Safdar, E.-S. Kim, and H.-S. Choi</i>	E61
Citrulline does not enhance blood flow, microvascular circulation, or myofibrillar protein synthesis in elderly men at rest or following exercise <i>T. A. Churchward-Venne, L. M. Cotie, M. J. MacDonald, C. J. Mitchell, T. Prior, S. K. Baker, and S. M. Phillips</i>	E71
miR-24 regulates menin in the endocrine pancreas <i>J. Vijayaraghavan, E. C. Maggi, and J. S. Crabtree</i>	E84
Targeted metabolomics and mathematical modeling demonstrate that vitamin B-6 restriction alters one-carbon metabolism in cultured HepG2 cells <i>V. R. da Silva, M. A. Ralat, E. P. Quinlivan, B. N. DeRatt, T. J. Garrett, Y.-Y. Chi, H. F. Nijhout, M. C. Reed, and J. F. Gregory 3rd</i>	E93
Both linoleic and $\alpha$ -linolenic acid prevent insulin resistance but have divergent impacts on skeletal muscle mitochondrial bioenergetics in obese Zucker rats <i>S. Matravadia, E. A. F. Herbst, S. S. Jain, D. M. Mutch, and G. P. Holloway</i>	E102
Consumption of a Western-style diet during pregnancy impairs offspring islet vascularization in a Japanese macaque model <i>L. D. Pound, S. M. Comstock, and K. L. Grove</i>	E115
Training status diverges muscle diacylglycerol accumulation during free fatty acid elevation <i>L. S. Chow, D. G. Mashek, E. Austin, L. E. Eberly, X.-M. Persson, M. T. Mashek, E. R. Seaquist, and M. D. Jensen</i>	E124

---

**July 15, 2014**

---

**2013 SOLOMON BERSON AWARD LECTURE**

<b>(Review)</b> Extranuclear estrogen receptor's roles in physiology: lessons from mouse models <i>E. R. Levin</i>	E133
---	------

---

Embryo number and periconceptual undernutrition in the sheep have differential effects on adrenal epigenotype, growth, and development <i>O. Williams-Wyss, S. Zhang, S. M. MacLaughlin, D. Kleemann, S. K. Walker, C. M. Suter, J. E. Cropley, J. L. Morrison, C. T. Roberts, and I. C. McMillen</i>	E141
Hepatic glucose uptake and disposition during short-term high-fat vs. high-fructose feeding <i>K. C. Coate, G. Kraft, M. C. Moore, M. S. Smith, C. Ramnanan, J. M. Irimia, P. J. Roach, B. Farmer, D. W. Neal, P. Williams, and A. D. Cherrington</i>	E151
Etiology of the membrane potential of rat white fat adipocytes <i>D. C. Bentley, P. Pulbutr, S. Chan, and P. A. Smith</i>	E161
Impairments of hepatic gluconeogenesis and ketogenesis in PPAR $\alpha$ -deficient neonatal mice <i>D. G. Cotter, B. Ercal, D. A. d'Avignon, D. J. Dietzen, and P. A. Crawford</i>	E176
Distinct mechanisms of induction of hepatic growth hormone resistance by endogenous IL-6, TNF- $\alpha$ , and IL-1 $\beta$ <i>Y. Zhao, X. Xiao, S. J. Frank, H. Y. Lin, and Y. Xia</i>	E186
Kinetics and utilization of lipid sources during acute exercise and acipimox <i>B. Nellemann, E. Søndergaard, J. Jensen, S. B. Pedersen, N. Jessen, J. O. L. Jørgensen, and S. Nielsen</i>	E199

Ca <sup>2+</sup> signals promote GLUT4 exocytosis and reduce its endocytosis in muscle cells <i>Q. Li, X. Zhu, S. Ishikura, D. Zhang, J. Gao, Y. Sun, A. Contreras-Ferrat, K. P. Foley, S. Lavandero, Z. Yao, P. J. Bilan, A. Klip, and W. Niu</i>	E209
Calcium signaling recruits substrate transporters GLUT4 and CD36 to the sarcolemma without increasing cardiac substrate uptake <i>Y. Angin, R. W. Schwenk, R. Nergiz-Unal, N. Hoebbers, J. W. M. Heemskerk, M. J. Kuijpers, W. A. Coumans, M. A. M. J. van Zandvoort, A. Bonen, D. Neumann, J. F. C. Glatz, and J. J. F. P. Luiken</i>	E225

## American Journal of Physiology- Gastrointestinal and Liver Physiology

July 1, 2014

### THEMES

Chemoprevention in Gastrointestinal Physiology and Disease. Natural products and microbiome <i>A. K. Greiner, R. V. L. Papineni, and S. Umar</i>	G1
---	----

### CALL FOR PAPERS Physiology and GI Cancer

Inducible loss of one <i>Apc</i> allele in Lrig1-expressing progenitor cells results in multiple distal colonic tumors with features of familial adenomatous polyposis <i>A. E. Powell, G. Vlacich, Z.-Y. Zhao, E. T. McKinley, M. K. Washington, H. C. Manning, and R. J. Coffey</i>	G16
--	-----

### MUCOSAL BIOLOGY

Role of transient receptor potential vanilloid 4 activation in indomethacin-induced intestinal damage <i>H. Yamawaki, H. Mihara, N. Suzuki, H. Nishizono, K. Uchida, S. Watanabe, M. Tominaga, and T. Sugiyama</i>	G33
Marginally excessive iron loading transiently blocks mucosal iron uptake in iron-deficient rats <i>S. Shinoda, S. Yoshizawa, E. Nozaki, K. Tadai, and A. Arita</i>	G89

### HORMONES AND SIGNALING

Effect of pancreatic polypeptide on gastric accommodation and gastric emptying in conscious rats <i>S. Verschuere, P. Janssen, L. Van Oudenhove, L. Hultin, and J. Tack</i>	G122
--	------

### NEUROREGULATION AND MOTILITY

Esophageal reflexes modulate frontoparietal response in neonates: Novel application of concurrent NIRS and provocative esophageal manometry <i>S. R. Jadcherla, J. F. Pakiraih, K. A. Hasenstab, I. Dar, X. Gao, D. G. Bates, and N. H. Kashou</i>	G41
Experimental evidence and mathematical modeling of thermal effects on human colonic smooth muscle contractility <i>A. Altomare, A. Gizzi, M. P. L. Guarino, A. Loppini, S. Cocca, M. Dipaola, R. Alloni, M. Cicala, and S. Filippi</i>	G77
Interstitial cells of Cajal mediate nitrenergic inhibitory neurotransmission in the murine gastrointestinal tract <i>B. Lies, V. Gil, D. Groneberg, B. Seidler, D. Saur, E. Wischmeyer, M. Jiménez, and A. Friebe</i>	G98
Mitochondrial calcium handling within the interstitial cells of Cajal <i>S. A. Means and L. K. Cheng</i>	G107

### LIVER AND BILIARY TRACT

Epiregulin promotes the emergence and proliferation of adult liver progenitor cells <i>K. Tomita, H. Haga, K. Mizuno, T. Katsumi, C. Sato, K. Okumoto, Y. Nishise, H. Watanabe, T. Saito, and Y. Ueno</i>	G50
The inhibitory effect of ethanol on Sestrin3 in the pathogenesis of ethanol-induced liver injury <i>X. Kang, K. Petyaykina, R. Tao, X. Xiong, X. C. Dong, and S. Liangpunsakul</i>	G58

- Metabolic profiling reveals that *PNPLA3* induces widespread effects on metabolism beyond triacylglycerol remodeling in Huh-7 hepatoma cells  
*H.-K. Min, S. Sookoian, C. J. Pirola, J. Cheng, F. Mirshahi, and A. J. Sanyal* G66

## PANCREAS

- Low pH enhances connexin32 degradation in the pancreatic acinar cell  
*A. M. Reed, T. Kolodcek, S. Z. Husain, and F. S. Gorelick* G24

---

July 15, 2014

---

## CALL FOR PAPERS Physiology and GI Cancer

- In Barrett's esophagus patients and Barrett's cell lines, ursodeoxycholic acid increases antioxidant expression and prevents DNA damage by bile acids  
*S. Peng, X. Huo, D. Rezaei, Q. Zhang, X. Zhang, C. Yu, K. Asanuma, E. Cheng, T. H. Pham, D. H. Wang, M. Chen, R. F. Souza, and S. J. Spechler* G129

---

## INFLAMMATION/IMMUNITY/MEDIATORS

- Lactobacillus reuteri* DSM 17938 differentially modulates effector memory T cells and Foxp3<sup>+</sup> regulatory T cells in a mouse model of necrotizing enterocolitis  
*Y. Liu, D. Q. Tran, N. Y. Fatheree, and J. M. Rhoads* G177
- Activation of HIF-1 $\alpha$  does not increase intestinal tumorigenesis  
*X. Xue, S. K. Ramakrishnan, and Y. M. Shah* G187

## HORMONES AND SIGNALING

- Cannabinoid-induced autophagy regulates suppressor of cytokine signaling-3 in intestinal epithelium  
*L. C. Koay, R. J. Rigby, and K. L. Wright* G140

## NEUROREGULATION AND MOTILITY

- Increased acid responsiveness in vagal sensory neurons in a guinea pig model of eosinophilic esophagitis  
*Y. Hu, Z. Liu, X. Yu, P. J. Pasricha, B. J. Udem, and S. Yu* G149
- Flow time through esophagogastric junction derived during high-resolution impedance-manometry studies: a novel parameter for assessing esophageal bolus transit  
*Z. Lin, H. Imam, F. Nicodeme, D. A. Carlson, C.-Y. Lin, B. Yim, P. J. Kahrilas, and J. E. Pandolfino* G158
- Converging effects of a *Bifidobacterium* and *Lactobacillus* probiotic strain on mouse intestinal physiology  
*K. W. Lomasney, J. F. Cryan, and N. P. Hyland* G241

## LIVER AND BILIARY TRACT

- Human FABP1 T94A variant impacts fatty acid metabolism and PPAR- $\alpha$  activation in cultured human female hepatocytes  
*A. L. McIntosh, H. Huang, S. M. Storey, K. K. Landrock, D. Landrock, A. D. Petrescu, S. Gupta, B. P. Atshaves, A. B. Kier, and F. Schroeder* G164
- Dynamic alterations in Hippo signaling pathway and YAP activation during liver regeneration  
*J. L. Grijalva, M. Huizenga, K. Mueller, S. Rodriguez, J. Brazzo, F. Camargo, G. Sadri-Vakili, and K. Vakili* G196
- Biological functional annotation of retinoic acid alpha and beta in mouse liver based on genome-wide binding  
*Y. He, J. Tsuei, and Y. Y. Wan* G205
- H1-antihistamines exacerbate high-fat diet-induced hepatic steatosis in wild-type but not in apolipoprotein E knockout mice  
*V. V. Raveendran, K. M. Kassel, D. D. Smith, J. P. Luyendyk, K. J. Williams, R. Cherian, G. A. Reed, C. A. Flynn, I. L. Csanaky, A. L. Lickteig, M. J. Pratt-Hyatt, C. D. Klaassen, and K. N. Dileepan* G219
- Defining the role of albumin infusion in cirrhosis-associated hyponatremia  
*M. K. Nguyen, V. Ornekian, L. Kao, A. W. Butch, and I. Kurtz* G229
- CD8<sup>+</sup> T lymphocyte response against extrahepatic biliary epithelium is activated by epitopes within NSP4 in experimental biliary atresia  
*S. Zheng, H. Zhang, X. Zhang, F. Peng, X. Chen, J. Yang, D. Brigstock, and J. Feng* G233

# American Journal of Physiology- Lung Cellular and Molecular Physiology

July 1, 2014

---

## PERSPECTIVES

Henry Cavendish (1731–1810): hydrogen, carbon dioxide, water, and weighing the world  
*J. B. West* L1

---

## REVIEW

Progress in solving the sex hormone paradox in pulmonary hypertension  
*T. Lahm, R. M. Tuder, and I. Petrache* L7

---

## CALL FOR PAPERS

### Real-Time Visualization of Lung Function: From Micro to Macro

Mechanical ventilation causes airway distension with proinflammatory sequelae in mice  
*H. T. Nickles, M. Sumkauskaitė, X. Wang, I. Wegner, M. Puderbach, and W. M. Kuebler* L27

---

Human airway smooth muscle maintain in situ cell orientation and phenotype when cultured on aligned electrospun scaffolds  
*G. E. Morris, J. C. Bridge, O. M. I. Eltboli, A. J. Knox, J. W. Aylott, C. E. Brightling, A. M. Ghaemmaghami, and F. R. A. J. Rose* L38

Trimethylangelicin promotes the functional rescue of mutant F508del CFTR protein in cystic fibrosis airway cells  
*M. Favia, M. T. Mancini, V. Bezzetti, L. Guerra, O. Laselva, A. C. Abbattiscianni, L. Debellis, S. J. Reshkin, R. Gambari, G. Cabrini, and V. Casavola* L48

Fas ligand-expressing lymphocytes enhance alveolar macrophage apoptosis in the resolution of acute pulmonary inflammation  
*M. T. Kearns, L. Barthel, J. M. Bednarek, Z. X. Yunt, P. M. Henson, and W. J. Janssen* L62

NOX2 protects against progressive lung injury and multiple organ dysfunction syndrome  
*L. C. Whitmore, K. L. Goss, E. A. Newell, B. M. Hilkin, J. S. Hook, and J. G. Moreland* L71

Mucociliary clearance and submucosal gland secretion in the ex vivo ferret trachea  
*J. H. Jeong, N. S. Joo, P. H. Hwang, and J. J. Wine* L83

Lung fibroblasts accelerate wound closure in human alveolar epithelial cells through hepatocyte growth factor/c-Met signaling  
*Y. Ito, K. Correll, J. A. Schiel, J. H. Finigan, R. Prekeris, and R. J. Mason* L94

An 11-nt sequence polymorphism at the 3'UTR of human SFTPA1 and SFTPA2 gene variants differentially affect gene expression levels and miRNA regulation in cell culture  
*P. Silveyra, S. L. DiAngelo, and J. Floros* L106

---

July 15, 2014

---

## PERSPECTIVES

Galen and the beginnings of Western physiology  
*J. B. West* L121

---

## REVIEW

The polymorphic and contradictory aspects of intermittent hypoxia  
*I. Almendros, Y. Wang, and D. Gozal* L129

---

Maternal stress during pregnancy increases neonatal allergy susceptibility:  
Role of glucocorticoids  
*R. Lim, A. V. Fedulov, and L. Kobzik* L141

Nicotine alters mucin rheological properties <i>E. Y. Chen, A. Sun, C.-S. Chen, A. J. Mintz, and W.-C. Chin</i>	L149
TRPV4 inhibition counteracts edema and inflammation and improves pulmonary function and oxygen saturation in chemically induced acute lung injury <i>S. Balakrishna, W. Song, S. Achanta, S. F. Doran, B. Liu, M. M. Kaelberer, Z. Yu, A. Sui, M. Cheung, E. Leishman, H. S. Eidam, G. Ye, R. N. Willette, K. S. Thorneloe, H. B. Bradshaw, S. Matalon, and S.-E. Jordt</i>	L158
Autophagy in pulmonary macrophages mediates lung inflammatory injury via NLRP3 inflammasome activation during mechanical ventilation <i>Y. Zhang, G. Liu, R. O. Dull, D. E. Schwartz, and G. Hu</i>	L173
EGFR activation suppresses respiratory virus-induced IRF1-dependent CXCL10 production <i>A. Kalinowski, I. Ueki, G. Min-Oo, E. Ballon-Landa, D. Knoff, B. Galen, L. L. Lanier, J. A. Nadel, and J. L. Koff</i>	L186
Arginase II is a target of miR-17-5p and regulates miR-17-5p expression in human pulmonary artery smooth muscle cells <i>Y. Jin, Y. Jin, B. Chen, T. E. Tipple, and L. D. Nelin</i>	L197
