Issues are published online twice monthly;
complete contents are listed below.

American Journal of Physiology- Cell Physiology

February 1, 2013

EDITORIAL

AJP-Cell begins a Theme series on tissue fibrosis
S. Lotersztajn and P. A. Insel C215

THEMES

Cellular Mechanisms of Tissue Fibrosis. 1. Common and organ-specific mechanisms associated with tissue fibrosis
M. Zeisberg and R. Kalluri C216

EDITORIAL FOCUS

High-tailing it to the apical surface. Focus on "Apical targeting of the P2Y₄ receptor is directed by hydrophobic and basic residues in the cytoplasmic tail"
O. A. Weisz C226

Apical targeting of the P2Y₄ receptor is directed by hydrophobic and basic residues in the cytoplasmic tail
D. R. DuBose, S. C. Wolff, A.-D. Qi, I. Naruszewicz, and R. A. Nicholas C228

Regional distribution of SGLT activity in rat brain in vivo
A. S. Yu, B. A. Hirayama, G. Timbol, J. Liu, A. Diez-Sampedro, V. Kepe, N. Satyamurthy, S.-C. Huang, E. M. Wright, and J. R. Barrio C240

Sorcin modulates mitochondrial Ca²⁺ handling and reduces apoptosis in neonatal rat cardiac myocytes
J. Suarez, P. M. McDonough, B. T. Scott, A. Suarez-Ramirez, H. Wang, E. S. Fricovsky, and W. H. Dillmann C248

Copper stabilizes the Menkes copper-transporting ATPase (Atp7a) protein expressed in rat intestinal epithelial cells
L. Xie and J. F. Collins C257

Ouabain downregulates Mcl-1 and sensitizes lung cancer cells to TRAIL-induced apoptosis
P. Chanvorachote and V. Pongrakhananon C263

Exogenous modification of platelet membranes with the omega-3 fatty acids EPA and DHA reduces platelet procoagulant activity and thrombus formation
M. K. Larson, G. W. Tormoen, L. J. Weaver, K. J. Luepke, I. A. Patel, C. E. Hjelmén, N. M. Ensz, L. S. McComas, and O. J. T. McCarty C273

Large-conductance calcium-activated potassium current modulates excitability in isolated canine intracardiac neurons
G. J. Pérez, M. Desai, S. Anderson, and F. S. Scornik C280

EDITORIAL FOCUS

Human models for smooth muscle cell differentiation. Focus on "A novel in vitro model system for smooth muscle differentiation from human embryonic stem cell-derived mesenchymal cells"

A. L. Firth and J. X.-J. Yuan

C287

CALL FOR PAPERS
Stem Cell Physiology and Pathophysiology

A novel in vitro model system for smooth muscle differentiation from human embryonic stem cell-derived mesenchymal cells

X. Guo, S. L. Stice, N. L. Boyd, and S.-Y. Chen

C289

CALL FOR PAPERS
Cellular Circadian Rhythms

Mis-expression of the BK K⁺ channel disrupts suprachiasmatic nucleus circuit rhythmicity and alters clock-controlled behavior

J. R. Montgomery, J. P. Whitt, B. N. Wright, M. H. Lai, and A. L. Meredith

C299

Definitive evidence using enucleated cytoplasts for a nongenomic basis for the cystic change in endoplasmic reticulum structure caused by STAT5a/b siRNAs

J. E. Lee, Y.-M. Yang, H. Yuan, and P. B. Sehgal

C312

Activation of c-SRC underlies the differential effects of ouabain and digoxin on Ca²⁺ signaling in arterial smooth muscle cells

A. Zulian, C. I. Linde, M. V. Pulina, S. G. Baryshnikov, I. Papparella, J. M. Hamlyn, and V. A. Golovina

C324

Regulation of intestinal serotonin transporter expression via epigenetic mechanisms: role of HDAC2

R. K. Gill, A. Kumar, P. Malhotra, D. Maher, V. Singh, P. K. Dudeja, W. Alrefai, and S. Saksena

C334

Endoplasmic reticulum stress signal impairs erythropoietin production: a role for ATF4

C.-K. Chiang, M. Nangaku, T. Tanaka, T. Iwawaki, and R. Inagi

C342

Stimulation of human TRPA1 channels by clinical concentrations of the antirheumatic drug auranofin

N. Hatano, H. Suzuki, Y. Muraki, and K. Muraki

C354

Atmospheric ultrafine particles promote vascular calcification via the NF- κ B signaling pathway

R. Li, D. Mittelstein, W. Kam, P. Pakbin, Y. Du, Y. Tintut, M. Navab, C. Sioutas, and T. Hsiai

C362

External Ba²⁺ block of Kv4.2 channels is enhanced in the closed-inactivated state

S. J. Kehl, D. Fedida, and Z. Wang

C370

Remanent cell traction force in renal vascular smooth muscle cells induced by integrin-mediated mechanotransduction

L. Balasubramanian, C.-M. Lo, J. S. K. Sham, and K.-P. Yip

C382

REVIEW

Understanding synergy

N. Geary

E237

Temporal and spatial distribution of murine placental and brain GLUT3-luciferase transgene as a readout of in vivo transcription

S. Thamocharan, D. Stout, B.-C. Shin, and S. U. Devaskar

E254

Leptin-induced increase in body fat content of rats <i>R. B. S. Harris</i>	E267
Large increases in adipose triacylglycerol flux in Cushingoid CRH-Tg mice are explained by futile cycling <i>C. Harris, D. J. Roohk, M. Fitch, B. M. Boudignon, B. P. Halloran, and M. K. Hellerstein</i>	E282
Gastric emptying, mouth-to-cecum transit, and glycemic, insulin, incretin, and energy intake responses to a mixed-nutrient liquid in lean, overweight, and obese males <i>R. V. Seimon, I. M. Brennan, A. Russo, T. J. Little, K. L. Jones, S. Standfield, J. M. Wishart, M. Horowitz, and C. Feinle-Bisset</i>	E294
Chronic mild stress alters circadian expressions of molecular clock genes in the liver <i>K. Takahashi, T. Yamada, S. Tsukita, K. Kaneko, Y. Shirai, Y. Munakata, Y. Ishigaki, J. Imai, K. Uno, Y. Hasegawa, S. Sawada, Y. Oka, and H. Katagiri</i>	E301
Interactions between calcium and phosphorus in the regulation of the production of fibroblast growth factor 23 in vivo <i>S. J. Quinn, A. R. B. Thomsen, J. L. Pang, L. Kantham, H. Bräuner-Osborne, M. Pollak, D. Goltzman, and E. M. Brown</i>	E310
Lipoprotein remodeling generates lipid-poor apolipoprotein A-I particles in human interstitial fluid <i>N. E. Miller, W. L. Olszewski, H. Hattori, I. P. Miller, T. Kujiraoka, T. Oka, T. Iwasaki, and M. N. Nanjee</i>	E321

CORRIGENDUM

Khuituan P, et al., Volume 302, April 2012, p. E903–E913	E329
--	------

February 15, 2013

Brown adipose tissue and its modulation by a mitochondria-targeted peptide in rat burn injury-induced hypermetabolism <i>K. Yo, Y.-M. Yu, G. Zhao, A. A. Bonab, N. Aikawa, R. G. Tompkins, and A. J. Fischman</i>	E331
Vitamin B-6 restriction impairs fatty acid synthesis in cultured human hepatoma (HepG2) cells <i>M. Zhao, M. A. Ralat, V. de Silva, T. J. Garrett, S. Melnyk, S. J. James, and J. F. Gregory, III</i>	E342
Increased amino acid supply potentiates glucose-stimulated insulin secretion but does not increase β -cell mass in fetal sheep <i>M. M. Gadhia, A. M. Maliszewski, M. C. O'Meara, S. R. Thorn, J. R. Lavezzi, S. W. Limesand, W. W. Hay, Jr., L. D. Brown, and P. J. Rozance</i>	E352
Successful adaptation to ketosis by mice with tissue-specific deficiency of ketone body oxidation <i>D. G. Cotter, R. C. Schugar, A. E. Wentz, D. A. d'Avignon, and P. A. Crawford</i>	E363
Glucose ingestion stimulates atherothrombotic inflammation in polycystic ovary syndrome <i>F. González, J. P. Kirwan, N. S. Rote, and J. Minium</i>	E375
^2H enrichment distribution of hepatic glycogen from $^2\text{H}_2\text{O}$ reveals the contribution of dietary fructose to glycogen synthesis <i>T. C. Delgado, F. O. Martins, F. Carvalho, A. Gonçalves, D. K. Scott, R. O'Doherty, M. P. Macedo, and J. G. Jones</i>	E384
NOX2 deficiency attenuates markers of adiposopathy and brain injury induced by high-fat diet <i>J. K. Pepping, L. R. Freeman, S. Gupta, J. N. Keller, and A. J. Bruce-Keller</i>	E392
Branched-chain amino acids alter neurobehavioral function in rats <i>A. Coppola, B. R. Wenner, O. Ilkayeva, R. D. Stevens, M. Maggioni, T. A. Slotkin, E. D. Levin, and C. B. Newgard</i>	E405
Selective SGLT2 inhibition by tofogliflozin reduces renal glucose reabsorption under hyperglycemic but not under hypo- or euglycemic conditions in rats <i>T. Nagata, M. Fukazawa, K. Honda, T. Yata, M. Kawai, M. Yamane, N. Murao, K. Yamaguchi, M. Kato, T. Mitsui, Y. Suzuki, S. Ikeda, and Y. Kawabe</i>	E414
Thermoneutrality modifies the impact of hypoxia on lipid metabolism <i>J. C. Jun, M.-K. Shin, Q. Yao, R. Devera, S. Fonti-Bevans, and V. Y. Polotsky</i>	E424
Acute exercise reverses starvation-mediated insulin resistance in humans <i>P. Frank, A. Katz, E. Andersson, and K. Sahlin</i>	E436
Metabolic response to high-carbohydrate and low-carbohydrate meals in a nonhuman primate model <i>E. Fabbrini, P. B. Higgins, F. Magkos, R. A. Bastarrachea, V. S. Voruganti, A. G. Comuzzie, R. E. Shade, A. Gastaldelli, J. D. Horton, D. Omodei, B. W. Patterson, and S. Klein</i>	E444

Human airway ciliary dynamics <i>P. R. Sears, K. Thompson, M. R. Knowles, and C. W. Davis</i>	L170
Mucociliary transport in porcine trachea: differential effects of inhibiting chloride and bicarbonate secretion <i>J. L. Cooper, P. M. Quinton, and S. T. Ballard</i>	L184
Airway epithelium is a predominant source of endogenous airway GABA and contributes to relaxation of airway smooth muscle tone <i>G. Gallos, E. Townsend, P. Yim, L. Virag, Y. Zhang, D. Xu, M. Bacchetta, and C. W. Emala</i>	L191

February 15, 2013

CALL FOR PAPERS
Bioengineering the Lung: Molecules, Materials, Matrix, Morphology, and Mechanics

Nicotine-induced epithelial-mesenchymal transition via Wnt/ β -catenin signaling in human airway epithelial cells <i>W. Zou, Y. Zou, Z. Zhao, B. Li, and P. Ran</i>	L199
Reproducible uniform equibiaxial stretch of precision-cut lung slices <i>N. Davidovich, J. Huang, and S. S. Margulies</i>	L210
Geranylgeranyl transferase regulates CXC chemokine formation in alveolar macrophages and neutrophil recruitment in septic lung injury <i>Z. Hasan, M. Rahman, K. Palani, I. Syk, B. Jeppsson, and H. Thorlacius</i>	L221
Evidence of synergistic/additive effects of sildenafil and erythropoietin in enhancing survival and migration of hypoxic endothelial cells <i>E. Gammella, C. Leuenberger, M. Gassmann, and L. Ostergaard</i>	L230
Endothelial cell PTP1B regulates leukocyte recruitment during allergic inflammation <i>S. Berdnikovs, H. Abdala-Valencia, and J. M. Cook-Mills</i>	L240
The receptor for advanced glycation end products mediates lung endothelial activation by RBCs <i>N. S. Mangalmurti, J. L. Friedman, L.-C. Wang, D. Stolz, G. Muthukumar, D. L. Siegel, A. M. Schmidt, J. S. Lee, and S. M. Albelda</i>	L250
Ambrisentan reduces pulmonary arterial hypertension but does not stimulate alveolar and vascular development in neonatal rats with hyperoxic lung injury <i>G. T. M. Wagenaar, E. H. Laghmani, Y. P. de Visser, R. M. A. Sengers, P. Steendijk, H. J. Baelde, and F. J. Walther</i>	L264
Regulation of interleukin-6 secretion by the two-pore-domain potassium channel Trek-1 in alveolar epithelial cells <i>A. Schwingshackl, B. Teng, M. Ghosh, K. G. Lim, G. Tigyi, D. Narayanan, J. H. Jaggard, and C. M. Waters</i>	L276
Mitochondrial-targeted DNA repair enzyme 8-oxoguanine DNA glycosylase 1 protects against ventilator-induced lung injury in intact mice <i>M. Hashizume, M. Mouner, J. M. Chouteau, O. M. Gorodnya, M. V. Ruchko, B. J. Potter, G. L. Wilson, M. N. Gillespie, and J. C. Parker</i>	L287
Distinct patterns of leukocyte recruitment in the pulmonary microvasculature in response to local and systemic inflammation <i>Y. Wang, J. Roller, J. E. Slotta, S. Zhang, L. Luo, M. Rahman, I. Syk, M. D. Menger, and H. Thorlacius</i>	L298

**American Journal of Physiology-
Heart and Circulatory Physiology**

February 1, 2013

REVIEWS

The ubiquitin proteasome system and myocardial ischemia <i>J. Calise and S. R. Powell</i>	H337
Ultrasound-mediated targeted drug delivery: recent success and remaining challenges <i>J. Castle, M. Butts, A. Healey, K. Kent, M. Marino, and S. B. Feinstein</i>	H350
Natriuretic peptides and cGMP signaling control of energy homeostasis <i>C. Moro and M. Lafontan</i>	H358

VASCULAR BIOLOGY AND MICROCIRCULATION

- AMP-activated protein kinase inhibits vascular smooth muscle cell proliferation and migration and vascular remodeling following injury
J. D. Stone, A. Narine, P. R. Shaver, J. C. Fox, J. R. Vuncannon, and D. A. Tulis H369
- Endothelial 12(S)-HETE vasorelaxation is mediated by thromboxane receptor inhibition in mouse mesenteric arteries
L. Siangjong, K. M. Gauthier, S. L. Pfister, E. M. Smyth, and W. B. Campbell H382
- Circulating humanin levels are associated with preserved coronary endothelial function
R. J. Widmer, A. J. Flammer, J. Herrmann, M. Rodriguez-Porcel, J. Wan, P. Cohen, L. O. Lerman, and A. Lerman H393
- Endothelial barrier dysfunction in diabetic conduit arteries: a novel method to quantify filtration (**Innovative Methodology**)
X. Lu, V. H. Huxley, and G. S. Kassab H398
-

ENERGETICS AND METABOLISM

- Myocardial oxidative metabolism and protein synthesis during mechanical circulatory support by extracorporeal membrane oxygenation (**Translational Physiology**)
C. M. O'Kelly Priddy, M. Kajimoto, D. R. Ledee, B. Bouchard, N. Isern, A. K. Olson, C. Des Rosiers, and M. A. Portman H406
-

SIGNALING AND STRESS RESPONSE

- Nampt secreted from cardiomyocytes promotes development of cardiac hypertrophy and adverse ventricular remodeling
V. B. Pillai, N. R. Sundaresan, G. Kim, S. Samant, L. Moreno-Vinasco, J. G. N. Garcia, and M. P. Gupta H415
- Different roles of the cardiac $\text{Na}^+/\text{Ca}^{2+}$ -exchanger in ouabain-induced inotropy, cell signaling, and hypertrophy
Y. Bai, E. E. Morgan, D. R. Giovannucci, S. V. Pierre, K. D. Philipson, A. Askari, and L. Liu H427
-

CARDIOVASCULAR NEUROHORMONAL REGULATION

- Sex differences in sympathetic neural and limb vascular reactivity to mental stress in humans
H. Yang, T. D. Drummer, and J. R. Carter H436
- Chronic fluoxetine reduces autonomic control of cardiac rhythms in rats with congestive heart failure
M. Henze, R. Tiniakov, A. Samarel, E. Holmes, and K. Scrogin H444
-

CARDIAC EXCITATION AND CONTRACTION

- The cardiac L-type calcium channel distal carboxy terminus autoinhibition is regulated by calcium
S. M. Crump, D. A. Andres, G. Sievert, and J. Satin H455
-

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY AND PATHOPHYSIOLOGY

- Testosterone regulates cardiac contractile activation by modulating SERCA but not NCX activity
N. Witayavanitkul, W. Woranush, T. Bupha-Intr, and J. Wattanapermpool H465
- Biomechanical modeling and morphology analysis indicates plaque rupture due to mechanical failure unlikely in atherosclerosis-prone mice
I. C. Campbell, D. Weiss, J. D. Suever, R. Virmani, A. Veneziani, R. P. Vito, J. N. Oshinski, and W. R. Taylor H473
-

LETTERS TO THE EDITOR

- Letter to the editor: "A return to the venous return controversy: a visual aid for combatants"
J. R. Munis H487
- Reply to "Letter to the editor: A return to the venous return controversy: a visual aid for combatants"
D. A. Beard and E. O. Feigl H489

- Roles played by 20-HETE, angiotensin II and endothelin in mediating the hypertension in aging female spontaneously hypertensive rats
R. Lima, L. L. Yanes, D. D. Davis, and J. F. Reckelhoff R248
- Dietary sodium intake modulates renal excretory responses to intrarenal angiotensin (1-7) administration in anesthetized rats
J. O'Neill, A. Corbett, and E. J. Johns R260

RESPIRATION

- Asymmetric sleep in apneic human patients
R. Rial, J. González, L. Gené, M. Akaârîr, S. Esteban, A. Gamundí, P. Barceló, and C. Nicolau R232

HORMONES, REPRODUCTION AND DEVELOPMENT

- Ectopic lipid deposition and the metabolic profile of skeletal muscle in ovariectomized mice
K. C. Jackson, L. M. Wohlers, R. M. Lovering, R. A. Schuh, A. C. Maher, A. Bonen, T. R. Koves, O. Ilkayeva, D. M. Thomson, D. M. Muoio, and E. E. Spangenburg R206
- Roles played by 20-HETE, angiotensin II and endothelin in mediating the hypertension in aging female spontaneously hypertensive rats
R. Lima, L. L. Yanes, D. D. Davis, and J. F. Reckelhoff R248

February 15, 2013

CALL FOR PAPERS

Integrative and Translational Physiology: Inflammation and Immunity in Organ System Physiology

- TLR3 deficiency induces chronic inflammatory cardiomyopathy in resistant mice following coxsackievirus B3 infection: role for IL-4
E. D. Abston, M. J. Coronado, A. Bucek, J. A. Onyimba, J. E. Brandt, J. A. Frisancho, E. Kim, D. Bedja, Y.-k. Sung, A. J. Radtke, K. L. Gabrielson, W. Mitzner, and D. Fairweather R267

CALL FOR PAPERS

Fetal and Neonatal Programming: Epigenetic Modification of Phenotype

- High-fat/fructose feeding during prenatal and postnatal development in female rats increases susceptibility to renal and metabolic injury later in life
E. R. Flynn, B. T. Alexander, J. Lee, Z. M. Hutchens, Jr., and C. Maric-Bilkan R278

RESEARCH

NEURAL CONTROL

- Cardiac output, at rest and during exercise, before and during myocardial ischemia, reperfusion, and infarction in conscious mice
H. L. Lujan and S. E. DiCarlo R286
- Longitudinal sleep EEG trajectories indicate complex patterns of adolescent brain maturation
I. Feinberg and I. G. Campbell R296

FLUID AND ELECTROLYTE HOMEOSTASIS

- Glycerol-3-phosphatase and not lipid recycling is the primary pathway in the accumulation of high concentrations of glycerol in rainbow smelt (*Osmerus mordax*)
D. Ditlecadet and W. R. Driedzic R304

OBESITY, DIABETES AND ENERGY HOMEOSTASIS

- Glycerol-3-phosphatase and not lipid recycling is the primary pathway in the accumulation of high concentrations of glycerol in rainbow smelt (*Osmerus mordax*)
D. Ditlecadet and W. R. Driedzic R304

HORMONES, REPRODUCTION AND DEVELOPMENT

- Sex-dependent nutritional programming: fish oil intake during early pregnancy in rats reduces age-dependent insulin resistance in male, but not female, offspring
F. L. C. Sardinha, F. S. Fernandes, M. G. Tavares do Carmo, and E. Herrera R313

February 1, 2013

TRANSLATIONAL PHYSIOLOGY

- Effects of acute selective pudendal nerve electrical stimulation after simulated childbirth injury
*H.-H. Jiang, B. C. Gill, C. Dissarunan, M. Zutshi, B. M. Balog, D. Lin,
and M. S. Damaser* F239
-
- Juxtaglomerular cell CaSR stimulation decreases renin release via activation of the PLC/IP₃ pathway and the ryanodine receptor
M. C. Ortiz-Capisano, M. Reddy, M. Mendez, J. L. Garvin, and W. H. Beierwaltes F248
- Role of reduced manganese superoxide dismutase in ischemia-reperfusion injury: a possible trigger for autophagy and mitochondrial biogenesis?
N. Parajuli and L. A. MacMillan-Crow F257
- Temporal delays and individual variation in antidiuretic response to desmopressin
K. V. Juul, L. Erichsen, and G. L. Robertson F268
- Reduced ENaC activity and blood pressure in mice with genetic knockout of the insulin receptor in the renal collecting duct
*L. Li, R. M. Garikepati, S. Tsukerman, D. Kohan, J. B. Wade, S. Tiwari,
and C. M. Ecelbarger* F279
- Immune reactivity to heat shock protein 70 expressed in the kidney is cause of salt-sensitive hypertension
*H. Pons, A. Ferrebuz, Y. Quiroz, F. Romero-Vasquez, G. Parra, R. J. Johnson,
and B. Rodriguez-Iturbe* F289
- Chronic interstitial fibrosis in the rat kidney induced by long-term (6-mo) exposure to lithium
*R. J. Walker, J. P. Leader, J. J. Bedford, G. Gobe, G. Davis, F. E. Vos, S. deJong,
and J. B. W. Schollum* F300
- Axial compartmentation of descending and ascending thin limbs of Henle's loops
K. Y. Westrick, B. Serack, W. H. Dantzler, and T. L. Pannabecker F308
- Age sensitizes the kidney to heme protein-induced acute kidney injury
*K. A. Nath, J. P. Grande, G. Farrugia, A. J. Croatt, J. D. Belcher, R. P. Hebbel,
G. M. Vercellotti, and Z. S. Katusic* F317
- Interaction between nitric oxide and superoxide in the macula densa in aldosterone-induced alterations of tubuloglomerular feedback
*Q. Zhang, L. Lin, Y. Lu, H. Liu, Y. Duan, X. Zhu, C. Zou, R. D. Manning, Jr.,
and R. Liu* F326
-

February 15, 2013

REVIEW

- The podocyte's response to stress: the enigma of foot process effacement
W. Kriz, I. Shirato, M. Nagata, M. LeHir, and K. V. Lemley F333
-

TRANSLATIONAL PHYSIOLOGY

- Loss of *GSTM1*, a *NRF2* target, is associated with accelerated progression of hypertensive kidney disease in the African American Study of Kidney Disease (AASK)
*J. Chang, J. Z. Ma, Q. Zeng, S. Cechova, A. Gantz, C. Nievergelt, D. O'Connor,
M. Lipkowitz, and T. H. Le* F348
-

CALL FOR PAPERS
Pathophysiology of Acute Kidney Injury

- EGFR activity is required for renal tubular cell dedifferentiation and proliferation in a murine model of folic acid-induced acute kidney injury
S. He, N. Liu, G. Bayliss, and S. Zhuang F356

CALL FOR PAPERS
Aldosterone and Epithelial Na⁺ Channels

- An Af9 *cis*-element directly targets Dot1a to mediate transcriptional repression of the α ENaC gene
W. Zhang, Z. Yu, H. Wu, L. Chen, Q. Kong, and B. C. Kone F367
-
- Anandamide inhibits transport-related oxygen consumption in the loop of Henle by activating CB1 receptors
G. B. Silva, D. K. Atchison, L. I. Juncos, and N. H. Garcia F376
- Tubuloglomerular feedback and renal function in mice with targeted deletion of the type 1 equilibrative nucleoside transporter
L. Li, D. Mizel, Y. Huang, C. Eisner, M. Hoerl, M. Thiel, and J. Schnermann F382
- Effects of urethane on reflex activity of lower urinary tract in decerebrate unanesthetized rats
M. Yoshiyama, J. R. Roppolo, M. Takeda, and W. C. de Groat F390
- Kidney-specific WNK1 regulates sodium reabsorption and potassium secretion in mouse cortical collecting duct
C.-J. Cheng, M. Baum, and C.-L. Huang F397
- Human organic anion transporter OAT1 is not responsible for glutathione transport but mediates transport of glutamate derivatives
Y. Hagos, G. Burckhardt, and B. C. Burckhardt F403
-
- Renal ammonia excretion in response to hypokalemia: effect of collecting duct-specific Rh C glycoprotein deletion
H.-W. Lee, J. W. Verlander, J. M. Bishop, M. E. Handlogten, K.-H. Han, and I. D. Weiner F410
- Intercalated cell-specific Rh B glycoprotein deletion diminishes renal ammonia excretion response to hypokalemia
J. M. Bishop, H.-W. Lee, M. E. Handlogten, K.-H. Han, J. W. Verlander, and I. D. Weiner F422
- Renal functional decline and glomerulotubular injury are arrested but not restored by release of unilateral ureteral obstruction (UUO)
W. Chaabane, F. Praddaude, M. Buleon, A. Jaafar, M. Vallet, P. Rischmann, C. I. Galarreta, R. L. Chevalier, and I. Tack F432
- CHOP deficiency results in elevated lipopolysaccharide-induced inflammation and kidney injury
V. Esposito, F. Grosjean, J. Tan, L. Huang, L. Zhu, J. Chen, H. Xiong, G. E. Striker, and F. Zheng F440
