applied surface science

A journal devoted to applied physics
and chemistry of surfaces and interfaces

EMRS 2012 Fall Meeting Symposium on highly precise characterization of materials for
nano and bio technologies

Guest Editor:
Peter Petrik

Volume 281, pp. 1–128

Contents

Volume 281 (2013)

Preface

Special issue papers

Characterizations at the nanoscale

Towards FDTD modeling of spectroscopic ellipsometry data at large angles of incidence

K.T. Cheung, Y. Foo, C.H. To and J.A. Zapien

Medium energy ion scattering for the high depth resolution characterisation of high- k dielectric layers of nanometer thickness

J.A. van den Berg, M.A. Reading, P. Bailey, T.Q.C. Noakes, C. Adelman, M. Popovici, H. Tielens, T. Conard, S. de Gendt and S. van Elshocht

Shape, size, and atomic composition analysis of nanostructures in 3D by Rutherford backscattering spectrometry

Z. Zolnai

Kelvin probe force microscopy for characterizing doped semiconductors for future sensor applications in nano- and biotechnology

H. Schmidt, S. Habicht, S. Feste, A.-D. Müller and O.G. Schmidt

Optical and microstructural characterisation of Au-Sn and Cu-Sn diffusive layers

A.A. Wronkowska, G. Czerniak, A. Wronkowski and Ł. Skowroński

Microstructure strengthening mechanisms in an Al-Mg-Si-Sc-Zr equal channel angular pressed aluminium alloy

M. Cabibbo

Effect of ECAP processing on corrosion resistance of AE21 and AE42 magnesium alloys

P. Minárik, R. Král and M. Janeček

Characterizations for bio applications

Color change of Blue butterfly wing scales in an air – Vapor ambient

K. Kertész, G. Piszter, E. Jakab, Z. Bálint, Z. Vértesy and L.P. Biró

Evaluation of the functionality of biodegradable polymeric platforms for drug delivery systems

M. Gioti, V. Karagkiozaki, A. Basgiouraki, P.G. Karagiannidis and S. Logothetidis

Magnetic iron oxide nanoparticles as drug delivery system in breast cancer

A. Marcu, S. Pop, F. Dumitrache, M. Mocanu, C.M. Niculite, M. Gherghiceanu, C.P. Lungu, C. Fleaca, R. Ianchis, A. Barbut, C. Grigoriu and I. Morjan

Investigation of thin polymer layers for biosensor applications

A. Saftics, E. Agócs, B. Fodor, D. Patkó, P. Petrik, K. Kolari, T. Aalto, P. Fűrjes, R. Horvath and S. Kurunczi

1	Characterization of electric discharge machining, subsequent etching and shot-peening as a surface treatment for orthopedic implants J. Stráský, J. Havlíková, L. Bačáková, P. Hrcuba, M. Mhaede and M. Janeček	73
2	The mechanism of the photoluminescence changes in bio-conjugated CdSe/ZnS quantum dots L. Borkovska, N. Korsunská, T. Stara, O. Kolomys, V. Strelchuk, D. Rachkov and T. Kryshab	79
8	Surface modification methods to improve behavior of biosensor based on imaging ellipsometry Y. Niu and G. Jin	84
17	<i>Optical and X-ray methods</i>	
24	Far field optical nanoscopy: How far can you go in nanometric characterization without resolving all the details? P.C. Montgomery, B. Serio, F. Anstötz and D. Montaner	89
30	Stoichiometry dependence of the optical properties of amorphous-like $\text{In}_{x-w}\text{Ga}_w\text{Zn}_{1-x}\text{O}_{1+0.5x-\delta}$ thin films A.C. Galca, G. Socol, L.M. Trinca and V. Craciun	96
38	X-ray spectroscopic methods in the studies of nonstoichiometric TiO_{2-x} thin films K. Kollbek, M. Sikora, Cz. Kapusta, J. Szlachetko, K. Zakrzewska, K. Kowalski and M. Radecka	100
44	Ellipsometric study of crystalline silicon hydrogenated by plasma immersion ion implantation A. Szekeres, S. Alexandrova, P. Petrik, B. Fodor and S. Bakalova	105
49	Influence of doping level on shift of the absorption edge of gallium nitride films (Burstein-Moss effect) S.N. Svitashva and A.M. Gilinsky	109
54	Spectroellipsometric characterization of nanocrystalline diamond layers T. Lohner, P. Csíkvári, P. Petrik and G. Hárs	113
60	Enhancement of the photoluminescence in CdSe quantum dot-polyvinyl alcohol composite by light irradiation L. Borkovska, N. Korsunská, T. Stara, O. Gudymenko, Ye. Venger, O. Stroyuk, O. Raevska and T. Kryshab	118
66	Characterization of ZnO structures by optical and X-ray methods P. Petrik, B. Pollakowski, S. Zakeľ, T. Gumprecht, B. Beckhoff, M. Lemberger, Z. Labadi, Z. Baji, M. Jank and A. Nutsch	123
