ATMOSPHERIC ENVIRONMENT

**Special Issue: Agriculture and Air Quality: Emission Measurement
and Modeling**

Guest Editors

L. McConnell, C. Hapeman, C. Howard and S. Hafner

CONTENTS

Special Issue

Agriculture and Air Quality: Emission Measurement and Modeling

Guest Editors

L. McConnell, C. Hapeman, C. Howard and S. Hafner

Measurement Techniques and Technologies

- Y. Huang, L. Wieck and S. Tao 1 Development and evaluation of optical fiber NH₃ sensors for application in air quality monitoring
- L. Wang-Li, Z. Cao, Q. Li, Z. Liu and D.B. Beasley 8 Concentration and particle size distribution of particulate matter inside tunnel-ventilated high-rise layer operation houses
- Q. Huang, L.L. McConnell, E. Razote, W.F. Schmidt, B.T. Vinyard, A. Torrents, C.J. Hapeman, R. Maghirang, S.L. Trabue, J. Prueger and K.S. Ro 17 Utilizing single particle Raman microscopy as a non-destructive method to identify sources of PM₁₀ from cattle feedlot operations
- L. Wang-Li, Z. Cao, M. Buser, D. Whitelock, C.B. Parnell and Y. Zhang 25 Techniques for measuring particle size distribution of particulate matter emitted from animal feeding operations

Experimental Measurements and Model Simulations

- L. Luo, D.J. Ashworth, J. Šimunek, R. Xuan and S.R. Yates 33 Assessment of methods for methyl iodide emission reduction and pest control using a simulation model
- R. Reichman, S.R. Yates, T.H. Skaggs and D.E. Rolston 41 Effects of soil moisture on the diurnal pattern of pesticide emission: Numerical simulation and sensitivity analysis
- R. Reichman, S.R. Yates, T.H. Skaggs and D.E. Rolston 52 Effects of soil moisture on the diurnal pattern of pesticide emission: Comparison of simulations with field measurements
- S.D. Hafner, F. Montes and C. Alan Rotz 63 The role of carbon dioxide in emission of ammonia from manure
- D. Parker, J. Ham, B. Woodbury, L. Cai, M. Spiehs, M. Rhoades, S. Trabue, K. Casey, R. Todd and A. Cole 72 Standardization of flux chamber and wind tunnel flux measurements for quantifying volatile organic compound and ammonia emissions from area sources at animal feeding operations
- G. Schaubberger, T.-T. Lim, J.-Q. Ni, D.S. Bundy, B.L. Haymore, C.A. Diehl, R.K. Duggirala and A.J. Heber 84 Empirical model of odor emission from deep-pit swine finishing barns to derive a standardized odor emission factor
- D.B. Parker, J. Gilley, B. Woodbury, K.-H. Kim, G. Galvin, S.L. Bartelt-Hunt, X. Li and D.D. Snow 91 Odorous VOC emission following land application of swine manure slurry
- K.S. Ro, M.H. Johnson, K.C. Stone, P.G. Hunt, T. Flesch and R.W. Todd 101 Measuring gas emissions from animal waste lagoons with an inverse-dispersion technique
- V.K. Vaddella, P.M. Ndegwa, J.L. Ullman and A. Jiang 107 Mass transfer coefficients of ammonia for liquid dairy manure
- A. Datta, J.B. Yeluripati, D.R. Nayak, K.R. Mahata, S.C. Santra and T.K. Adhya 114 Seasonal variation of methane flux from coastal saline rice field with the application of different organic manures
- A. Datta, S.C. Santra and T.K. Adhya 123 Effect of inorganic fertilizers (N, P, K) on methane emission from tropical rice field of India

Contents continued overleaf

*Contents continued***Atmospheric Fate and Transport**

- C.J. Hapeman, L.L. McConnell, T.L. Potter,
J. Harman-Fetcho, W.F. Schmidt, C.P. Rice,
B.A. Schaffer and R. Curry 131 Endosulfan in the atmosphere of South Florida: Transport to Everglades and
Biscayne National Parks
- C.J. Peterson and S.L. Costello 141 Presence of carbaryl in the smoke of treated lodgepole and ponderosa pine
bark
- J.L. Armstrong, R.A. Fenske, M.G. Yost, K. Galvin,
M. Tchong-French and J. Yu 145 Presence of organophosphorus pesticide oxygen analogs in air samples
- O. Hertel, C. Geels, L.M. Frohn, T. Ellenmann,
C.A. Skjøth, P. Løfstrøm, J.H. Christensen,
H.V. Andersen and R.G. Peel 151 Assessing atmospheric nitrogen deposition to natural and semi-natural
ecosystems – Experience from Danish studies using the DAMOS
- M. Graus, A.S.D. Eller, R. Fall, B. Yuan, Y. Qian,
P. Westra, J. de Gouw and C. Warneke 161 Biosphere-atmosphere exchange of volatile organic compounds over C4
biofuel crops
