

# Biochemical and Biophysical Research Communications

**This Issue Contains a Discussion Forum on  
Mitochondrial Calcium Uptake**

Volume 449, Issue 4, July 11, 2014

CONTENTS

Abstracted/Indexed in Biological Abstracts (BIOSIS), Chemical Abstracts, Current Contents/Life Sciences, EMBASE, *Index Medicus* (MEDLINE), Science Citation Index, and SCISEARCH. Also covered in the abstract and citation database Scopus®. Full text available on ScienceDirect®.

DISCUSSION FORUM ON MITOCHONDRIAL CALCIUM UPTAKE

|                                                                                                                    |                                                                                     |     |
|--------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|-----|
| Historical introduction                                                                                            | Ernesto Carafoli                                                                    | 365 |
| Outstanding questions regarding the permeation, selectivity, and regulation of the mitochondrial calcium uniporter | Dipayan Chaudhuri, David E. Clapham                                                 | 367 |
| The uniporter: From newly identified parts to function                                                             | Kimberli J. Kamer, Yasemin Sancak, Vamsi K. Mootha                                  | 370 |
| Molecular control of mitochondrial calcium uptake                                                                  | Diego De Stefani, Rosario Rizzuto                                                   | 373 |
| Regulation of the mitochondrial $\text{Ca}^{2+}$ uniporter by MICU1 and MICU2                                      | J. Kevin Foskett, Muniswamy Madesh                                                  | 377 |
| Unresolved questions from the analysis of mice lacking MCU expression                                              | Elizabeth Murphy, Xin Pan, Tiffany Nguyen, Jie Liu, Kira M. Holmström, Toren Finkel | 384 |

REGULAR ARTICLES

|                                                                                                                                                           |                                                                                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Cancer-testis antigen HCA587/MAGE-C2 interacts with BS69 and promotes its degradation in the ubiquitin-proteasome pathway                                 | Jiaqing Hao, Rui Shen, Yan Li, Yu Zhang, Yanhui Yin                                                                                                                                         | 386 |
| Folate in demethylation: The crystal structure of the rat dimethylglycine dehydrogenase complexed with tetrahydrofolate                                   | Zigmund Luka, Svetlana Pakhomova, Lioudmila V. Loukachevitch, Marcia E. Newcomer, Conrad Wagner                                                                                             | 392 |
| Structural basis of the phosphorylation dependent complex formation of neurodegenerative disease protein Ataxin-1 and RBM17                               | Eunji Kim, Yoonji Lee, Sun Choi, Ji-Joon Song                                                                                                                                               | 399 |
| Smooth muscle progenitor cells from peripheral blood promote the neovascularization of endothelial colony-forming cells                                   | Hyung Joon Joo, Ha-Rim Seo, Hyo Eun Jeong, Seung-Cheol Choi, Jae Hyung Park, Cheol Woong Yu, Soon Jun Hong, Seok Chung, Do-Sun Lim                                                          | 405 |
| Pharmacological assessment of methamphetamine-induced behavioral hyperactivity mediated by dopaminergic transmission in planarian <i>Dugesia japonica</i> | Natsuka Tashiro, Kaneyasu Nishimura, Kanako Daido, Tomoe Oka, Mio Todo, Asami Toshikawa, Jun Tsushima, Kazuyuki Takata, Eishi Ashihara, Kanji Yoshimoto, Kiyokazu Agata, Yoshihisa Kitamura | 412 |

|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Global impact of <i>Salmonella</i> type III secretion effector SteA on host cells                                                                                                                | Elena Cardenal-Muñoz, Gabriel Gutiérrez, Francisco Ramos-Morales                                                                                                   | 419 |
| Structural characterization and interaction of periostin and bone morphogenetic protein for regulation of collagen cross-linking                                                                 | Eun Young Hwang, Mi Suk Jeong, Eun-Kyeong Park, Jae Ho Kim, Se Bok Jang                                                                                            | 425 |
| MicroRNA-497 inhibition of ovarian cancer cell migration and invasion through targeting of SMAD specific E3 ubiquitin protein ligase 1                                                           | Wei Wang, Fang Ren, Qinghua Wu, Dazhi Jiang, Hongjun Li, Zheng Peng, Jinglu Wang, Huirong Shi                                                                      | 432 |
| Potential anti-osteoporotic activity of low-molecular weight hyaluronan by attenuation of osteoclast cell differentiation and function in vitro                                                  | Chang Won Lee, Jeong Yeon Seo, Ji Won Choi, Jisun Lee, Joo Woong Park, Jae Yeon Lee, Kyo-Yeol Hwang, Young Shik Park, Yong Il Park                                 | 438 |
| Characterization of the human oncogene SCL/TAL1 interrupting locus ( <i>Stil</i> ) mediated Sonic hedgehog ( <i>Shh</i> ) signaling transduction in proliferating mammalian dopaminergic neurons | Lei Sun, Aprell L. Carr, Ping Li, Jessica Lee, Mary McGregor, Lei Li                                                                                               | 444 |
| Phosphorylation of sterol regulatory element binding protein-1a by protein kinase A (PKA) regulates transcriptional activity                                                                     | Qingming Dong, Francesco Giorgianni, Xiong Deng, Sarka Beranova-Giorgianni, Dave Bridges, Edwards A. Park, Rajendra Raghaw, Marshall B. Elam                       | 449 |
| <i>Fusaric acid</i> modulates Type Three Secretion System of <i>Salmonella enterica</i> serovar Typhimurium                                                                                      | Jianfang Li, Weiyang Sun, Zhixing Guo, Chunhua Lu, Yuemao Shen                                                                                                     | 455 |
| Antibody-modified lipid nanoparticles for selective delivery of siRNA to tumors expressing membrane-anchored form of HB-EGF                                                                      | Ayaka Okamoto, Tomohiro Asai, Hiroki Kato, Hidenori Ando, Tetsuo Minamino, Eisuke Mekada, Naoto Oku                                                                | 460 |
| Differential expression of extracellular-signal-regulated kinase 5 (ERK5) in normal and degenerated human nucleus pulposus tissues and cells                                                     | Weiguo Liang, Dejian Fang, Dongping Ye, Longqiang Zou, Yan Shen, Libing Dai, Jiakexu                                                                               | 466 |
| Knockdown of hepatoma-derived growth factor-related protein-3 induces apoptosis of H1299 cells via ROS-dependent and p53-independent NF- $\kappa$ B activation                                   | Hong Shik Yun, Jeong-Hwa Baek, Ji-Hye Yim, Su-Jae Lee, Chang-Woo Lee, Jie-Young Song, Hong-Duck Um, Jong Kuk Park, In-Chul Park, Sang-Gu Hwang                     | 471 |
| IL-6, A1 and A2aR: A crosstalk that modulates BDNF and induces neuroprotection                                                                                                                   | Rafael Perígolo-Vicente, Karen Ritt, Cassiano Felipe Gonçalves-de-Albuquerque, Hugo Caire Castro-Faria-Neto, Roberto Paes-de-Carvalho, Elizabeth Giestal-de-Araujo | 477 |
| A sensitive assay for the biosynthesis and secretion of MANF using NanoLuc activity                                                                                                              | Junpei Norisada, Yoko Hirata, Fumimasa Amaya, Kazutoshi Kiuchi, Kentaro Oh-hashii                                                                                  | 483 |
| Knockdown of TWIST1 enhances arsenic trioxide- and ionizing radiation-induced cell death in lung cancer cells by promoting mitochondrial dysfunction                                             | Sung-Keum Seo, Jae-Hee Kim, Ha-Na Choi, Tae-Boo Choe, Seok-Il Hong, Jae-Youn Yi, Sang-Gu Hwang, Hyun-Gyu Lee, Yun-Han Lee, In-Chul Park                            | 490 |
| P66Shc mediates increased platelet activation and aggregation in hypercholesterolemia                                                                                                            | Santosh Kumar, Ajit Vikram, Young-Rae Kim, Julia S. Jacobs, Kaikobad Irani                                                                                         | 496 |
| Upregulation of tumor necrosis factor- $\alpha$ in nucleus accumbens attenuates morphine-induced rewarding in a neuropathic pain model                                                           | Ying Wu, Xiaodong Na, Ying Zang, Yu Cui, Wenjun Xin, Ruiping Pang, Lijun Zhou, Xuhong Wei, Yongyong Li, Xianguo Liu                                                | 502 |
