Articles

- Teleseisms as Estimators of Experimental Long-Period Site Amplification: Application to the Po Plain (Italy) for the 2011 M_w 9.0 Tohoku-Oki (Japan) Earthquake 2541
Marco Massa and Paolo Augliera
- Finite-Fault Simulation of Broadband Strong Ground Motion from the 2010 M_w 7.0 Haiti Earthquake 2557
George P. Mavroedidis and Christopher M. Scotti
- Ground-Motion Observations at Hotel Montana during the M 7.0 2010 Haiti Earthquake: Topography or Soil Amplification? 2577
D. Assimaki and S. Jeong
- Quantitative Identification of Near-Fault Pulse-Like Ground Motions Based on Energy 2591 ⓔ
Changhai Zhai, Zhiwang Chang, Shuang Li, ZhiQiang Chen, and Lili Xie
- Regional Differences in Ground-Motion Amplitudes of Small-to-Moderate Earthquakes across North America 2604 ⓔ
Alireza Babaie Mahani and Gail M. Atkinson
- Kinematic Inversion of Physically Plausible Earthquake Source Models Obtained from Dynamic Rupture Simulations 2621 ⓔ
Ali Ozgun Konca, Yoshihiro Kaneko, Nadia Lapusta, and Jean-Philippe Avouac
- Reference *S*-Wave Velocity Profile and Attenuation Models for Ground-Motion Prediction Equations: Application to Japan 2645
Valerio Poggi, Benjamin Edwards, and Donat Fäh
- Tensor-Guided Fitting of Subducting Slab Depths 2657
Farhad Bazargani, Dave Hale, and Gavin P. Hayes
- Energy Flux of Propagating Ruptures with Cohesive Force 2670
Andrea Bizzarri
- Making Reliable Shear-Wave Splitting Measurements 2680
Kelly H. Liu and Stephen S. Gao
- Three-Dimensional Seismic Velocity Structure and Precise Earthquake Relocations in the Salton Trough, Southern California 2694 ⓔ
Guoqing Lin

V_{S30} and Spectral Response from Collocated Shallow, Active-, and Passive-Source V_S Data at 27 Sites in Puerto Rico <i>Jack K. Odum, William J. Stephenson, Robert A. Williams, and Christa von Hillebrandt-Andrade</i>	2709
The Greenville Fault: Preliminary Estimates of Its Long-Term Creep Rate and Seismic Potential <i>James J. Lienkaemper, G. Robert Barry, Forrest E. Smith, Joseph D. Mello, and Forrest S. McFarland</i>	2729 (E)
A Homogeneous Earthquake Catalog for Western Turkey and Magnitude of Completeness Determination <i>Konstantinos M. Leptokaropoulos, Vassilios G. Karakostas, Eleftheria E. Papadimitriou, Aggeliki K. Adamaki, Onur Tan, and Sedat İnan</i>	2739 (E)
Integration of Arrival-Time Datasets for Consistent Quality Control: A Case Study of Amphibious Experiments along the Middle America Trench <i>Melissa Moore-Driskell, Heather R. DeShon, Wolfgang Rabbel, Martin Thorwart, Yvonne Dzierma, and Ivonne G. Arroyo</i>	2752 (E)
Spatial Variability of “Did You Feel It?” Intensity Data: Insights into Sampling Biases in Historical Earthquake Intensity Distributions <i>Susan E. Hough</i>	2767 (E)
Probabilistic Analysis of the Korean Historical Earthquake Records <i>Soung Eil Houng and Tae-Kyung Hong</i>	2782
Temporal Velocity Changes in the Crust Associated with the Great Sumatra Earthquakes <i>Wen-che Yu, Teh-Ru Alex Song, and Paul G. Silver</i>	2797 (E)
A Reevaluation of the Intensities of the Northern Illinois Earthquake of 1909 <i>K. T. Huysken and K. Fujita</i>	2810 (E)
Inference of Multiple Earthquake-Cycle Relaxation Timescales from Irregular Geodetic Sampling of Interseismic Deformation <i>Brendan J. Meade, Yann Klinger, and Eric A. Hetland</i>	2824
Disputable Non-Double-Couple Mechanisms of Several Strong Earthquakes: Second-Degree Moment Approach <i>Petra Adamová and Jan Šílený</i>	2836
Modeling Earthquake Rate Changes in Oklahoma and Arkansas: Possible Signatures of Induced Seismicity <i>Andrea L. Llenos and Andrew J. Michael</i>	2850
An Interactive Tool for the Elicitation of Subjective Probabilities in Probabilistic Seismic-Hazard Analysis <i>Antonia K. Runge, Frank Scherbaum, Andrew Curtis, and Carsten Riggelsen</i>	2862 (E)
Seismotectonics of Lower Assam, Northeast India, Using the Data of a Dense Microseismic Network <i>A. Serpetsidaki, N. K. Verma, G.-A. Tselentis, N. Martakis, K. Polychronopoulou, and P. Petrou</i>	2875
A Local Magnitude Scale M_L for the United Kingdom <i>Lars Ottemöller and Susanne Sargeant</i>	2884
Comment and Reply	
Comment on “A New Analysis of the Magnitude of the February 1663 Earthquake at Charlevoix, Quebec” by John E. Ebel <i>Alan Ruffman</i>	2894

Reply to “Comment on ‘A New Analysis of the Magnitude of the February 1663 Earthquake at Charlevoix, Quebec’ by John E. Ebel” by Alan Ruffman <i>John E. Ebel</i>	2897
Short Notes	
M_{Rg} : A Magnitude Scale for 1 s Rayleigh Waves at Local Distances with Focus on Yield Estimation <i>Jessie Bonner and David R. Russell</i>	2898 (E)
Suitability of Low-Cost Three-Axis MEMS Accelerometers in Strong-Motion Seismology: Tests on the LIS331DLH (iPhone) Accelerometer <i>Antonino D’Alessandro and Giuseppe D’Anna</i>	2906
Onshore/Offshore Structure of the Juan de Fuca Plate in Northern Cascadia from Bayesian Receiver Function Inversion <i>C. Brillon, J. F. Cassidy, and S. E. Dosso</i>	2914
Quaternary Extensional Growth Folding beneath Reno, Nevada, Imaged by Urban Seismic Profiling <i>W. J. Stephenson, R. N. Frary, J. N. Louie, and J. K. Odum</i>	2921
Coseismic Slip Distribution of the 24 March 2011 Tarlay (Myanmar) M_w 6.8 Earthquake from ALOS PALSAR Interferometry <i>Jianbao Sun, Zheng-Kang Shen, Roland Bürgmann, and Xiwei Xu</i>	2928 (E)
An Explosion Model Comparison with Insights from the Source Physics Experiments <i>Sean R. Ford and William R. Walter</i>	2937 (E)
Why the Next Large Earthquake is Likely to be a Big Surprise <i>Francesco Mulargia</i>	2946
