Canadian Journal of Forest Research

November 2013

Volume 43, Number 11

Articles

Prediction of bioactive compound activity against wood contaminant fungi using artificial neural networks

Henrique Vicente, José C. Roseiro, José M. Arteiro, José Neves, A. Teresa Caldeira

Canadian Journal of Forest Research, 2013, 43(11): 985-992, 10.1139/cjfr-2013-0142

Influence of streamside buffers on stream temperature response following clear-cut harvesting in western Oregon

Elizabeth Cole, Michael Newton

Canadian Journal of Forest Research, 2013, 43(11): 993-1005, 10.1139/cjfr-2013-0138

Modeling the effects of individual-tree size, distance, and species on understory vegetation based on neighborhood analysis

Shinichi Tatsumi, Toshiaki Owari

Canadian Journal of Forest Research, 2013, 43(11): 1006-1014, 10.1139/cjfr-2013-0111

Improving forest field inventories by using remote sensing data in novel sampling designs

Anton Grafström, Anna Hedström Ringvall

Canadian Journal of Forest Research, 2013, 43(11): 1015-1022, 10.1139/cjfr-2013-0123

New regression estimators in forest inventories with two-phase sampling and partially exhaustive information: a design-based Monte Carlo approach with applications to small-area estimation

Daniel Mandallaz, Jochen Breschan, Andreas Hill

Canadian Journal of Forest Research, 2013, 43(11): 1023-1031, 10.1139/cjfr-2013-0181

Ancient boreal forests under the environmental instability of the glacial to postglacial transition in the Great Lakes region (14 000 – 11 000 years BP)

Irina P. Panyushkina, Steven W. Leavitt

Canadian Journal of Forest Research, 2013, 43(11): 1032-1039, 10.1139/cjfr-2012-0339

The resilience of the forest field layer to anthropogenic disturbances depends on site productivity

Kaupo Kohv, Martin Zobel, Jaan Liira

Canadian Journal of Forest Research, 2013, 43(11): 1040-1049, 10.1139/cjfr-2013-0030

Does postharvest silviculture improve convergence of avian communities in managed and old-growth boreal forests?

Ian D. Thompson, David A. Kirk, Christopher Jastrebski

Canadian Journal of Forest Research, 2013, 43(11): 1050-1062, 10.1139/cjfr-2013-0104

Characterizing forest structural types and shelterwood dynamics from Lorenz-based indicators predicted by airborne laser scanning

Rubén Valbuena, Petteri Packalen, Lauri Mehtätalo, Antonio García-Abril, Matti Maltamo

Canadian Journal of Forest Research, 2013, 43(11): 1063-1074, 10.1139/cjfr-2013-0147

Notes

Habitat loss exceeds habitat regeneration for an IUCN flagship lichen epiphyte: Erioderma pedicellatum

Robert Cameron, Ian Goudie, David Richardson

Canadian Journal of Forest Research, 2013, 43(11): 1075-1080, 10.1139/cjfr-2013-0024

Precision of inventory using different edge overlap methods

P.W. West

Canadian Journal of Forest Research, 2013, 43(11): 1081-1083, 10.1139/cjfr-2013-0320

Corrigendum

Corrigendum: Estimating stand-scale biomass, nutrient contents, and associated uncertainties for tree species of Canadian forests

David Paré, Pierre Bernier, Benoit Lafleur, Brian D. Titus, Evelyne Thiffault, Doug G. Maynard, Xiaojing Guo

Canadian Journal of Forest Research, 2013, 43(11): 1084, 10.1139/cjfr-2013-0390
