iii ANNOUNCEMENT / COMMUNIQUÉ

ARTICLES

James A. Westfall

1085–1091

Prediction of standing tree defect proportion using logistic regression and ordered decision thresholds

**Simon Bilodeau-Gauthier, David Paré,
Christian Messier, and Nicolas Bélanger**

1092–1103

Root production of hybrid poplars and nitrogen mineralization improve following mounding of boreal Podzols

**Sarah Ehlers, Anton Grafström,
Kenneth Nyström, Håkan Olsson,
and Göran Ståhl**

1104–1113

Data assimilation in stand-level forest inventories

**Christopher R. Dolanc, Robert D. Westfall,
Hugh D. Safford, James H. Thorne,
and Mark W. Schwartz**

1114–1126

Growth-climate relationships for six subalpine tree species in a Mediterranean climate

**Björn Berg, Björn Erhagen,
Maj-Britt Johansson, Lars Vesterdal,
Mikael Faituri, Paul Sanborn,
and Mats Nilsson**

1127–1136

Manganese dynamics in decomposing needle and leaf litter — a synthesis

**Eric Hansen, Erlend Nybakk,
and Rajat Panwar**

1137–1144

Firm performance, business environment, and outlook for social and environmental responsibility during the economic downturn: findings and implications from the forest sector

Continued on inside back cover / Suite au verso

Front cover: Beech blight aphids (*Glycaspis brimleyi* (Fitch)) on the crown of an American beech (*Fagus grandifolia* Ehrh.) tree in Maryland, USA. Image supplied by Dr. Delphis F. Levia and colleagues. A recent research article by Dr. Levia and colleagues, "Stemflow and dissolved organic carbon cycling: temporal variability in concentration, flux, and UV-Vis spectral metrics in a temperate broadleaved deciduous forest in the eastern United States", is published in the *Canadian Journal of Forest Research*, 2012, 42(1): 207–216. doi: 10.1139/x11-173.

Page couverture : Des pucerons fugaces du hêtre (*Glycaspis brimleyi* (Fitch)) sur la ramure d'un hêtre à grandes feuilles (*Fagus grandifolia* Ehrh.) au Maryland (E.-U.). Image fournie par Delphis F. Levia et collaborateurs. Un article de recherche récent de M. Levia et collaborateurs intitulé « Stemflow and dissolved organic carbon cycling: temporal variability in concentration, flux, and UV-Vis spectral metrics in a temperate broadleaved deciduous forest in the eastern United States » est paru dans la *Revue canadienne de recherche forestière*, 2012, 42(1) : 207–216. doi : 10.1139/x11-173.

Andrew N. Callister	1145–1150	Genetic parameters and correlations between stem size, forking, and flowering in teak (<i>Tectona grandis</i>)
Thomas B. Lynch and Jeffrey H. Gove	1151–1161	An antithetic variate to facilitate upper-stem height measurements for critical height sampling with importance sampling
M. Irfan Ashraf, Zhangyong Zhao, Charles P.-A. Bourque, David A. MacLean, and Fan-Rui Meng	1162–1177	<i>Integrating biophysical controls in forest growth and yield predictions with artificial intelligence technology</i>
Mingkai Peng and James D. Stewart	1172–1180	Development, validation, and application of a model of intra- and inter-tree variability of wood density for lodgepole pine in western Canada
David R. Gray	1181–1195	The influence of forest composition and climate on outbreak characteristics of the spruce budworm in eastern Canada
	NOTES	NOTES
Kurt Niquidet and Jingwen Tang	1196–1202	Elasticity of demand for Canadian logs and lumber in China and Japan
Andrew J. Larson	1203–1206	Greater risk of physical damage caused by debris fall to understory plants and tree seedlings in old-growth forests than in young forests
