iii-v NOTE OF APPRECIATION / NOTE DE RECONNAISSANCE

ARTICLES ARTICLES

- Bradley D. Pinno, Simon M. Landhäuser,  
Pak S. Chow, Sylvie A. Quideau,  
and M. Derek MacKenzie**      **1-7**      Nutrient uptake and growth of fireweed (*Chamerion  
angustifolium*) on reclamation soils
- David R. Coyle, William J. Mattson, Jr.,  
Alexander L. Friend, and Kenneth F. Raffa**      **8-16**      Effects of an invasive herbivore at the single plant scale,  
do not extend to population-scale seedling dynamics
- Guo-Zhang Michael Song, David Doley,  
David Yates, Kuo-Jung Chao,  
and Chang-Fu Hsieh**      **17-27**      Improving accuracy of canopy hemispherical photography  
by a constant threshold value derived from an unobscured  
overcast sky
- Amy L. Klocko, Richard Meilan,  
Rosalind R. James, Venkatesh Viswanath,  
Cathleen Ma, Peggy Payne, Lawrence Miller,  
Jeffrey S. Skinner, Brenda Oppert,  
Guy A. Cardineau, and Steven H. Strauss**      **28-35**      Bt-Cry3Aa transgene expression reduces insect damage  
and improves growth in field-grown hybrid poplar
- Suzanne E. Abele, S. Ellen Macdonald,  
and John R. Spence**      **36-44**      Cover type, environmental characteristics, and conservation  
of terrestrial gastropod diversity in boreal mixedwood forests
- Abílio P. Pacheco, João Claro,  
and Tiago Oliveira**      **45-55**      Simulation analysis of the impact of ignitions, rekindles,  
and false alarms on forest fire suppression

*Continued on inside back cover / Suite au verso*

**Front cover:** Deadwood and cardinal flower in a riparian zone located within an unharvested control area of the University of Maine's Acadian Forest Ecosystem Research Program (AFERP) experiment. The AFERP is situated in the Penobscot Experimental Forest in central Maine, USA. Image supplied by Dr. Matthew Olson, Missouri Department of Conservation.

**Page couverture :** « Bois mort et lobélie du cardinal dans une zone riveraine située dans une région témoin non exploitée faisant partie de l'expérience de l'Acadian Forest Ecosystem Research Program (AFERP) de l'Université du Maine. L'AFERP se situe dans la forêt expérimentale de Penobscot, dans le centre du Maine (É.-U.). Image fournie par Matthew Olson, Ph.D., Department of Conservation du Missouri. »
