Volume 44, numéro 5, mai 2014

	REVIEW	SYNTHÈSE
	391–403	Forest radiative transfer models: which approach for which application?
Gauthier Ligot, Philippe Balandier, Benoît Courbaud, and Hugues Claessens		
	ARTICLES	ARTICLES
	404–412	Impacts of fire and climate change on long-term nitrogen availability and forest productivity in the New Jersey Pine Barrens
Melissa S. Lucash, Robert M. Scheller, Alec M. Kretchun, Kenneth L. Clark, and John Hom		
	413–421	Tree growth response to fuel reduction treatments along a topographic moisture gradient in mixed-oak forests of Ohio, U.S.A.
Alexander K. Anning, James M. Dyer, and Brian C. McCarthy		
	422–431	Forecasting the deployment of short-rotation intensive culture of willow or hybrid poplar: Insights from a Delphi study
Sylvain Masse, Pierre P. Marchand, and Michèle Bernier-Cardou		
	432–440	Decoupling litter respiration from whole-soil respiration along an elevation gradient in a Rocky Mountain mixed-conifer forest
Erin M. Berryman, John D. Marshall, and Kathleen Kavanagh		
	441–448	Influences of various forms of nitrogen additions on carbon mineralization in natural secondary forests and adjacent larch plantations in Northeast China
Kai Yang, Jiaojun Zhu, and Shuang Xu		

Continued on inside back cover / Suite au verso

Front cover: Deadwood and cardinal flower in a riparian zone located within an unharvested control area of the University of Maine's Acadian Forest Ecosystem Research Program (AFERP) experiment. The AFERP is situated in the Penobscot Experimental Forest in central Maine, USA. Image supplied by Dr. Matthew Olson, Missouri Department of Conservation.

Page couverture : « Bois mort et lobélie du cardinal dans une zone riveraine située dans une région témoin non exploitée faisant partie de l'expérience de l'Acadian Forest Ecosystem Research Program (AFERP) de l'Université du Maine. L'AFERP se situe dans la forêt expérimentale de Penobscot, dans le centre du Maine (É.-U.). Image fournie par Matthew Olson, Ph.D., Department of Conservation du Missouri. »

Thomas O. Ochuodho and Van A. Lantz	449–464	Economic impacts of climate change in the forest sector: a comparison of single-region and multiregional CGE modeling frameworks
Bharat Pokharel, Jeffery P. Dech, Arthur Groot, and Doug Pitt	465–475	Ecosite-based predictive modeling of black spruce (<i>Picea mariana</i>) wood quality attributes in boreal Ontario
Lisa J. Samuelson, Tom A. Stokes, John R. Butnor, Kurt H. Johnsen, Carlos A. Gonzalez-Benecke, Pete Anderson, Jason Jackson, Lorenzo Ferrari, Tim A. Martin, and Wendell P. Cropper, Jr.	476–486	Ecosystem carbon stocks in <i>Pinus palustris</i> forests
Sylvie Gewehr, Igor Drobyshv, Frank Berninger, and Yves Bergeron	487–498	Soil characteristics mediate the distribution and response of boreal trees to climatic variability
R.M. Schlecht and D.L.R. Affleck	499–508	Branch aggregation and crown allometry condition the precision of randomized branch sampling estimators of conifer crown mass
Alexandra J. Conway and Ryan K. Danby	509–520	Recent advance of forest–grassland ecotones in southwestern Yukon
A. Beaudoin, P.Y. Bernier, L. Guindon, P. Villemaire, X.J. Guo, G. Stinson, T. Bergeron, S. Magnussen, and R.J. Hall	521–532	Mapping attributes of Canada’s forests at moderate resolution through <i>k</i> NN and MODIS imagery
	ERRATUM	ERRATUM
Robert S. Rempel, Douglas E.B. Reid, and Janet Jackson	533	Erratum: Batcheler-corrected point distance versus belt transect for sampling habitat and woody vegetation
