## ARTICLES

- Piermaria Corona, Lorenzo Fattorini,  
Sara Franceschi, Gianfranco Scrinzi,  
and Chiara Torresan**      **1303–1311**
- Eleanor C. Lahr and Anna Sala**      **1312–1319**
- Lance A. Vickers, David R. Larsen,  
Benjamin O. Knapp, John M. Kabrick,  
and Daniel C. Dey**      **1320–1330**
- Elizabeth A. Lynch, Randy Calcote,  
Sara C. Hotchkiss, and Michael Twetten**      **1331–1343**
- Jarod J. Blades, Steven R. Shook,  
and Troy E. Hall**      **1344–1355**
- Michael B. Walters, John L. Willis,  
and Kurt W. Gottschalk**      **1356–1368**
- Lafe G. Conner, Michael C. Bunnell,  
and Richard A. Gill**      **1369–1375**

## ARTICLES

- Estimation of standing wood volume in forest compartments by exploiting airborne laser scanning information: model-based, design-based, and hybrid perspectives
- Species, elevation, and diameter affect whitebark pine and lodgepole pine stored resources in the sapwood and phloem: implications for bark beetle outbreaks
- The impact of overstory density on sapling height growth in the Missouri Ozarks: implications for interspecific differentiation during canopy recruitment
- Presence of lakes and wetlands decreases resilience of jack pine ecosystems to late-Holocene climatic changes
- Smoke management of wildland and prescribed fire: understanding public preferences and trade-offs
- Seedling growth responses to light and mineral N form are predicted by species ecologies and can help explain tree diversity
- Forest diversity as a factor influencing Engelmann spruce resistance to beetle outbreaks

*Continued on inside back cover / Suite au verso*

**Front cover:** Deadwood and cardinal flower in a riparian zone located within an unharvested control area of the University of Maine's Acadian Forest Ecosystem Research Program (AFERP) experiment. The AFERP is situated in the Penobscot Experimental Forest in central Maine, USA. Image supplied by Dr. Matthew Olson, Missouri Department of Conservation.

**Page couverture :** « Bois mort et lobélie du cardinal dans une zone riveraine située dans une région témoin non exploitée faisant partie de l'expérience de l'Acadian Forest Ecosystem Research Program (AFERP) de l'Université du Maine. L'AFERP se situe dans la forêt expérimentale de Penobscot, dans le centre du Maine (É.-U.). Image fournie par Matthew Olson, Ph.D., Department of Conservation du Missouri. »
