CANADIAN JOURNAL OF SOIL SCIENCE

Volume 93, Number 2

May 2013

Ecology, Biological Processes and Plant Interactions

Comparing rooting characteristics and soil water withdrawal patterns of wheat with alternative oilseed and pulse crops grown in the semiarid Canadian prairie

H. W. Cutforth, S. V. Angadi, B. G. McConkey, P. R. Miller, D. Ulrich, R. Gulden, K. M. Volkmar, M. H. Entz, and S. A. Brandt 147–160

Composition and Chemical Processes

Serpentine affected soils and the formation of magnesium phosphates (struvite)

S. M. Y. Baugé, L. M. Lavkulich, and H. E. Schreier 161–172

Physical Processes and Interfaces

Spatial and temporal variability of soil horizons and long-term solute transport under semi-arid conditions

S. A. Woods, M. F. Dyck, and R. G. Kachanoski 173–191

Genesis, Landscape Processes and Relationships

Prediction of soil nutrient regime based on a model of DEM-generated clay content for the province of Nova Scotia, Canada

Z. Zhao, M. I. Ashraf, K. S. Keys, and F.-R. Meng 193–203

Delineation of management zones with measurements of soil apparent electrical conductivity in the southeastern pampas

N. R. Peralta, J. L. Costa, M. Balzarini, and H. Angelini 205–218

Contamination and Environmental Stewardship

Wheat grain Cd concentration and uptake as affected by timing of fertilizer N application

X. Li, N. Ziadi, G. Bélanger, W. Yuan, S. Liang, H. Xu, and Z. Cai 219–222

Management for Agricultural, Forestry and Urban Uses

Sulphur application does not improve wheat yield and protein concentration

R. E. Karamanos, J. T. Harapiak, and N. A. Flore 223–228

Soil nitrogen dynamics following herbicide kill and tillage of manured and unmanured grasslands

M. H. Chantigny, J. D. MacDonald, D. A. Angers, P. Rochette, I. Royer, and M.-O. Gasser 229–237

Ammonia volatilization losses were small after mowing field peas in dry conditions

R. Engel, C. Jones, and R. Wallander 239–242

Agrometeorology

Impact of climate change scenarios on Canadian agroclimatic indices

B. Qian, R. De Jong, S. Gameda, T. Huffman, D. Neilson, R. Desjardins, H. Wang, and B. McConkey 243–259

NH₃ volatilization, soil NH₄⁺ concentration and soil pH following subsurface banding of urea at increasing rates

P. Rochette, D. A. Angers, M. H. Chantigny, M.-O. Gasser, J. D. MacDonald, D. E. Pelster, and N. Bertrand 261–268
