CANADIAN JOURNAL OF

SOIL SCIENCE

REVUE CANADIENNE DE LA SCIENCE DU SOL

Scientific and Practical Benefits of Long-term Field Studies
W. D. Reynolds, J. J. Schoenau, and C. F. Drury, Guest Editors

VOLUME 94 NO. 3

JULY/JUILLET 2014

CANADIAN JOURNAL OF SOIL SCIENCE

Volume 94, Number 3

Special Issue 2014

SCIENTIFIC AND PRACTICAL BENEFITS OF LONG-TERM FIELD STUDIES

Preface

W. D. Reynolds, J. J. Schoenau, and
C. F. Drury 253–254

The scientific value of long-term field trials in forest soils and nutrition research: An opportunist's perspective

C. E. Prescott 255–262

Long-term soil response to variable-retention harvesting in the EMEND (Ecosystem Management Emulating Natural Disturbance) experiment, northwestern Alberta

B. E. Kishchuk, S. Quideau, Y. Wang,
and C. Prescott 263–279

Testing for soil carbon saturation behavior in agricultural soils receiving long-term manure amendments

W. Feng, M. Xu, M. Fan, S. S. Malhi,
J. J. Schoenau, J. Six, and A. F. Plante 281–294

Long-term S-fertilization increases carbon sequestration in a sulfur-deficient soil

M. Giweta, M. F. Dyck, S. S. Malhi,
R. Puurveen, and J. A. Robertson 295–301

Long-term tillage and crop rotation effects on soil quality, organic carbon, and total nitrogen

L. L. Van Eerd, K. A. Congreves,
A. Hayes, A. Verhallen, and D. C. Hooker 303–315

Soil organic carbon and land use: Processes and potential in Ontario's long-term agro-ecosystem research sites

K. A. Congreves, J. M. Smith, D. D. Németh,
D. C. Hooker, and L. L. Van Eerd 317–336

Long-term grazing effects on rough fescue grassland soils in southern British Columbia

M. Krzic, S. F. Lamagna, R. F. Newman,
G. Bradfield, and B. M. Wallace 337–345

Influence of compost source on corn grain yields, nitrous oxide and carbon dioxide emissions in southwestern Ontario

C. F. Drury, W. D. Reynolds, X. M. Yang,
C. S. Tan, X. Guo, D. J. McKenney,
R. Fleming, and K. Denholme 347–355

Organic carbon and nitrogen stocks in a clay loam soil 10 years after a single compost application

X. Yang, W. D. Reynolds, C. F. Drury, R. Fleming,
C. S. Tan, K. Denholm, and J. Yang 357–363

Long-term tillage and synthetic fertilization affect soil functioning and crop yields in a corn-soybean rotation in eastern Canada

N. Ziadi, D. A. Angers, B. Gagnon, R. Lalande,
C. Morel, P. Rochette, and M. H. Chantigny 365–376

Modeling of phosphorus dynamics in contrasting agroecosystems using long-term field experiments

C. Morel, N. Ziadi, A. Messiga, G. Bélanger,
P. Denoroy, B. Jeangros, C. Jouany,
J.-C. Fardeau, A. Mollier, L.-E. Parent,
N. Proix, L. Rabeharisoa, and S. Sinaj 377–387

Soil properties following long-term application of stockpiled feedlot manure containing straw or wood-chip bedding under barley silage production

J. J. Miller, B. W. Beasley, C. F. Drury, X. Hao,
and F. J. Larney 389–402

Impacts of 48 years of consistent cropping, fertilization and land management on the physical quality of a clay loam soil

W. D. Reynolds, C. F. Drury, X. M. Yang,
C. S. Tan, and J. Y. Yang 403–419

Impacts of 49–51 years of fertilization and crop rotation on growing season nitrous oxide emissions, nitrogen uptake and corn yields

C. F. Drury, W. D. Reynolds, C. S. Tan,
N. B. McLaughlin, X. M. Yang, W. Calder,
T. O. Oloya, and J. Y. Yang 421–433

Simulating maize (*Zea mays* L.) growth and yield, soil nitrogen concentration, and soil water content for a long-term cropping experiment in Ontario, Canada

S. Liu, J. Y. Yang, C. F. Drury, H. L. Liu,
and W. D. Reynolds 435–452
