Functions, Therapeutic Applications, and Synthesis of Retinoids and Carotenoids

Rosana Álvarez,[†] Belén Vaz,[†] Hinrich Gronemeyer,[‡] and Ángel R. de Lera^{*,†}

[†]Departamento de Química Orgánica, Centro de Investigación Biomédica (CINBIO), and Instituto de Investigación Biomédica de Vigo (IBIV), Universidade de Vigo, 36310 Vigo, Spain

[‡]Department of Functional Genomics and Cancer, Institut de Génétique et de Biologie Moléculaire et Cellulaire (IGBMC)/CNRS/INSERM/ULP, BP 10142, 67404 Illkirch Cedex, C. U. de Strasbourg, France

CONTENTS

1. Introduction	2	7.2. The Therapeutic Potential of Retinoids and Retinoids	25
2. Structure and Nomenclature of Retinoids and Carotenoids	4	7.2.1. Induction of Differentiation and Post-differentiation Apoptosis	25
3. Biogenesis of Retinoids, Absorption, and Transport	4	7.2.2. Induction of Retinoid Apoptosis	25
3.1. Pro-vitamin A Carotenoids and Apocarotenoids	4	7.2.3. Extending the Therapeutic Potential of Retinoids to Non-APL Acute Myeloid Leukemia	25
3.2. Metabolism of Retinoids at the Functional Group	6	7.3. Cancer Chemoprevention	25
3.3. Metabolism of Retinoids at the Side-Chain and at the Hydrophobic Ring	8	7.4. Retinoid Toxicity and the Retinoic Acid Syndrome	26
3.3.1. Oxidation of Retinol at the Side-Chain	8	8. Synthesis of Retinoids	26
3.3.2. Oxidation of Retinoids at the Hydrophobic Ring	8	8.1. Addition of Metal Reagents to Carbonyl Groups/Dehydration, Elimination	27
3.3.3. Reduction of Retinoids at the Side-Chain	8	8.1.1. Aldol and Related Reactions	27
3.4. Formation of Derivatives at the Functional Group	9	8.1.2. Alkenyl Organometals	28
4. Retinal-Based Proteins	9	8.1.3. Alkynyl Organometals	29
4.1. Microbial Type I Opsins. Rhodopsin Photoreceptors in Unicellular Organisms	9	8.1.4. Extended Eliminations	31
4.1.1. Bacteriorhodopsin, a Light-Activated Proton Pump	10	8.1.5. Other Methods of Carbonyl Addition/Elimination	32
4.1.2. Other Bacterial Opsins	12	8.1.6. Alkylation of Sulfones and Elimination	34
4.2. Type II Opsins. The Visual Pigments, G-Protein-Coupled Receptors	13	8.2. Connective Condensation of Carbonyl Compounds with Heteroatom-Stabilized Reagents	35
5. Retinal Lipofuscin Pigments and Eye Diseases	16	8.2.1. Formation of the C11=C12 Bond	36
6. All- <i>trans</i> -retinoic Acid, 9- <i>cis</i> -Retinoic Acid, and the RAR/RXR Nuclear Receptors	19	8.2.2. Formation of the C13=C14 Bond	38
6.1. Synthetic Retinoids	20	8.2.3. Formation of the C7=C8 Bond	38
6.1.1. RAR Ligands	21	8.2.4. Formation of the C9=C10 Bond	39
6.1.2. RXR Ligands	23	8.3. Pd-Catalyzed Cross-Coupling Reactions	41
6.1.3. Retinoid-Related Molecules	24	8.3.1. Formation of the C10-C11 Bond	43
7. Retinoid Therapy	25	8.3.2. Formation of the C6-C7 Bond	46
7.1. Current Uses	25	8.3.3. Formation of the C8-C9 Bond	47
		8.3.4. Formation of the C12-C13 Bond	49
		8.3.5. Formation of the C14-C15 Bond	50
		8.3.6. Other Metal-Catalyzed Processes	51
		8.4. Formation of the Polyene Chain by Cross-Metathesis Reactions	53
		8.5. Formation of the Polyene Chain by Rearrangement Reactions	54
		8.5.1. Decumulation of Allene(<i>retro</i>)-retinoids	54
		8.5.2. Thermal Pericyclic Reactions	54
		9. Biosynthesis of Carotenoids	59

Special Issue: Chemistry and Biology of Retinoids and Carotenoids

Received: February 26, 2013

Published: November 22, 2013

10. Biological Functions of Carotenoids	61	15.4. Metabolic Syndrome and Alzheimer's Disease	108
10.1. Photosynthesis	61	15.5. Carotenoids in LHCs	108
10.1.1. Photophysical Properties of Carotenoids	61	15.6. Carotenoids as Antioxidants	108
10.1.2. Carotenoids in Light-Harvesting Complexes (LHCs)	62	15.7. Signaling by Apocarotenoids	108
10.1.3. Retinoid/Carotenoid Complexes	62	15.8. Chemopreventive Effects of Carotenoids	109
10.1.4. Photosynthesis in Animals?	62	15.9. Carotenoids and Nutrition	109
10.1.5. Artificial Photosynthetic Devices	63	Author Information	109
10.2. Carotenoids in Photoprotection	64	Corresponding Author	109
10.2.1. Photoprotection of Photosynthetic Organisms	64	Notes	109
10.2.2. Eye Photoprotection	66	Biographies	109
10.3. Oxidation of Carotenoids with Reactive Species	67	Acknowledgments	110
10.3.1. Reactions with ROS	67	Abbreviations	110
10.3.2. Reactions with Reactive Nitrogen Species	68	References	112
10.4. Antioxidant Properties of Carotenoids	69		
10.4.1. Reduction Processes	69		
10.4.2. Oxidation Processes	71		
10.4.3. Antioxidation Effects in Nature	71		
10.5. Color, Animal Behavior, Odor, Reproduction, and Survival	71		
10.5.1. Color	71		
10.5.2. Odor	72		
10.5.3. Sexual Pheromones	73		
10.6. Phytohormones and Signaling Molecules	74		
10.7. Carotenoids as Biomarkers	76		
11. Carotenoid Aggregates	77		
12. Intestinal Absorption, Transport of Carotenoids, and Receptors	78		
12.1. Intestinal Absorption and Transport	78		
12.2. Invertebrate CBPs	78		
12.3. Vertebrate CBPs	78		
13. Chemoprevention and Health-Related Effects of Carotenoids	79		
14. Synthesis of Carotenoids	80		
14.1. General Approaches to β,β -Carotene	82		
14.1.1. Construction of the Polyene by Dehydration or Elimination Reactions	82		
14.1.2. Position-Selective Condensation of Carbonyl Compounds and Heteroatom-Stabilized Anions	83		
14.1.3. Homodimerization Reactions	83		
14.1.4. Position-Selective Csp^2-Csp^2 Cross-Coupling Reactions	84		
14.2. General Synthetic Approaches to Carotenoids	86		
14.2.1. Synthesis of Carotenoids by Position-Selective Double-Bond Forming Reactions	87		
14.2.2. Synthesis of Carotenoids by Dimerization Reactions	96		
14.2.3. Synthesis of Carotenoids by Position-Selective Single Bond Forming Reactions	97		
14.2.4. Synthesis of C_{37} Norcarotenoids	99		
15. Conclusions and Future Perspectives	106		
15.1. Chemistry and Biotechnology	107		
15.2. The Need for a System Biology Analysis of Retinoic Acid Receptor Signaling	108		
15.3. Cancer Therapy and Prevention	108
