

CYTOLOGY AND GENETICS

TSitologii i genetika (Cytology and Genetics) 2016, v 50, Issue 2

- Isayenkov S., Maathuis F.J.M.* Construction and applications of a mycorrhizal arbuscular specific CDNA library 3-12
- Shazad M., Khan S.H., Khan A.S., Sajjad M., Rehman A., Khan A.I.* Identification of QTLs on chromosome 1B for grain quality traits in bread wheat (*Triticum aestivum* L.) 13-20
- Ivaschuk B.V., Samofalova D.O., Pirko Ya.V., Fedak G., Blume Ya.B.* The homologous identification of the stem rust resistance genes *Rpg5*, *Adf3* and *RGA1* in the relatives of barley 21-31
- Kozeretska I.A., Serga S.V., Kunda-Pron I., Protsenko O.V., Demydov S.V.* A high frequency of heritable changes in natural populations of *Drosophila melanogaster* in Ukraine 32-35
- Korshykov I.I., Kalafat L.O., Vynogradova O.M., Podgorny D.Y.* GENETIC VARIABILITY OF MATERNAL PLANTS AND SEED EMBRYOS OF KOCH PINE POPULATIONS (PINUS KOCHIANA KLOTZSCH. EX KOCH) IN CRIMEA 36-43
- Gorohivets N.A., Vedmedeva E.V.* Inheritance of epidermis pigmentation in sunflower achenes 44-49
- Kumar G., Chaudhary N.* Induced cytotoxic variations and syncyte formation during microsporogenesis in *Phaseolus vulgaris* L. 50-57
- Bulavin I.V.* Cytoskeleton orientation in the epidermal cells of roots formed *de novo* on leaf explants under clinorotation 58-64
- Klymyshyn D., Stephanyshyn O., Fedorenko V.* The role of (p)ppGpp molecules in formation of «Strict Response» in bacteria and biosynthesis of antibiotics and morphological differentiation in actinomycetes 65-74
