

Volume 87, Issue 4

August 2025

Special Issue: Theoretical and Numerical Methods for Studying Surface Phenomena and Surface Forces

15 articles in this issue

Theoretical and Numerical Methods for Studying Surface Phenomena and Surface Forces Editorial

L. B. BoinovichA. M. Emelyanenko

EditorialNotes | 15 August 2025 | Pages: 443 - 446

Simulating the Influence of Convective Flows through an Ion-Selective Region on Electric Current Regimes in Binary Electrolyte Solutions

G. S. GanchenkoV. S. ShelistovE. A. Demekhin

OriginalPaper | 10 July 2025 | Pages: 447 - 453

A Study of Electroconvection during Uniform Flow of an Electrolyte Solution through an Ion-Selective Region

G. S. GanchenkoV. S. ShelistovE. A. Demekhin

OriginalPaper | 10 July 2025 | Pages: 454 - 461

Relaxation Phenomena and Electromagnetic Radiation of Oscillating Cloud Droplets

A. I. Grigor'evN. Yu. KolbnevaS. O. Shiryayeva

OriginalPaper | 15 August 2025 | Pages: 462 - 480

Supercooling of Evaporating Water Droplets on Superhydrophobic Surfaces at Low Temperatures

K. A. EmelyanenkoA. M. EmelyanenkoL. B. Boinovich

OriginalPaper | 15 August 2025 | Pages: 481 - 491

Extension of the Inverse “Dry” Micelle Model to Disc-Shaped Aggregates

Yu. A. EroshkinL. Ts. AdzhemyanA. K. Shchekin

OriginalPaper | 10 July 2025 | Pages: 492 - 504

Convection in a Small Hemispherical Droplet of Binary Solvent: Analytical Solution and Applications

P. V. Lebedev-Stepanov

OriginalPaper | 15 August 2025 | Pages: 505 - 517

The Role of the Hydrate Layer in Nanobubble Stability

Yu. K. Levin

OriginalPaper | 15 August 2025 | Pages: 518 - 523

Microscopic Simulation of Magnetorheological Properties in Magnetic Elastomers

A. Yu. MusikhinA. Yu. Zubarev

OriginalPaper | 15 August 2025 | Pages: 524 - 536

Numerical Simulation of Stationary Nucleation in a Wide Range of Supersaturations Taking into Account Thermal Effects

E. E. PerevoshchikovD. I. Zhukhovitskii

OriginalPaper | 10 July 2025 | Pages: 537 - 546

On the Relation between Spontaneous Segregation of Components in Ternary Pt–Pd–Ni Nanoparticles and Stability of Core–Shell Nanostructures: Molecular Dynamics Study

V. M. SamsonovI. V. TalyzinN. Yu. Sdobnyakov

OriginalPaper | 10 July 2025 | Pages: 547 - 559

Atomistic Simulation of Thermoinduced Structural Transformations in Four-Component Cu–Au–Pt–Pd Nanoalloys with Different Morphologies

N. Yu. SdobnyakovV. M. SamsonovA. Yu. Kolosov

OriginalPaper | 10 July 2025 | Pages: 560 - 571

Capillary Forces between Rough Surfaces Produced by the Micro/Nanotechnology Methods

I. V. UvarovV. B. Svetovoy

OriginalPaper | 15 August 2025 | Pages: 572 - 583

The Effect of a Permeable Membrane on the Crystallization of a Simple Liquid

Yu. D. FominE. N. TsiokV. N. Ryzhov

OriginalPaper | 10 July 2025 | Pages: 584 - 592

Electrophoresis of Conducting and Nonconducting Microparticles in a Polar Electrolyte under a Strong Electric Field

E. A. FrantsA. A. KrylovE. A. Demekhin

OriginalPaper | 10 July 2025 | Pages: 593 - 605
