

COMPUTERS AND GEOTECHNICS

Editors:

**D V GRIFFITHS
SCOTT W. SLOAN
HYWEL THOMAS**

(Abstracted/indexed in: *Applied Mechanics Reviews*; *Asian Geotechnical Engineering Current Awareness Service*; *Cambridge Scientific Abstracts*; *Current Contents/Engineering Computing & Technology*; *Engineering Index*; *Geo Abstracts*; *Geotechnical Abstracts*; *Inst. of Mining and Metallurgy Abstracts*; *Research Alert*; *SciSearch*. Also covered in the abstract and citation database *Scopus*[®]. Full text available on *ScienceDirect*[®]).

CONTENTS

Volume 54, October 2013

- 1 Debris flow hazard mitigation: A simplified analytical model for the design of flexible barriers
R. BRIGHENTI, A. SEGALINI AND A.M. FERRERO (Italy)
- 16 An analytical model of soil–structure interaction with swelling soils during droughts
E. JAHANGIR, O. DECK AND F. MASROURI (France)
- 33 3D numerical model for dynamic loading-induced multiple fracture zones around underground cavity faces
M. TAO (PR China, Australia), X. LI (PR China) AND C. WU (Australia)
- 46 Investigation of the hydro-mechanical behaviour of compacted bentonite/sand mixture based on the BExM model
Q. WANG, A.M. TANG (France), Y.-J. CUI (France, China), J.-D. BARNICHON (France) AND W.-M. YE (China)
- 53 Sand–pipeline–trench lateral interaction effects for shallow buried pipelines
G.P. KOURETZIS, D. SHENG AND S.W. SLOAN (Australia)
- 60 Large deformation elastic electro-osmosis consolidation of clays
J. YUAN AND M.A. HICKS (The Netherlands)
- 69 On Richards' equation for water transport in unsaturated soils and porous fabrics
J. ZHOU, F. LIU AND J.-H. HE (China)
- 72 Laterally loaded rigid piles with rotational constraints
W.D. GUO (Australia)
- 84 Prototype of a wire-rope rockfall protective fence developed with three-dimensional numerical modeling
P.V. TRAN (Japan, Viet Nam), K. MAEGAWA AND S. FUKADA (Japan)
- 94 Unsaturated hydro-mechanical-chemo coupled constitutive model with consideration of osmotic flow
X. CHEN (UK) AND M.A. HICKS (The Netherlands)
- 104 Microscopic contact model of lunar regolith for high efficiency discrete element analyses
M. JIANG, Z. SHEN (China) AND C. THORNTON (UK)

(Contents continued on inside back cover)

Computers and Geotechnics has a
dedicated WWW homepage:
<http://www.elsevier.com/locate/compgeo>

ELSEVIER

(Contents continued from outside back cover)

- 117 Progressive failure analysis of shallow foundations on soils with strain-softening behaviour
E. CONTE, A. DONATO AND A. TRONCONE (Italy)
- 125 Modeling tunneling-induced ground surface settlement development using a wavelet smooth relevance vector machine
F. WANG, B. GOU AND Y. QIN (PR China)
- 133 Particle finite element analysis of large deformation and granular flow problems
X. ZHANG, K. KRABBENHOFT, D.M. PEDROSO, A.V. LYAMIN, D. SHENG (Australia), M.V. DA SILVA (Portugal)
AND D. WANG (Australia)
- 143 A viscoplastic constitutive model for unsaturated geomaterials
V. DE GENNARO AND J.M. PEREIRA (France)
- 152 Finite-difference model for one-dimensional electro-osmotic consolidation
Y. ZHOU (China), A. DENG AND C. WANG (Australia)
- 166 Improving dynamic soil parameters and advancing the pile signal matching technique
K.W. NG AND S. SRITHARAN (USA)
- 175 Undrained limiting lateral soil pressure on a row of piles
K. GEORGIADIS (Greece), S.W. SLOAN AND A.V. LYAMIN (Australia)
- 185 Upper bound finite element analysis of slope stability using a nonlinear failure criterion
X.-G. YANG AND S.-C. CHI (China)
- 192 A dynamic large deformation finite element method based on mesh regeneration
D. WANG, M.F. RANDOLPH AND D.J. WHITE (Australia)
- 202 One-dimensional consolidation of layered soils with exponentially time-growing drainage boundaries
J.-C. LIU AND G.H. LEI (China)
- 210 Hybrid Monte Carlo simulation and ANFIS-subtractive clustering method for reliability analysis of the excavation
damaged zone in underground spaces
H. FATTAHI, S. SHOJAEI, M.A.E. FARSANGI AND H. MANSOURI (Iran)
- 222 A numerical model for outburst including the effect of adsorbed gas on coal deformation and mechanical properties
F.-H. AN, Y.-P. CHENG, L. WANG AND W. LI (China)
