SPECIAL ISSUE: KRETA

N. A. Alexander, E. Ibraim and H. Aldaikh	1	A simple discrete model for interaction of adjacent buildings during earthquakes
J. R. Banerjee and D. R. Jackson	11	Free vibration of a rotating tapered Rayleigh beam: A dynamic stiffness method of solution
A. Baratta and I. Corbi	21	Equilibrium models for helicoidal laterally supported staircases
S. Freitag, W. Graf and M. Kaliske	29	A material description based on recurrent neural networks for fuzzy data and its application within the finite element method
Z. G. Ghauch and G. G. Abou-Jaoude	38	Strain response of hot-mix asphalt overlays in jointed plain concrete pavements due to reflective cracking
E. Janouchová and A. Kučerová	47	Competitive comparison of optimal designs of experiments for sampling-based sensitivity analysis
L. Laurent, P.-A. Boucard and B. Soulier	61	A dedicated multiparametric strategy for the fast construction of a cokriging metamodel
J. Náprstek and C. Fischer	74	Types and stability of quasi-periodic response of a spherical pendulum
J. Pombo and J. Ambrósio	88	Environmental and track perturbations on multiple pantograph interaction with catenaries in high-speed trains
M. J. M. M. Steenbergen	102	Physics of railroad degradation: The role of a varying dynamic stiffness and transition radiation processes
