

# Contributions to MINERALOGY AND PETROLOGY

# Contributions to Mineralogy and Petrology

Volume 166 · Number 1 · July 2013

## ORIGINAL PAPERS

### Evidence for distinct stages of magma history recorded by the compositions of accessory apatite and zircon

A.J. Miles · C.M. Graham · C.J. Hawkesworth · M.R. Gillespie · R.W. Hinton · Edinburgh Ion Microprobe Facility (EIMF) 1

### Lattice distortion in a zircon population and its effects on trace element mobility and U–Th–Pb isotope systematics: examples from the Lewisian Gneiss Complex, northwest Scotland

J.M. MacDonald · J. Wheeler · S.L. Harley · E. Mariani · K.M. Goodenough · Q. Crowley · D. Tatham 21

### Textural history of recent basaltic-andesites and plutonic inclusions from Merapi volcano

F.M. van der Zwan · J.P. Chadwick · V.R. Troll 43

### Monazite and xenotime U–Th–Pb geochronology by ion microprobe: dating highly fractionated granites at Xihuashan tungsten mine, SE China

Q.L. Li · X.H. Li · Z.W. Lan · C.L. Guo · Y.N. Yang · Y. Liu · G.Q. Tang 65

### Origin of ultra-nickeliferous olivine in the Kevitsa Ni–Cu–PGE-mineralized intrusion, northern Finland

S.-H. Yang · W.D. Maier · E.J. Hanski · M. Lappalainen · F. Santaguida · S. Määtä 81

### Experimental study on the effects of temperature cycling on coarsening of plagioclase and olivine in an alkali basalt

R.D. Mills · A.F. Glazner 97

### $^{40}\text{Ar}$ – $^{39}\text{Ar}$ dating, whole-rock and Sr–Nd–Pb isotope geochemistry of post-collisional Eocene volcanic rocks in the southern part of the Eastern Pontides (NE Turkey): implications for magma evolution in extension-induced origin

M. Arslan · İ. Temizel · E. Abdioğlu · H. Kolaylı · C. Yücel · D. Boztuğ · C. Şen 113

### From mush to eruption in centuries: assembly of the super-sized Oruanui magma body

A.S.R. Allan · D.J. Morgan · C.J.N. Wilson · M.-A. Millet 143

### Origin of Tertiary to Recent EM- and subduction-like chemical and isotopic signatures in Auca Mahuida region (37°–38°S) and other Patagonian plateau lavas

S.M. Kay · H.A. Jones · R.W. Kay 165

### Chalcophile element geochemistry of the Baima layered intrusion, Emeishan Large Igneous Province, SW China: implications for sulfur saturation history and genetic relationship with high-Ti basalts

X.-Q. Zhang · X.-Y. Song · L.-M. Chen · S.-Y. Yu · W. Xie · Y. Deng · J.-F. Zhang · S.-G. Gui 193

### TiO<sub>2</sub> exsolution from garnet by open-system precipitation: evidence from crystallographic and shape preferred orientation of rutile inclusions

A. Proyer · G. Habler · R. Abart · R. Wirth · K. Krenn · G. Hoinkes 211

### An experimental study of Ti and Zr partitioning among zircon, rutile, and granitic melt

A.E. Hofmann · M.B. Baker · J.M. Eiler 235

### Protoliths and phase petrology of whiteschists

L. Franz · R.L. Romer · C. de Capitani 255

### The pre-eruptive magma plumbing system of the 2007–2008 dome-forming eruption of Kelut volcano, East Java, Indonesia

A.J. Jeffery · R. Gertisser · V.R. Troll · E.M. Jolis · B. Dahren · C. Harris · A.G. Tindle · K. Preece · B. O'Driscoll · H. Humaida · J.P. Chadwick 275

### Towards a model for the in situ origin of PGE reefs in layered intrusions: insights from chromitite seams of the Rum Eastern Layered Intrusion, Scotland

R. Latypov · B. O'Driscoll · A. Lavrenchuk 309

### Experiments on liquid immiscibility in silicate melts with H<sub>2</sub>O, P, S, F and Cl: implications for natural magmas

G.W. Lester · A.H. Clark · T.K. Kyser · H.R. Naslund 329

**Cover** A long-exposure photograph, taken in November 2007, of the active lava dome of the 2007–2008 eruption of Kelut volcano, East Java, Indonesia. Incandescent trails mark the separation and transportation of solidified dome material down-slope. To the lower-left of the image the relatively calm remnant of the crater lake can be seen bordering the dome's northern flank. Photograph courtesy of Tom Pfeiffer [www.volcanodiscover.com] (Jeffery et al. (2013) CMP 166, 275).
