# Contributions to MINERALOGY AND PETROLOGY

# Contributions to Mineralogy and Petrology

Volume 167 · Number 6 · June 2014

## ORIGINAL PAPERS

### Fractional crystallization of primitive, hydrous arc magmas: an experimental study at 0.7 GPa

R.H. Nandedkar · P. Ulmer · O. Müntener 1015

### Oxygen fugacity control in piston-cylinder experiments: a re-evaluation

S. Jakobsson · J. Blundy · G. Moore 1007

### The key role of mica during igneous concentration of tantalum

A. Stepanov · J.A. Mavrogenes · S. Meffre · P. Davidson 1009

### Coesite-bearing eclogite breccia: implication for coseismic ultrahigh-pressure metamorphism and the rate of the process

J.-J. Yang · M.-X. Huang · Q.-Y. Wu · H.-R. Zhang 1013

### Temporal evolution and compositional signatures of two supervolcanic systems recorded in zircons from Mangakino volcanic centre, New Zealand

G.F. Cooper · C.J.N. Wilson · B.L.A. Charlier · J.L. Wooden · T.R. Ireland 1018

### Amphibole as an archivist of magmatic crystallization conditions: problems, potential, and implications for inferring magma storage prior to the paroxysmal 2010 eruption of Mount Merapi, Indonesia

S. Erdmann · C. Martel · M. Pichavant · A. Kushnir 1016

### Building zoned ignimbrites by recycling silicic cumulates: insight from the 1,000 km<sup>3</sup> Carpenter Ridge Tuff, CO

O. Bachmann · C.D. Deering · P.W. Lipman · C. Plummer 1025

### Vanadium and niobium behavior in rutile as a function of oxygen fugacity: evidence from natural samples

L. Liu · Y. Xiao · S. Aulbach · D. Li · Z. Hou 1026

## COMMENT

### A comment on ultrahigh-temperature metamorphism from an unusual corundum + orthopyroxene intergrowth bearing Al–Mg granulite from the Southern Marginal Zone, Limpopo Complex, South Africa, by Belyanin et al.

G. Nicoli · G. Stevens · I. Buick · J.-F. Moyen 1022

## REPLY

### Response to comments by Nicoli et al. on paper by Belyanin et al. (2012)

G.A. Belyanin · D.D. Van Reenen · O.G. Safonov 1023

**Cover** Olivine crystals of Kilauea Iki lava lake. The fragmentary and unzoned forsteritic crystal is diagnostic of crystals entrained from within or around the underlying magmatic mush column (Marsh BD (2013) CMP 166, 674).
