4 articles in this issue

A Hybrid Approach to Predicting Glass Transition Temperatures of Organic Homopolymers: A Combination of the QSPR Model and the Increment Method

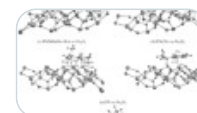

MACHINE LEARNING AND AI IN CHEMISTRY AND MATERIALS SCIENCE | 04 February 2026 | Pages: 39 - 45

Synthesis and Optical Properties of Blue Carbon Dots

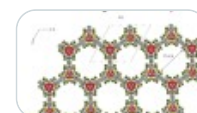

NANOMATERIALS AND NANOTECHNOLOGY | 04 February 2026 | Pages: 46 - 51

Density Functional Theory Substantiation of Adhesive Interactions between Thermoplastics and Carbon Steel

ADHESION SCIENCE AND SURFACE CHEMISTRY | 04 February 2026 | Pages: 52 - 58

Synthesis and Structure of Metal–Organic Coordination Polymer Based on Lanthanum(III) and Brominated Terphenyldicarboxylic Acid

METAL-ORGANIC CHEMISTRY AND COORDINATION CHEMISTRY | 04 February 2026 | Pages: 59 - 64
