ECOLOGY LETTERS

Volume 16 Number 2 | February 2013

 WILEY-
BLACKWELL

 **cnrs**
advancing the frontiers

ISSN 1461-023X www.ecologyletters.com

Ideas and Perspectives

- 127 Emerged or imposed: a theory on the role of physical templates and self-organisation for vegetation patchiness
Efrat Sheffer, Jost von Hardenberg, Hezi Yizhaq, Moshe Shachak & Ehud Meron
- 140 Understanding diversity–stability relationships: towards a unified model of portfolio effects
Loïc M. Thibaut & Sean R. Connolly

Letters

- 151 Beta-diversity in temperate and tropical forests reflects dissimilar mechanisms of community assembly
Jonathan A. Myers, Jonathan M. Chase, Iván Jiménez, Peter M. Jørgensen, Alejandro Araujo-Murakami, Narel Paniagua-Zambrana & Renate Seidel
- 158 Niche opportunities and invasion dynamics in a desert annual community
Ginger R. H. Allington, David N. Koons, S. K. Morgan Ernest, Michele R. Schutzenhofer & Thomas J. Valone
- 167 Microbial phylotype composition and diversity predicts plant productivity and plant–soil feedbacks
James D. Bever, Linda M. Broadhurst & Peter H. Thrall
- 175 Quantifying the roles of ecology and geography in spatial genetic divergence
Ian J. Wang, Richard E. Glor & Jonathan B. Losos
- 183 Asymmetric and frequency-dependent pollinator-mediated interactions may influence competitive displacement in two vernal pool plants
Ryan Briscoe Runquist & Maureen L. Stanton
- 191 Spillover of fish naïveté from marine reserves
Fraser A. Januchowski-Hartley, Nicholas A. J. Graham, Joshua E. Cinner & Garry R. Russ
- 198 Non-linear relationship between intensity of plant–animal interactions and selection strength
Didrik Vanhoenacker, Jon Ågren & Johan Ehrlén
- 206 Coexistence between native and exotic species is facilitated by asymmetries in competitive ability and susceptibility to herbivores
Matthew J. Heard & Dov F. Sax

- 214 Unrelated facultative endosymbionts protect aphids against a fungal pathogen
Piotr Łukasik, Margriet van Asch, Huifang Guo, Julia Ferrari, H. Charles & J. Godfray
- 219 Sticky plant traps insects to enhance indirect defence
B. A. Krimmel & I. S. Pearse
- 225 Mixotrophic organisms become more heterotrophic with rising temperature
Susanne Wilken, Jef Huisman, Suzanne Naus-Wiezer & Ellen Van Donk
- 234 Positive climate feedbacks of soil microbial communities in a semi-arid grassland
Ming Nie, Elise Pendall, Colin Bell, Caley K. Gasch, Swastika Raut, Shanker Tamang & Matthew D. Wallenstein
- 242 Variability in life-history and ecological traits is a buffer against extinction in mammals
Manuela González-Suárez & Eloy Revilla
- 252 Plant chemistry underlies herbivore-mediated inbreeding depression in nature
Stuart A. Campbell, Jennifer S. Thaler & André Kessler

Reviews and Syntheses

- 261 Poised to prosper? A cross-system comparison of climate change effects on native and non-native species performance
Cascade J. B. Sorte, Ines Ibáñez, Dana M. Blumenthal, Nicole A. Molinari, Luke P. Miller, Edwin D. Groszolz, Jeffrey M. Diez, Carla M. D'Antonio, Julian D. Olden, Sierra J. Jones & Jeffrey S. Dukes
- 271 Determining the adaptive potential of maternal stress
M. J. Sheriff & O. P. Love

Cover Caption:

A display of inter- and intraspecific variation in size for a range of mammalian species

Photo credit: Mammalian collections from Estación Biológica de Doñana CSIC, Spain

From: González-Suárez & Revilla, p. 242

Ecology Letters publishes *Early View* and *OnlineOpen* papers. *Early View* papers are fully reviewed and revised articles published prior to their publication in a printed issue. *OnlineOpen* service offers authors, whose papers are accepted for publication, the opportunity to pay up-front for their paper to become open access (i.e. free for all to view and download via the Wiley Online Library website). For submission instructions, subscription and all other information visit: www.ecologyletters.com
