

ECOLOGY LETTERS

Volume 16 Number 8 | August 2013

WILEY
Blackwell

ISSN 1461-023X www.ecologyletters.com

Ideas and Perspectives

- 951 Beta diversity as the variance of community data: dissimilarity coefficients and partitioning
Pierre Legendre & Miquel De Cáceres
- 964 Diversification under sexual selection: the relative roles of mate preference strength and the degree of divergence in mate preferences
Rafael L. Rodríguez, Janette W. Boughman, David A. Gray, Eileen A. Hebets, Gerlinde Höbel & Laurel B. Symes

Letters

- 975 Differential sources of host species heterogeneity influence the transmission and control of multihost parasites
Daniel G. Streicker, Andy Fenton & Amy B. Pedersen
- 985 Probabilistic measures of persistence and extinction in measles (meta)populations
Christian E. Gunning & Helen J. Wearing
- 995 How specialised must natural enemies be to facilitate coexistence among plants?
Brian E. Sedio & Annette M. Ostling
- 1004 Evolution of mate choice and the so-called magic traits in ecological speciation
Xavier Thibert-Plante & Sergey Gavrilets
- 1014 Projected climate-driven faunal movement routes
J. J. Lawler, A. S. Ruesch, J. D. Olden & B. H. McRae
- 1023 Linking anti-predator behaviour to prey demography reveals limited risk effects of an actively hunting large carnivore
Arthur D. Middleton, Matthew J. Kauffman, Douglas E. McWhirter, Michael D. Jimenez, Rachel C. Cook, John G. Cook, Shannon E. Albeke, Hall Sawyer & P. J. White
- 1031 When condition trumps location: seed consumption by fruit-eating birds removes pathogens and predator attractants
Evan C. Fricke, Melissa J. Simon, Karen M. Reagan, Douglas J. Levey, Jeffrey A. Riffell, Tomás A. Carlo & Joshua J. Tewksbury
- 1037 Herbarium specimens reveal the footprint of climate change on flowering trends across north-central North America
Kellen M. Calinger, Simon Queenborough & Peter S. Curtis

- 1045 Climate and litter quality differently modulate the effects of soil fauna on litter decomposition across biomes
Pablo Garcia-Palacios, Fernando T. Maestre, Jens Kattge & Diana H. Wall
- 1054 Biotic interaction strength and the intensity of selection
Craig W. Benkman
- 1061 Protected area networks and savannah bird biodiversity in the face of climate change and land degradation
Colin M. Beale, Neil E. Baker, Mark J. Brewer & Jack J. Lennon
- 1069 An empirical assessment of tree branching networks and implications for plant allometric scaling models
Lisa Patrick Bentley, James C. Stegen, Van M. Savage, Duncan D. Smith, Erica I. von Allmen, John S. Sperry, Peter B. Reich & Brian J. Enquist
- 1079 Evolution of dispersal and life history interact to drive accelerating spread of an invasive species
T. Alex Perkins, Benjamin L. Phillips, Marissa L. Baskett & Alan Hastings
- 1088 Predicting novel trophic interactions in a non-native world
Ian S. Pearse & Florian Alermatt
- 1095 Rates of projected climate change dramatically exceed past rates of climatic niche evolution among vertebrate species
Ignacio Quintero & John J. Wiens

Review and Synthesis

- 1104 Niche breadth predicts geographical range size: a general ecological pattern
Rachel A. Slatyer, Megan Hirst & Jason P. Sexton

Ecology Letters publishes *Early View* and *OnlineOpen* papers. *Early View* papers are fully reviewed and revised articles published prior to their publication in a printed issue. *OnlineOpen* service offers authors, whose papers are accepted for publication, the opportunity to pay up-front for their paper to become open access (i.e. free for all to view and download via the Wiley Online Library website). For submission instructions, subscription and all other information visit: www.ecologyletters.com
