Idea and Perspective

- 401 When should species richness be energy limited, and how would we know?
Allen H. Hurlbert & James C. Stegen

Letters

- 414 Multiple environmental controls on phytoplankton growth strategies determine adaptive responses of the N : P ratio
Stuart J. Daines, James R. Clark & Timothy M. Lenton
- 426 Metapopulation persistence and species spread in river networks
Lorenzo Mari, Renato Casagrandi, Enrico Bertuzzo, Andrea Rinaldo & Marino Gatto
- 435 Functional diversity of leaf nitrogen concentrations drives grassland carbon fluxes
Alexandru Milcu, Christiane Roscher, Arthur Gessler, Dörte Bachmann, Annette Gockele, Markus Guderle, Damien Landais, Clément Piel, Christophe Escape, Sebastien Devidal, Olivier Ravel, Nina Buchmann, Gerd Gleixner, Anke Hildebrandt & Jacques Roy
- 445 Experimental warming drives a seasonal shift in the timing of host-parasite dynamics with consequences for disease risk
Sara H. Paull & Pieter T. J. Johnson
- 454 Ecological, historical and evolutionary determinants of modularity in weighted seed-dispersal networks
Matthias Schleuning, Lili Ingmann, Rouven Strauß, Susanne A. Fritz, Bo Dalsgaard, D. Matthias Dehling, Michaela Plein, Francisco Saavedra, Brody Sandel, Jens-Christian Svenning, Katrin Böhning-Gaese & Carsten F. Dormann

- 464 Cyanobacteria dominance influences resource use efficiency and community turnover in phytoplankton and zooplankton communities
Christopher T. Filstrup, Helmut Hillebrand, Adam J. Heathcote, W. Stanley Harpole & John A. Downing
- 475 Historical comparisons reveal altered competitive interactions in a guild of crustose coralline algae
S. J. McCoy & C. A. Pfister
- 484 Evolutionary shifts to self-fertilisation restricted to geographic range margins in North American *Arabidopsis lyrata*
P. C. Griffin & Y. Willi
- 491 Do-or-die life cycles and diverse post-infection resistance mechanisms limit the evolution of parasite host ranges
Michael Sieber & Ivana Gudely
- 499 Staged invasions across disparate grasslands: effects of seed provenance, consumers and disturbance on productivity and species richness
John L. Maron, Harald Auge, Dean E. Pearson, Lotte Korell, Isabell Hensen, Katharine N. Suding & Claudia Stein

Review and Synthesis

- 508 Phylogenetic approaches for studying diversification
Hélène Morlon
