# ECOLOGY LETTERS

Volume 17 Number 10 | October 2014

WILEY  
Blackwell

ISSN 1461-023X [www.ecologyletters.com](http://www.ecologyletters.com)

## Idea and Perspective

- 1191 Abiotic stress tolerance and competition-related traits underlie phylogenetic clustering in soil bacterial communities  
*Marta Goberna, Jose A. Navarro-Cano, Alfonso Valiente-Banuet, Carlos García & Miguel Verdú*

## Letters

- 1202 Divergence in plant and microbial allocation strategies explains continental patterns in microbial allocation and biogeochemical fluxes  
*Colin Averill*
- 1211 Hybrid songbirds employ intermediate routes in a migratory divide  
*Kira E. Delmore & Darren E. Irwin*
- 1219 Zooming in on size distribution patterns underlying species coexistence in Baltic Sea phytoplankton  
*A. S. Downing, S. Hajdu, O. Hjerne, S. A. Otto, T. Blenckner, U. Larsson & M. Winder*
- 1228 Combining animal movements and behavioural data to detect behavioural states  
*Vilis O. Nams*
- 1238 Gut microbes of mammalian herbivores facilitate intake of plant toxins  
*Kevin D. Kohl, Robert B. Weiss, James Cox, Colin Dale & M. Denise Dearing*
- 1247 Unifying elemental stoichiometry and metabolic theory in predicting species abundances  
*David Ott, Christoph Digel, Björn C. Rall, Mark Maraun, Stefan Scheu & Ulrich Brose*
- 1257 Niche construction initiates the evolution of mutualistic interactions  
*Claudia C. Buser, Richard D. Newcomb, Anne C. Gaskett & Matthew R. Goddard*
- 1265 Mutualist-mediated effects on species' range limits across large geographic scales  
*Michelle E. Afkhami, Patrick J. McIntyre & Sharon Y. Strauss*
- 1274 Body shape shifting during growth permits tests that distinguish between competing geometric theories of metabolic scaling  
*Andrew G. Hirst, Douglas S. Glazier & David Atkinson*
- 1282 Interactions among nitrogen fixation and soil phosphorus acquisition strategies in lowland tropical rain forests  
*Megan K. Nasto, Silvia Alvarez-Clare, Ylva Lekberg, Benjamin W. Sullivan, Alan R. Townsend & Cory C. Cleveland*
- 1290 Colonisation and competition dynamics can explain incomplete sterilisation parasitism in ant-plant symbioses  
*Corina E. Tarnita, Todd M. Palmer & Robert M. Pringle*
- 1299 Nitrogen as a key regulator of flowering in *Fagus crenata*: understanding the physiological mechanism of masting by gene expression analysis  
*Yuko Miyazaki, Yosuke Maruyama, Yukako Chiba, Masaki J. Kobayashi, Benesh Joseph, Kentaro K. Shimizu, Keiichi Mochida, Tsutomu Hiura, Hirokazu Kon & Akiko Satake*
- 1310 Natural selection acts in opposite ways on correlated hormonal mediators of prenatal maternal effects in a wild bird population  
*Barbara Tschirren, Erik Postma, Lars Gustafsson, Ton G. G. Groothuis & Blandine Doligez*
- 1316 Loss of adaptive variation during evolutionary responses to climate change  
*James Buckley & Jon R. Bridle*

## Review and Synthesis

- 1326 The enigma of the rise of angiosperms: can we untie the knot?  
*L. Augusto, T. J. Davies, S. Delzon & A. De Schrijver*

## Corrigendum

- 1339 Corrigendum to Schneider, Scheu & Brose (2012)  
DOI: 10.1111/j.1461-0248.2012.01750.x  
*Florian Dirk Schneider, Stefan Scheu & Ulrich Brose*
