ECOLOGY LETTERS

May 2015

Volume 18, Issue 5

Pages i–ii, 417–495

Issue Information

Issue Information (pages i–ii)

Idea and Perspective

Individual heterogeneity in life histories and eco-evolutionary dynamics (pages 417–432)

Yngvild Vindenes and Øystein Langangen

Letters

Rates of climatic niche evolution are correlated with species richness in a large and ecologically diverse radiation of songbirds (pages 433–440)

Pascal O. Title and Kevin J. Burns

Fossil-based comparative analyses reveal ancient marine ancestry erased by extinction in ray-finned fishes (pages 441–450)

Ricardo Betancur-R, Guillermo Ortí and Robert Alexander Pyron

Fish community reassembly after a coral mass mortality: higher trophic groups are subject to increased rates of extinction (pages 451–461)

David Alonso, Aleix Pinyol-Gallemí, Teresa Alcoverro and Rohan Arthur

Biogeographic consequences of nutrient enrichment for plant–herbivore interactions in coastal wetlands (pages 462–471)

Qiang He and Brian R. Silliman

Unifying ecology and macroevolution with individual-based theory (pages 472–482)

James Rosindell, Luke J. Harmon and Rampal S. Etienne

Review and Synthesis

Linking anthropogenic resources to wildlife–pathogen dynamics: a review and meta-analysis (pages 483–495)

Daniel J. Becker, Daniel G. Streicker and Sonia Altizer
