Reports

Successional changes in functional composition contrast for dry and wet tropical forest

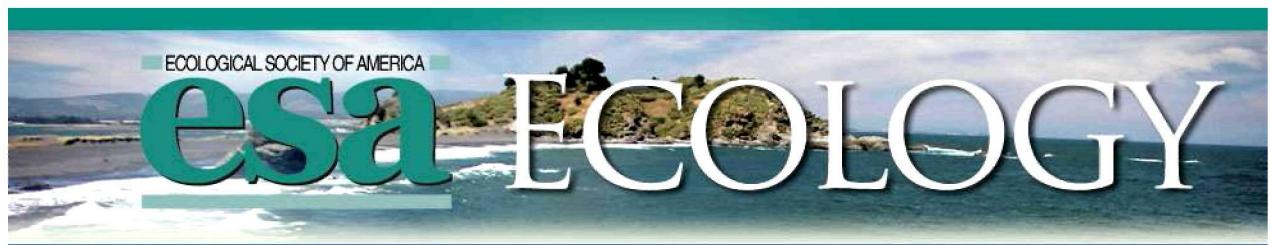

Forum

Ecological change and migratory ungulates

Articles

Landscape-scale eco-evolutionary dynamics: selection by seed predators and fire determine a major reproductive strategy

On estimating probability of presence from use–availability or presence–absence data

Volume 94, Issue 6 (June 2013)

Reports

1211 Successional changes in functional composition contrast for dry and wet tropical forest

Madelon Lohbeck, Lourens Poorter, Edwin Lebríja-Trejos, Miguel Martínez-Ramos, Jorge A. Meave, Horacio Paz, Eduardo A. Pérez-García, I. Eunice Romero-Pérez, Alejandra Tauro, Frans Bongers

1217 Emergent fungal entomopathogen does not alter density dependence in a viral competitor

Andrew M. Liebhold, Ruth Plymale, Joseph S. Elkinton, Ann E. Hajek

1223 Native congeners provide biotic resistance to invasive *Potentilla* through soil biota

Ragan M. Callaway, Daniel Montesinos, Kimberlyn Williams, John L. Maron

1230 Carry-over effects from breeding modulate the annual cycle of a long-distance migrant: an experimental demonstration

Paulo Catry, Maria P. Dias, Richard A. Phillips, José P. Granadeiro

1236 Vegetation context influences the strength and targets of pollinator-mediated selection in a deceptive orchid

Nina Sletvold, John Magne Grindeland, Jon Ågren

Forum—Ecological Change and Migratory Ungulates

1243 Human-induced reversal of fortunes for migratory ungulates?

Marco Festa-Bianchet

1245 Animal migration amid shifting patterns of phenology and predation: lessons from a Yellowstone elk herd

Arthur D. Middleton, Matthew J. Kauffman, Douglas E. McWhirter, John G. Cook, Rachel C. Cook, Abigail A. Nelson, Michael D. Jimenez, Robert W. Klaver

1257 Ungulate migration, plant phenology, and large carnivores: The times they are a-changin'

Atle Mysterud

1261 **Assessing fitness consequences of migratory tactics requires long-term individually based monitoring**

Jean-Michel Gaillard

1264 **Do irrigation and predator control reduce the productivity of migratory ungulate herds?**

Christopher C. Wilmers, Taal Levi

1271 **Will central Wyoming elk stop migrating to Yellowstone, and should we care?**

Jack Massey, Sarah Cubaynes, Tim Coulson

1274 **Environmental change and the evolution of migration**

J. M. Fryxell, R. D. Holt

1280 **Rejoinder: challenge and opportunity in the study of ungulate migration amid environmental change**

Arthur D. Middleton, Matthew J. Kauffman, Douglas E. McWhirter, John G. Cook, Rachel C. Cook, Abigail A. Nelson, Michael D. Jimenez, Robert W. Klaver

Articles

1287 **Fitness consequences of dispersal: Is leaving home the best of a bad lot?**

P. M. Waser, K. M. Nichols, J. D. Hadfield

1296 **Constant properties of plant–frugivore networks despite fluctuations in fruit and bird communities in space and time**

Michaela Plein, Laura Längsfeld, Eike Lena Neuschulz, Christina Schultheiß, Lili Ingmann, Till Töpfer, Katrin Böhning-Gaese, Matthias Schleuning

1307 **Landscape-scale eco-evolutionary dynamics: Selection by seed predators and fire determine a major reproductive strategy**

Matt V. Talluto, Craig W. Benkman

1317 **Broadening the ecological context of ungulate–ecosystem interactions: the importance of space, seasonality, and nitrogen**

Bryan D. Murray, Christopher R. Webster, Joseph K. Bump

1327 **Day length, reproductive effort, and the avian latitudinal clutch size gradient**

Alexandra P. Rose, Bruce E. Lyon

- 1338 **Brood parasitism correlates with the strength of spatial autocorrelation of life history and defensive traits in Magpies**
Juan J. Soler, David Martín-Gálvez, Liesbeth de Neve, Manuel Soler
- 1347 **Consumer diversity interacts with prey defenses to drive ecosystem function**
Douglas B. Rasher, Andrew S. Hoey, Mark E. Hay
- 1359 **Aggregated filter-feeding consumers alter nutrient limitation: consequences for ecosystem and community dynamics**
Carla L. Atkinson, Caryn C. Vaughn, Kenneth J. Forshay, Joshua T. Cooper
- 1370 **Stronger biotic resistance in tropics relative to temperate zone: effects of predation on marine invasion dynamics**
Amy L. Freestone, Gregory M. Ruiz, Mark E. Torchin
- 1378 **Variation in stochastic demography between and within central and peripheral regions in a widespread short-lived herb**
Jesús Villegas, William F. Morris, María B. García
- 1389 **Mycorrhizas in the Central European flora: relationships with plant life history traits and ecology**
Stefan Hempel, Lars Götzenberger, Ingolf Kühn, Stefan G. Michalski, Matthias C. Rillig, Martin Zobel, Mari Moora
- 1400 **High population variability and source–sink dynamics in a solitary bee species**
Markus Franzén, Sven G. Nilsson
- 1409 **On estimating probability of presence from use–availability or presence–background data**
Steven J. Phillips, Jane Elith

Comments

- 1420 **Are wolves saving Yellowstone's aspen? A landscape-level test of a behaviorally mediated trophic cascade: comment**
Robert L. Beschta, William J. Ripple
- 1425 **Are wolves saving Yellowstone's aspen? A landscape-level test of a behaviorally mediated trophic cascade: reply**
Matthew J. Kauffman, Jedediah F. Brodie, Erik S. Jules

Data Papers

- 1433 **Mosquitoes of North America with emphasis in the midwestern United States: long-term occurrence patterns**

Jessica J. Hellmann, Jason D. K. Dzurisin, Timothy Wright, David Cieslak, Samuel Pecoraro, Kaitlyn E. Smith, Katharine Hayhoe, Kerry L. Griffis-Kyle

- 1434 **From the Arctic to the Antarctic: the major, minor, and trace elemental composition of echinoderm skeletons**

M. Lebrato, J. B. McClintock, M. O. Amsler, J. B. Ries, H. Egilsdottir, M. Lamare, C. D. Amsler, R. C. Challener, J. B. Schram, C. L. Mah, J. Cuce, B. J. Baker

- 1435 **Cover, density, and demographics of shortgrass steppe plants mapped 1997–2010 in permanent grazed and ungrazed quadrats**

Chengjin Chu, John Norman, Robert Flynn, Nicole Kaplan, William K. Lauenroth, Peter B. Adler

Book Reviews

- 1436 **Book Reviews**

ESA

- **Capitalizing on nature: ecosystems as natural assets**
Stephen Polasky

- **A Caribbean forest tapestry: the multidimensional nature of disturbance and response**
Jarrod M. Thaxton
