ECOLOGY

A PUBLICATION OF THE ECOLOGICAL SOCIETY OF AMERICA

Reports

Longitudinal bio-logging reveals interplay between extrinsic and intrinsic carry-over effects in a long-lived vertebrate

Concepts and Synthesis

Disentangling the environmental-heterogeneity–species-diversity relationship along a gradient of human footprint

Articles

Estimating unbiased phenological trends by adapting site-occupancy models
A hierarchical perspective on the diversity of butterfly species' responses to weather in the Sierra Nevada Mountains

ECOLOGY

VOL. 95 • NO. 8 • AUGUST 2014

ISSN 0012-9658

CONTENTS

Reports

2033

Landscape corridors can increase invasion by an exotic species and reduce diversity of native species • JULIAN RESASCO, NICK M. HADDAD, JOHN L. ORROCK, DEWAYNE SHOEMAKER, LARS A. BRUDVIG, ELLEN I. DAMSCHEN, JOSHUA J. TEWKSBURY, AND DOUGLAS J. LEVEY

2040

Forest stand structure, productivity, and age mediate climatic effects on aspen decline • DAVID M. BELL, JOHN B. BRADFORD, AND WILLIAM K. LAUENROTH

2047

Spatially nonrandom tree mortality and ingrowth maintain equilibrium pattern in an old-growth *Pseudotsuga-Tsuga* forest • JAMES A. LUTZ, ANDREW J. LARSON, TUCKER J. FURNISS, DANIEL C. DONATO, JAMES A. FREUND, MARK E. SWANSON, KENNETH J. BIBLE, JIQUAN CHEN, AND JERRY F. FRANKLIN

2055

Why species matter: an experimental assessment of assumptions and predictive ability of two functional-group models • CAITLIN R. FONG AND PEGGY FONG

2062

Stem, root, and older leaf N:P ratios are more responsive indicators of soil nutrient availability than new foliage • L. A. SCHREEG, L. S. SANTIAGO, S. J. WRIGHT, AND B. L. TURNER

2069

Density-dependent state-space model for population-abundance data with unequal time intervals • BRIAN DENNIS AND JOSÉ MIGUEL PONCIANO

2077

Longitudinal bio-logging reveals interplay between extrinsic and intrinsic carry-over effects in a long-lived vertebrate • F. DAUNT, T. E. REED, M. NEWELL, S. BURTHE, R. A. PHILLIPS, S. LEWIS, AND S. WANLESS

Concepts and Synthesis

2084

Disentangling the environmental-heterogeneity-species-diversity relationship along a gradient of human footprint • IAN SEIFERLING, RAPHAËL PROULX, AND CHRISTIAN WIRTH

Articles

2096

Quantifying the dominance of local control and the sources of regional control in the assembly of a metacommunity • CHRIS RAY AND SHARON K. COLLINGE

2109

A mechanistic-bioclimatic modeling analysis of the potential impact of climate change on biomes of the Tibetan Plateau • JIAN-SHENG YE, JAMES F. REYNOLDS, AND FENG-MIN LI

2121

Functional response of U.S. grasslands to the early 21st-century drought • M. SUSAN MORAN, GUILLERMO E. PONCE-CAMPOS, ALFREDO HUETE, MITCHEL P. MCCLARAN, YONGGUANG ZHANG, ERIK P. HAMERLYNCK, DAVID J. AUGUSTINE, STACEY A. GUNTER, STANLEY G. KITCHEN, DEBRA P. C. PETERS, PATRICK J. STARKS, AND MARIANO HERNANDEZ

2134

The impact of seasonality in temperature on thermal tolerance and elevational range size • KIMBERLY S. SHELDON AND JOSHUA J. TEWKSBURY

2144

Estimating unbiased phenological trends by adapting site-occupancy models • TOBIAS ROTH, NICOLAS STREBEL, AND VALENTIN AMRHEIN

2155

A hierarchical perspective on the diversity of butterfly species' responses to weather in the Sierra Nevada Mountains • CHRIS C. NICE, MATTHEW L. FORISTER, ZACHARIAH GOMPERT, JAMES A. FORDYCE, AND ARTHUR M. SHAPIRO

2169

Disturbance and clonal reproduction determine liana distribution and maintain liana diversity in a tropical forest • ALICIA LEDO AND STEFAN A. SCHNITZER

2179

How do habitat filtering and niche conservatism affect community composition at different taxonomic resolutions? • FRANÇOIS MUNOZ, B. R. RAMESH, AND PIERRE COUTERON

2192

Allocation trade-offs dominate the response of tropical forest growth to seasonal and interannual drought • CHRISTOPHER E. DOUGHTY, YADVINDER MALHI, ALEJANDRO ARAUJO-MURAKAMI, DANIEL B. METCALFE, JAVIER E. SILVA-ESPEJO, LUZMILA ARROYO, JUAN P. HEREDIA, ERWIN PARDO-TOLEDO, LUZ M. MENDIZABAL, VICTOR D. ROJAS-LANDIVAR, MEISON VEGA-MARTINEZ, MARCIO FLORES-VALENCIA, REBECA SIBLER-RIVERO, LUZMARINA MORENO-VARE, LAURA JESSICA VISCARRA, TAMARA CHUVIRU-CASTRO, MARILIN OSINAGA-BECERRA, AND ROXANA LEDEZMA

2202

Tropical forest fragmentation limits pollination of a keystone understory herb • ADAM S. HADLEY, SARAH J. K. FREY, W. DOUGLAS ROBINSON, W. JOHN KRESS, AND MATTHEW G. BETTS

2213

Living close to your neighbors: the importance of both competition and facilitation in plant communities • ALEXANDRA WRIGHT, STEFAN A. SCHNITZER, AND PETER B. REICH

2224

Variability in root production, phenology, and turnover rate among 12 temperate tree species • M. LUKE MCCORMACK, THOMAS S. ADAMS, ERICA A. H. SMITHWICK, AND DAVID M. EISSENSTAT

2236

Nitrogen fixation strategies can explain the latitudinal shift in nitrogen-fixing tree abundance • DUNCAN N. L. MENGE, JEREMY W. LICHSTEIN, AND GREGORIO ÁNGELES-PÉREZ

2246

Temperature-mediated biotic interactions influence enemy release of nonnative species in warming environments • SAMUEL B. FEY AND CRISTINA M. HERREN

2257

Potential for large-bodied zooplankton and dreissenids to alter the productivity and autotrophic structure of lakes • SCOTT N. HIGGINS, B. ALTHOUSE, S. P. DEVLIN, Y. VADEBONCOEUR, AND M. J. VANDER ZANDEN

2268

Over-invasion by functionally equivalent invasive species • JAMES C. RUSSELL, NURUL S. SATARUDDIN, AND ALLISON D. HEARD

2277

Disturbance facilitates the coexistence of antagonistic ecosystem engineers in California estuaries • MAX C. N. CASTORANI, KEVIN A. HOVEL, SUSAN L. WILLIAMS, AND MARISSA L. BASKETT

2289

Coexistence of competitors in marine metacommunities: environmental variability, edge effects, and the dispersal niche • CHRISTOPHER M. AIKEN AND SERGIO A. NAVARRETE

2303

Timing and propagule size of invasion determine its success by a time-varying threshold of demographic regime shift • MASATO YAMAMICHI, TAKEHITO YOSHIDA, AND AKIRA SASAKI

2316

Estimating dispersal among numerous sites using capture-recapture data • PAMÉLA LAGRANGE, ROGER PRADEL, MARC BÉLISLE, AND OLIVIER GIMENEZ

2324

Age, sex, and breeding status shape a complex foraging pattern in an extremely long-lived seabird • AUDREY JAEGER, AURÉLIE GOUTTE, VINCENT J. LECOMTE, PIERRE RICHARD, OLIVIER CHASTEL, CHRISTOPHE BARBRAUD, HENRI WEIMERSKIRCH, AND YVES CHEREL

2334

Repeated patterns of trait divergence between closely related dominant and subordinate bird species • CAMERON FRESHWATER, CAMERON K. GHALAMBOR, AND PAUL R. MARTIN

2346

Host behavior alters spiny lobster-viral disease dynamics: a simulation study • THOMAS W. DOLAN III, MARK J. BUTLER IV, AND JEFFREY D. SHIELDS

Data Papers

2362

Long-term stem inventory data from tropical rain forest plots in Australia • MATT G. BRADFORD, HELEN T. MURPHY, ANDREW J. FORD, DOMINIC HOGAN, AND DANIEL J. METCALFE

2363

A prairie plant community data set for addressing questions in community assembly and restoration • EMILY GRMAN, TYLER BASSETT, AND LARS A. BRUDVIG

2364

Book Reviews

CRAWFORD—Tundra-taiga biology: human, plant, and animal survival in the Arctic • KNUT KIELLAND

FLEMING AND KRESS—The ornaments of life: coevolution and conservation in the tropics • SCOTT W. SHUMWAY

2367

COVER PHOTO: A European Shag incubating eggs on the Isle of May, Scotland. Breeding performance in spring is linked to foraging time in late winter, with shorter foraging times leading to earlier and more successful breeding. Daunt et al. show how these carry-over effects are driven by environmental conditions and intrinsic foraging ability (see pp. 2077–2083). Photo credit: M. Newell.
