Iron Ore Market Review: Creeping Toward Equilibrium
The authors predict that the world iron ore market will be characterized by tight conditions in the short term, but prices will decline as new production gradually comes on stream30

On the Move: Two Russian Producers Turn to Diesel Rigs
Electric rotary drills were the workhorses of the fleet at these vastly different surface mines for years, but diesel rotary and DTH rigs now offer the mobility and performance needed for future mine development.....36

BelAZ Builds the World’s Largest Haul Truck
Belarusian OEM believes this is the best time to introduce new ideas and has made a substantial investment in its production facilities.....46

The Pump-makers’ Perspective
Pumps play an essential role in mining and mineral processing. E&MJ sought the views of two of the world’s major manufacturers on how the technology is developing.50

Pump Performance is Key in Nevada Mine Dewatering Operation
System efficiently moves sump slurry from deep underground to the surface, where the solids are processed for additional gold recovery.....56

Electrolytic Technology Targets Residual Metal Values in Tailings
An innovative process offers a cost-effective approach to harvest new profits from old material60

Rochester Reloads
A U.S. silver mine processes valuable leftovers from its 27 years of operation to boost productivity—and profitability64

Oyu Tolgoi: A Nation Changer
After a long journey, a world-class copper operation begins production.....68

2014 Buyers Guide74

Special Report: Mining in Québec, Newfoundland and Labrador
Québec’s mining tradition carries the sector through the storm as Newfoundland and Labrador charts new mining territory89
