FEATURES

Training: The Foundation for Safety
Across the world, improving worker safety in mining is a key target. And, while there have been some major successes in terms of reducing injuries and deaths, the very nature of mining activity presents huge challenges, both physical and cultural **32**

Progress in Pipe Wear Protection
Whether it's an elastomer lining or a plasma-transferred coating, a natural rubber sleeve or high-tech ceramic casting, the key to a successful pipeline-abrasion solution is picking the right wear product from a wide array of choices **40**

Norilsk Nickel Turns its Attention to the Environment and Tier 1 Assets
Something happened on the road to the Voronezh project; environmental activists backed by Putin convinced Russian nickel miners to clean up their act **46**

Chinese Provide Valuable Support to Grange
Australia's largest integrated iron ore mining and pellet production business takes care of its own **52**

Sundance Resources Weathers Adversity
Junior miner struggles to bring central African iron ore project into operation **60**

Mill Changes Bring Multiple Benefits at Berezitovy Gold
Metso mill linings provide longer service life, energy savings, and reduced load on mill bearings and drive **64**

Putting Destructive Vibratory Energy to Productive Use in Grinding
The use of vibration, in combination with grinding media, for material size reduction significantly increases the number of material impacts per minute, decreasing product-extraction time and creating a more desirable fractured product..... **66**

New Rigs Bring Higher Performance
Job versatility, boring accuracy and operator ease are high on the list of new features **70**
