FEATURES

A Blueprint for the Resurrection of Montana's Butte District
Should the mining industry reconsider a historic brownfield area with a grand environmentally responsible mine plan?50

Picking a Path to Productivity
Strong metals-market prices and rising demand often mask operational inefficiencies during super-cycle years. Mired in the current post-boom slump, producers are taking a closer look at cost-effective strategies to prepare for the next upturn.58

Specialized for Explosives
The development of bulk explosives brought with it the need for new concepts in handling and charging. E&MJ looks at some of today's choices.64

From Aiken County, USA, to the World
Bridgestone opens first U.S. mining tire manufacturing facility.....72

Ventilating for Diesel Particulates
With diesel-engine vehicles ubiquitous in underground mining, and Tier 4 Final requirements now in place, research is focusing on how best to operate ventilation systems to handle residual emissions84

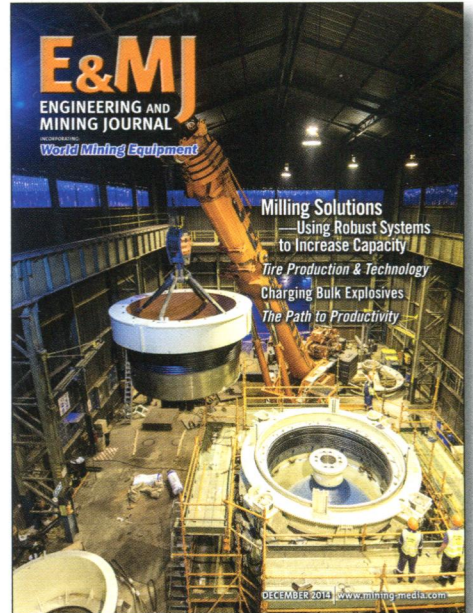

Slurry Redirection Reduces Impact of Erosion
Increase throughput by reducing maintenance downtime.....88
