Volume 113 • Number 5 • May 2013

European Journal of Applied Physiology

Volume 113, Issue 5, May 2013

ISSN: 1439-6319 (Print) 1439-6327 (Online)

In this issue (27 articles)

-
1. Original Article
Shoulder and forearm oxygenation and myoelectric activity in patients with work-related muscle pain and healthy subjects
Guilherme H. Elcadi, Mikael Forsman, Ulrika Aasa... Pages 1103-1115
 2. Original Article
Low-volume exercise training attenuates oxidative stress and neutrophils activation in older adults
Masaki Takahashi, Masashi Miyashita... Pages 1117-1126
 3. Original Article
N-acetyl-4-aminophenol and musculoskeletal adaptations to resistance exercise training
Catherine M. Jankowski, Wendolyn S. Gozansky... Pages 1127-1136
 4. Original Article
Ventricular and autonomic benefits of exercise training persist after detraining in infarcted rats
Catarina Andrade Barboza, Leandro Yanase Rocha... Pages 1137-1146
 5. Original Article
Appetite, gut hormone and energy intake responses to low volume sprint interval and traditional endurance exercise
Kevin Deighton, Ruth Barry, Charlotte E. Connon... Pages 1147-1156
 6. Original Article
Effects of a competitive wrestling season on body composition, endocrine markers, and anaerobic exercise performance in NCAA collegiate wrestlers
Nicholas A. Ratamess, Jay R. Hoffman... Pages 1157-1168
 7. Original Article
Gene expression of carnosine-related enzymes and transporters in skeletal muscle
Inge Everaert, H el ene De Naeyer, Youri Taes... Pages 1169-1179
 8. Original Article
Low total haemoglobin mass, blood volume and aerobic capacity in men with type 1 diabetes
Anne S. Koponen, Juha E. Peltonen... Pages 1181-1188
 9. Original Article

Exercise-induced myofibrillar disruption with sarcolemmal integrity prior to simulated diving has no effect on vascular bubble formation in rats

Arve Jørgensen, Philip P. Foster, Ingrid Eftedal... Pages 1189-1198

10. Original Article

The effects of classic altitude training on hemoglobin mass in swimmers

N. B. Wachsmuth, C. Völzke, N. Prommer... Pages 1199-1211

11. Original Article

Physical activity intensity and surrogate markers for cardiovascular health in adolescents

Thomas Radtke, Susi Kriemler, Prisca Eser... Pages 1213-1222

12. Original Article

The impact of a phase-change cooling vest on heat strain and the effect of different cooling pack melting temperatures

James R. House, Heather C. Lunt, Rowan Taylor... Pages 1223-1231

13. Original Article

The perceptually regulated exercise test is sensitive to increases in maximal oxygen uptake

Harrison J. L. Evans, Gaynor Parfitt... Pages 1233-1239

14. Original Article

Supra-physiological doses of testosterone affect membrane oxidation of human neutrophils monitored by the fluorescent probe C₁₁-BODIPY^{581/591}

Tácito Pessoa de Souza-Junior, André K. Yamada... Pages 1241-1248

15. Original Article

Circulating MMP-9 during exercise in humans

E. Rullman, K. Olsson, D. Wågsäter, T. Gustafsson Pages 1249-1255

16. Original Article

Effect of whole-body mild-cold exposure on arterial stiffness and central haemodynamics: a randomised, cross-over trial in healthy men and women

Sibella G. King, Kiran D. K. Ahuja, Jezreel Wass... Pages 1257-1269

17. Original Article

Cardio-respiratory and electromyographic responses to ergometer and on-water rowing in elite rowers

I. Bazzucchi, P. Sbriccoli, A. Nicolò... Pages 1271-1277

18. Original Article

A mixed-effects model of the dynamic response of muscle gene transcript expression to endurance exercise

Thierry Busso, Martin Flück Pages 1279-1290

19. Original Article

Human temperature regulation when given the opportunity to behave

Zachary J. Schlader, Blake G. Perry...Pages 1291-1301

20. Original Article

Effects of exercise-induced fatigue on postural balance: a comparison of treadmill versus cycle fatiguing protocols

Katherine E. Wright, Thomas S. Lyons...Pages 1303-1309

1. Original Article

Identification of serum analytes and metabolites associated with aerobic capacity

Michael S. Lustgarten, Lori Lyn Price...Pages 1311-1320

2. Original Article

Effect of gender on maximal breath-hold time

Evgenia D. Cherouveim, Petros G. Botonis...Pages 1321-1330

3. Original Article

The effects of elevated levels of sodium bicarbonate (NaHCO₃) on the acute power output and time to fatigue of maximally stimulated mouse soleus and EDL muscles

M. F. Higgins, J. Tallis, M. J. Price...Pages 1331-1341

4. Original Article

Moderate exercise increases the metabolism and immune function of lymphocytes in rats

Francisco Navarro, Aline Villa Nova Bacurau...Pages 1343-1352

5. Original Article

The Moxus Modular metabolic system evaluated with two sensors for ventilation against the Douglas bag method

Hans Rosdahl, Thomas Lindberg, Fredrik Edin...Pages 1353-1367

6. Letter to the Editor

A critique of RPE as a basis of exercise prescription

Roy J. ShephardPages 1369-1370

7. Letter to the Editor

Reply to the comment of Dr. Roy J. Shephard "A critique of RPE as a basis of exercise prescription"

Johannes Scherr, Martin HallePages 1371-1372
