

European Journal of Applied Physiology

European Journal of Applied Physiology

Volume 113, Issue 9, September 2013

1. Invited Review
Weight, muscle and bone loss during space flight: another perspective
T. P. Stein Pages 2171-2181
2. Invited Review
Space physiology VI: exercise, artificial gravity, and countermeasure development for prolonged space flight
Alan R. Hargens, Roshmi Bhattacharya... Pages 2183-2192
3. Original Article
Neuromuscular function, hormonal and redox status and muscle damage of professional soccer players after a high-level competitive match
João R. Silva, António Ascensão, Franklim Marques... Pages 2193-2201
4. Original Article
Influence of training on markers of platelet activation in response to a bout of heavy resistance exercise
Brent C. Creighton, Brian R. Kupchak... Pages 2203-2209
5. Original Article
Effect of post-exercise protein-leucine feeding on neutrophil function, immunomodulatory plasma metabolites and cortisol during a 6-day block of intense cycling
Andre R. Nelson, Lara Jackson, Jim Clarke... Pages 2211-2222
6. Original Article
Ipsi- and contralateral H-reflexes and V-waves after unilateral chronic Achilles tendon vibration
Thomas Lapole, Francis Canon, Chantal Pérot Pages 2223-2231
7. Original Article
Variable resistance training promotes greater fatigue resistance but not hypertrophy versus constant resistance training
Simon Walker, Juha J. Hulmi, Mathias Wernbom... Pages 2233-2244
8. Original Article
Whole body vibration training improves leg blood flow and adiposity in patients with type 2 diabetes mellitus
Borja Sañudo, Rosa Alfonso-Rosa... Pages 2245-2252
9. Original Article
Noisy fluctuation of heart rate indicates cardiovascular system instability
Jacques-Olivier Fortrat, Charlotte Baum... Pages 2253-2261
10. Original Article
Selective contribution of each hamstring muscle to anterior cruciate ligament protection and tibiofemoral joint stability in leg-extension exercise: a simulation study
Andrea Biscarini, Fabio Massimo Botti... Pages 2263-2273

11. Original Article
Near-infrared assessments of skeletal muscle oxidative capacity in persons with spinal cord injury

Melissa Lynn Erickson, Terence E. Ryan...Pages 2275-2283
12. Original Article
Endurance training enhances *LXR α* gene expression in Wistar male rats

Fatemeh Kazeminasab, Mohammad Marandi...Pages 2285-2290
13. Original Article
Passive stiffness of the gastrocnemius muscle in athletes with spastic hemiplegic cerebral palsy

A. W. Hussain, G. L. Onambele, A. G. Williams...Pages 2291-2299
14. Original Article
Isokinetic eccentric resistance training prevents loss in mechanical muscle function after running

Anderson Souza Oliveira, Fabrizio Caputo...Pages 2301-2311
15. Original Article
Can muscle shortening alone, explain the energy cost of muscle contraction in vivo?

Jared R. Fletcher, Erik M. Groves, Ted R. Pfister...Pages 2313-2322
16. Original Article
A meta-analytic approach to quantify the dose–response relationship between melatonin and core temperature

K. Marrin, B. Drust, W. Gregson, G. AtkinsonPages 2323-2329
17. Original Article
Body composition changes by DXA, BIA and skinfolds during exercise training in women

Elina Sillanpää, Arja Häkkinen, Keijo HäkkinenPages 2331-2341
18. Original Article
Changes in body composition in triathletes during an Ironman race

Sandro Manuel Mueller, Elmar Anliker...Pages 2343-2352
19. Original Article
Three nights of sleep deprivation does not alter thermal strain during exercise in the heat

Jonathan P. Moore, Adam D. Harper Smith...Pages 2353-2360
20. Original Article
Magnitude and time course of changes in maximal oxygen uptake in response to distinct regimens of chronic interval training in sedentary women

Todd A. Astorino, Matthew M. Schubert...Pages 2361-2369
1. Original Article
Effects of isolated locomotor muscle fatigue on pacing and time trial performance
Helma M. de Morree, Samuele M. MarcoraPages 2371-2380
2. Original Article
Relationship between core temperature, skin temperature, and heat flux during exercise in heat

Xiaojiang Xu, Anthony J. Karis, Mark J. Buller...Pages 2381-2389
3. Original Article

Effects of neuromuscular fatigue on the electromechanical delay of the leg extensors and flexors in young and old men

E. C. Conchola, B. J. Thompson, D. B. Smith Pages 2391-2399

4. Original Article

No effect of menstrual cycle phase on glucose and glucoendocrine responses to prolonged exercise

Robert R. Kraemer, Michelle Francois... Pages 2401-2408

5. Erratum

Erratum to: No effect of menstrual cycle phase on glucose and glucoendocrine responses to prolonged exercise

Robert R. Kraemer, Michelle Francois... Page 2409

6. Original Article

The contribution of blood flow to the skin temperature responses during a cold sensitivity test

Martha Davey, Clare Eglin, James House... Pages 2411-2417

7. Original Article

Response of testosterone to prolonged aerobic exercise during different phases of the menstrual cycle

C. B. O'Leary, C. Lehman, K. Koltun... Pages 2419-2424

8. Original Article

The carbon monoxide re-breathing method can underestimate Hb_{mass} due to incomplete blood mixing

Stefanie Keiser, Christoph Siebenmann... Pages 2425-2430

9. Erratum

Erratum to: Haemodynamic responses to dehydration in the resting and exercising human leg

James Pearson, Kameljit K. Kalsi, Eric J. Stöhr... Pages 2431-2432
