Thematic reviews: Series II—physiological employment standards

Nigel A. S. Taylor Page 2433

Invited Review

Physiological employment standards I. Occupational fitness standards: objectively subjective?

M. J. Tipton, G. S. Milligan, T. J. Reilly Pages 2435-2446

Invited Review

Developing legally defensible physiological employment standards for prominent physically demanding public safety occupations: a Canadian perspective

V. Jamnik, R. Gumienak, N. Gledhill Pages 2447-2457

Erratum

Erratum to: Physiological employment standards II: developing and implementing physical employment standards for safety-related occupations

V. Jamnik, R. Gumienak, N. Gledhill Page 2459

Original Article

Association between lifestyle and physical activity level in the elderly: a study using doubly labeled water and simplified physical activity record

Yosuke Yamada, Risa Noriyasu, Keiichi Yokoyama... Pages 2461-2471

Original Article

Swimming exercise training-induced left ventricular hypertrophy involves microRNAs and synergistic regulation of the PI3K/AKT/mTOR signaling pathway

Zhichao Ma, Jie Qi, Shuai Meng, Baoju Wen... Pages 2473-2486

Original Article

Experimentally induced deep cervical muscle pain distorts head on trunk orientation

Malmström Eva-Maj, Westergren Hans... Pages 2487-2499

Erratum

Erratum to: Experimentally induced deep cervical muscle pain distorts head on trunk orientation

Eva-Maj Malmström, Hans Westergren... Page 2501

Original Article

Acute effects of sex-specific sex hormones on heat shock proteins in fast muscle of male and female rats

William A. Romani, David W. Russ Pages 2503-2510

Original Article

Jump training with different loads: effects on jumping performance and power output

Srdjan Markovic, Dragan M. Mirkov... Pages 2511-2521

Original Article

Hemodynamic adjustments during breath-holding in trained divers

Guillaume Costalat, Jeremy Coquart... Pages 2523-2529

Original Article

Effects of high vs. moderate exercise intensity during interval training on lipids and adiponectin levels in obese young females

G. Racil, O. Ben Ounis, O. Hammouda, A. Kallel... Pages 2531-2540

Original Article

Eccentric arm cycling: physiological characteristics and potential applications with healthy populations

Steven J. Elmer, Camden S. Marshall... Pages 2541-2552

Original Article

Effects of aerobic exercise training on large-conductance Ca^{2+} -activated K^+ channels in rat cerebral artery smooth muscle cells

Na Li, Yue Shi, Lijun Shi, Yujia Liu... Pages 2553-2563

Original Article

Retrograde blood flow in the inactive limb is enhanced during constant-load leg cycling in hypoxia

Erika Iwamoto, Keisho Katayama, Shin Yamashita... Pages 2565-2575

Original Article

Effect of cryotherapy on muscle recovery and inflammation following a bout of damaging exercise

Naomi J. Crystal, David H. Townson... Pages 2577-2586

Original Article

Influence of individual energy cost on running capacity in warm, humid environments

Laurent M. Arzac, Veronique Deschodt-Arsac... Pages 2587-2594

Original Article

Pain sensitivity is normalized after a repeated bout of eccentric exercise

Mahdi Hosseinzadeh, Ole K. Andersen... Pages 2595-2602

Original Article

Effects of feeding schedule changes on the circadian phase of the cardiac autonomic nervous system and serum lipid levels

Takahiro Yoshizaki, Yuki Tada, Azumi Hida... Pages 2603-2611

Original Article

Influence of CMV/EBV serostatus on respiratory infection incidence during 4 months of winter training in a student cohort of endurance athletes

Cheng-Shiun He, Michal Handzlik, Ayu Muhamad... Pages 2613-2619

Original Article

Effects of yoga exercise on salivary beta-defensin 2

Nobuhiko Eda, Kazuhiro Shimizu, Satomi Suzuki... Pages 2621-2627

Original Article

Latent cytomegalovirus infection and innate immune function following a 75 km cycling time trial

Emily C. P. LaVoy, David C. Nieman, Dru A. Henson... Pages 2629-2635

Original Article

Effect of a single, open-sea, air scuba dive on human micro- and macrovascular function

Kate Lambrechts, Jean-Michel Pontier... Pages 2637-2645

Original Article

Effects of step duration in incremental ramp protocols on peak power and maximal oxygen consumption

Alessandra Adami, Andrea Sivieri, Christian Moia... Pages 2647-2653
