EUROPEAN JOURNAL OF MASS SPECTROMETRY

IN THIS ISSUE:

matrix-assisted laser desorption/ionisation imaging of human placenta / quadrupolar ion excitation for radiofrequency mass filter / interactions between naphthenic acids; dependence on molecular structure

imp
implications

Contents

Quadrupolar ion excitation for radiofrequency-only mass filter operation	207
Don J. Douglas, A. Polyakov and Nikolai V. Kononkov	
Development of a miniaturized multi-turn time-of-flight mass spectrometer with a pulsed fast atom bombardment ion source	215
Hirofumi Nagao, Shinichi Miki and Michisato Toyoda	
Interactions between naphthenic acids: dependence on molecular structure revealed through statistical analysis of ultra-high-resolution electrospray mass spectra	221
Penelope A. Bilton, Raffaello da Campo, Ramin Nikzad, Martin Hazelton and Peter J. Derrick	
The unimolecular chemistry of protonated and deprotonated 2,2-dinitroethene-1,1-diamine (FOX-7) studied by tandem mass spectrometry and computational chemistry	233
Ján Žabka, Ludmila Šimková, Zdeněk Jalový and Miroslav Polášek	
Inosine octamer stabilized by alkali earth metal cations—as studied by electrospray ionization mass spectrometry	249
Magdalena Frańska	
A simplified method for peptide <i>de novo</i> sequencing using ¹⁸O labeling	255
Aleš Voráč, Ondrej Šedo, Jan Havliš and Zbyněk Zdráhal	
Some preliminary matrix-assisted laser desorption/ionization imaging experiments on maternal and fetal sides of human placenta	261
Marco Roverso, Annunziata Lapolla, Chiara Cosma, Roberta Seraglia, Elisa Galvan, Silvia Visentin, Eric Cosmi, Gernot Desoye and Pietro Traldi	
Letter: Efficiency of trypsin digestion for mass-spectrometry-based identification and quantification of oxidized proteins: evaluation of the digestion of oxidized bovine serum albumin	271
Duarte D. Gouveia, André M.N. Silva, Rui Vitorino, M. Rosário M. Domingues and Pedro Domingues
