***February 2013***

Volume 83, Issue 2

Pages 255–526

***Research Articles***

***Characteristics of potentially pathogenic vibrios from subtropical Mozambique compared with isolates from tropical India and boreal Sweden (pages 255–264)***

Betty Collin, Ann-Sofi Rehnstam-Holm, Stina-Mina Ehn Börjesson, Aidate Mussagy and Bodil Henroth

***Phylogenetic diversity and structure of sebacinoïd fungi associated with plant communities along an altitudinal gradient (pages 265–278)***

Sigisfredo Garnica, Kai Riess, Robert Bauer, Franz Oberwinkler and Michael Weiß

***Shifts in composition of microbial communities of subtidal sandy sediments maximise retention of nutrients (pages 279–298)***

Hugh Forehead, Peter Thomson and Gary A. Kendrick

***The intestinal microbiota in aged mice is modulated by dietary resistant starch and correlated with improvements in host responses (pages 299–309)***

Sybille Tachon, June Zhou, Michael Keenan, Roy Martin and Maria L. Marco

***The genetic structure of the cosmopolitan three-partner lichen *Ramalina farinacea* evidences the concerted diversification of symbionts (pages 310–323)***

Eva M. del Campo, Santiago Catalá, Jacinta Gimeno, Alicia del Hoyo, Fernando Martínez-Alberola, Leonardo M. Casano, Martin Grube and Eva Barreno

***Microbial community structure across fluid gradients in the Juan de Fuca Ridge hydrothermal system (pages 324–339)***

Rika E. Anderson, Mónica Torres Beltrán, Steven J. Hallam and John A. Baross

***Spatial distribution of N-cycling microbial communities showed complex patterns in constructed wetland sediments (pages 340–351)***

David Correa-Galeote, Diana E. Marco, Germán Tortosa, David Bru, Laurent Philippot and Eulogio J. Bedmar

***Phytate addition to soil induces changes in the abundance and expression of *Bacillus*  $\beta$ -propeller phytase genes in the rhizosphere (pages 352–360)***

Milko A. Jorquera, Nicolás Saavedra, Fumito Maruyama, Alan E. Richardson, David E. Crowley, Rosa del C. Catrilaf, Evelyn J. Henriquez and María de la Luz Mora

***Bacterial diversity from the source to the tap: a comparative study based on 16S rRNA gene-DGGE and culture-dependent methods (pages 361–374)***

Ivone Vaz-Moreira, Conceição Egas, Olga C. Nunes and Célia M. Manaia

***Emission of nitrous oxide and dinitrogen by diverse earthworm families from Brazil and resolution of associated denitrifying and nitrate-dissimilating taxa (pages 375–391)***

Peter S. Depkat-Jakob, George G. Brown, Siu M. Tsai, Marcus A. Horn and Harold L. Drake

***Field-scale labelling and activity quantification of methane-oxidizing bacteria in a landfill-cover soil (pages 392–401)***

Ruth Henneberger, Eleonora Chiri, Jan Blees, Helge Niemann, Moritz F. Lehmann and Martin H. Schroth

***Taxon-specific C/N relative use efficiency for amino acids in an estuarine community (pages 402–412)***

Xavier Mayali, Peter K. Weber and Jennifer Pett-Ridge

***Temporal dynamics in the free-living bacterial community composition in the coastal North Sea (pages 413–424)***

Eva Sintes, Harry Witte, Karen Stodderegger, Paul Steiner and Gerhard J. Herndl

***Interactive effects of preindustrial, current and future atmospheric CO<sub>2</sub> concentrations and temperature on soil fungi associated with two Eucalyptus species (pages 425–437)***

Ian C. Anderson, Barbara Drigo, Kerry Keniry, Oula Ghannoum, Susan M. Chambers, David T. Tissue and John W.G. Cairney

***Biodegradation of high-molecular-weight polycyclic aromatic hydrocarbons by a wood-degrading consortium at low temperatures (pages 438–449)***

Raquel Simarro, Natalia González, Luis Fernando Bautista and Maria Carmen Molina

***Recovery of viable cyanophages from the sediments of a eutrophic lake at decadal timescales (pages 450–456)***

Kate R. Hargreaves, N. John Anderson and Martha R.J. Clokie

***Integrating conjugative elements of the SXT/R391 family from fish-isolated Vibrios encode restriction–modification systems that confer resistance to bacteriophages (pages 457–467)***

Miguel Balado, Manuel L. Lemos and Carlos R. Osorio

***Comparison of DNA preservation methods for environmental bacterial community samples (pages 468–477)***

Michael A. Gray, Zoe A. Pratte and Christina A. Kellogg

***Chronic N-amended soils exhibit an altered bacterial community structure in Harvard Forest, MA, USA (pages 478–493)***

Swathi A. Turlapati, Rakesh Minocha, Preamsai S. Bhiravarasa, Louis S. Tisa, William K. Thomas and Subhash C. Minocha

***Naturalized Escherichia coli from New Zealand wetland and stream environments (pages 494–503)***

Anne-Marie Perchee-Merien and Gillian D. Lewis

***Microbial ecology of the rumen evaluated by 454 GS FLX pyrosequencing is affected by starch and oil supplementation of diets (pages 504–514)***

Asma Zened, Sylvie Combes, Laurent Cauquil, Jérôme Mariette, Christophe Klopp, Olivier Bouchez, Annabelle Troegeler-Meynadier and Francis Enjalbert

***Seasonal and vertical distribution of putative ammonia-oxidizing thaumarchaeotal communities in an oligotrophic lake (pages 515–526)***

Elisabeth W. Vissers, Cornelia I. Blaga, Paul L.E. Bodelier, Gerard Muyzer, Christa Schleper, Jaap S. Sinninghe Damsté, Maria Touna and Hendrikus J. Laanbroek
