YEAST RESEARCH

YEAST RESEARCH

Research Articles

- 143 Homoisocitrate dehydrogenase from *Candida albicans*: properties, inhibition, and targeting by an antifungal pro-drug
 - I. Gabriel, N.D. Vetter, D.R.J. Palmer, M.J. Milewska, M. Wojciechowski and S. Milewski
- 156 Rapid identification of Saccharomyces eubayanus and its hybrids R.J. Pengelly and A.E. Wheals
- 162 Yeast response to LA virus indicates coadapted global gene expression during mycoviral infection R.C. McBride, N. Boucher, D.S. Park, P.E. Turner and J.P. Townsend
- 180 Salt and oxidative stress tolerance in Debaryomyces hansenii and Debaryomyces fabryi C. Michán, J.L. Martínez, M.C.Alvarez, M. Turk, H. Sychrova and J. Ramos
- 189 Evaluation of yeasts obtained from Antarctic soil samples as biocontrol agents for the management of postharvest diseases of apple (Malus × domestica)

 S. Vero, G. Garmendia, M.B. González, O. Bentancur and M. Wisniewski
- The transcriptional control machinery as well as the cell wall integrity and its regulation are involved in the detoxification of the organic solvent dimethyl sulfoxide in Saccharomyces cerevisiae L. Zhang, N. Liu, X. Ma and L. Jiang
- Repression vs. activation of MOX, FMD, MPP1 and MAL1 promoters by sugars in Hansenula polymorpha: the outcome depends on cell's ability to phosphorylate sugar S. Suppi, T. Michelson, K. Viigand and T. Alamäe
- Transcriptional repression by glycerol of genes involved in the assimilation of *n*-alkanes and fatty acids in yeast Yarrowia lipolytica

 K. Mori, R. Iwama, S. Kobayashi, H. Horiuchi, R. Fukuda and A. Ohta

Short Communication

241 Isobutanol production from D-xylose by recombinant Saccharomyces cerevisiae D. Brat and E. Boles
