Volume 354, Pages 1-344 (25 September 2013)

Editorial Board

Page CO2

Full Length Articles

Application of scaled particle theory to the partial molar volumes of some tetradentate N_2O_2 type Schiff bases in ionic liquid + DMF solutions

Original Research Article

Pages 1-5

Rasoul Elhami-Kalvanagh, Hemayat Shekaari, Abolfazl Bezaatpour

Prediction of CO_2 loading capacity of chemical absorbents using a multi-layer perceptron neural network

Original Research Article

Pages 6-11

D. Bastani, M.E. Hamzehie, F. Davardoost, S. Mazinani, A. Poorbashiri

Liquid-liquid equilibrium data for ternary systems of water + lactic acid + C4-C7 alcohols at 298.2 K and atmospheric pressure

Original Research Article

Pages 12-18

Lucas Domingues, Phylipe Andrian Cussolin, Julio Lopes da Silva Jr., Leonardo Hadlich de Oliveira, Martín Aznar

Solubility of carbon dioxide in ammonium based CO_2 -induced ionic liquids

Original Research Article

Pages 19-23

Małgorzata E. Zakrzewska, Andreia A. Rosatella, Svilen P. Simeonov, Carlos A.M. Afonso, Vesna

Liquid-liquid equilibrium data for systems containing of formic acid, water, and primary normal alcohols at T = 298.2 K

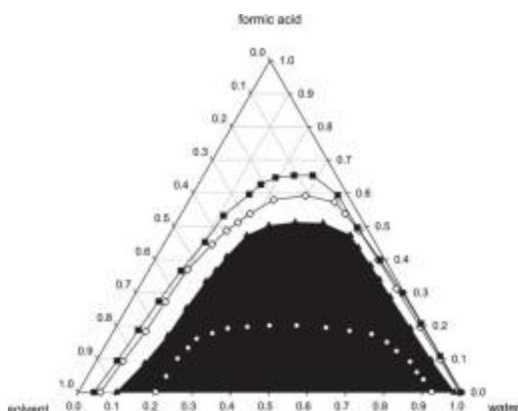

Original Research Article

Pages 24-28

H. Ghanadzadeh Gilani, Sh. Asan

Graphical abstract

Binodal curves diagram for water + FA + normal alcohols $T = 298.2$ K: (\circ) 1-butanol, (\blacktriangle) 1-pentanol, (\diamond) 1-hexanol, and (\blacksquare) 1-heptanol.

Study on the separation of propylbenzene from alkanes using two methylsulfate-based ionic liquids at (313 and 333) K

Original Research Article

Pages 29-37

Adel S. Al-Jimaz, Khaled H.A.E. Alkhalidi, Mohsen H. Al-Rashed, Mohamed S. Fandary, Mohammad S. AlTuwaim

A new approach for the thermodynamic modeling of the solubility of amino acids and β -lactam compounds as a function of pH

Original Research Article

Pages 38-46

Luís Fernando Mercier Franco, Silvana Mattedi, Pedro de Alcântara Pessôa Filho

***Study of metastable equilibria in the ternary system $\text{NH}_4\text{H}_2\text{PO}_4$ -
 $(\text{NH}_4)_2\text{HPO}_4$ - H_2O at -7 and -9 °C***

Original Research Article

Pages 47-53

Z. El hattab, L. Zerrouk, A. Jourani, M. Kaddami

***Solid-liquid equilibria measurements of the carbon dioxide + 2,3,3,3-
tetrafluoroprop-1-ene and carbon dioxide + trans-1,3,3,3-
tetrafluoropropene mixtures***

Original Research Article

Pages 54-58

Giovanni Di Nicola, Alessia Arteconi, Giorgia Nardini, Roman Stryjek

***Liquid-liquid equilibria, excess molar volume and deviations of the
refractive indices at 298.15 K for mixtures of solvents used in the
molybdenum extraction process***

Original Research Article

Pages 59-65

Young-Yoon Choi, In-Chan Hwang, Sang-Hong Shin, So-Jin Park

Phase equilibria study of (ionic liquid + water) binary mixtures

Original Research Article

Pages 66-74

Marta Królikowska, Monika Karpińska, Maciej Zawadzki

Liquid-liquid equilibria for the ternary system (water + tetradecane + 1-

methyl-2-propoxyethoxy-2-propanol)

Original Research Article

Pages 75-79

Cheng-Hao Su, Li-Jen Chen

Natural gas viscosity estimation through corresponding states based models

Original Research Article

Pages 80-88

Ehsan Heidaryan, Feridun Esmailzadeh, Jamshid Moghadasi

Capacity of two 1-butyl-1-methylpyrrolidinium-based ionic liquids for the extraction of ethanol from its mixtures with heptane and hexane

Original Research Article

Pages 89-94

Begoña González, Sandra Corderí

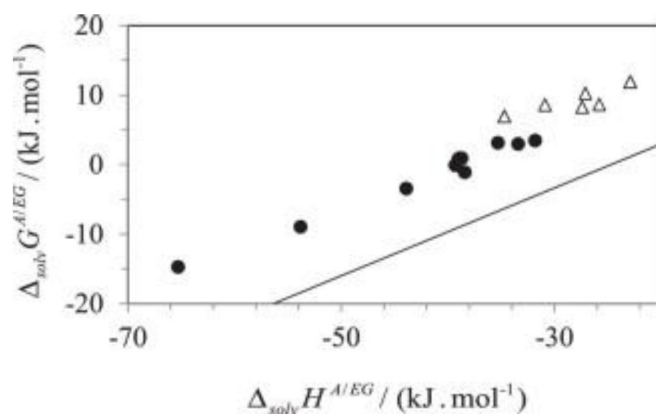

Enthalpies and Gibbs free energies of solvation in ethylene glycol at 298 K: Influence of the solvophobic effect

Original Research Article

Pages 95-101

I.A. Sedov, M.A. Stolov, B.N. Solomonov

Graphical abstract

Investigation on stability and rheological properties of nanofluid of ZnO nanoparticles dispersed in poly(ethylene glycol)

Original Research Article

Pages 102-108

Mohammed Taghi Zafarani-Moattar, Roghayeh Majdan-Cegincara

Isothermal vapor–liquid equilibrium data for the decafluorobutane (R3110) + 1,1,1,3,3-pentafluorobutane (R365mfc) system at temperatures from 333 K to 441 K

Original Research Article

Pages 109-113

Hakim Madani, Alain Valtz, Christophe Coquelet

Thermodynamic and spectral investigations of binary liquid mixtures of 2-butoxy ethanol with alcohols at temperature range of 293.15–313.15 K

Original Research Article

Pages 114-126

Gyan Prakash Dubey, Prabjot Kaur

Solubilities of 3-acetylpyridine in supercritical carbon dioxide at several temperatures and pressures: Experimental and modeling

Original Research Article

Pages 127-132

Bely Agustin, Shi-Yow Lin, Alfin Kurniawan, Yi-Hsu Ju, Felycia Edi Soetaredjo, Suryadi Ismadji

Liquid phase PVTx properties of binary mixtures of (water + ethylene glycol) in the range from 278.15 to 323.15 K and from 0.1 to 100 MPa. II. Molar isothermal compressions, molar isobaric expansions, thermal pressure coefficients and internal pressure

Original Research Article

Pages 133-146

Gennadiy I. Egorov, Dmitriy M. Makarov, Arkadiy M. Kolker

LLE for the systems ethyl palmitate (palmitic acid)(1) + ethanol(2) + glycerol (water)(3)

Original Research Article

Pages 147-155

Luis Ricardo Kanda, Fernando Augusto Pedersen Voll, Marcos L. Corazza

A new microbullimeter for the measurement of the vapor-liquid equilibrium of ionic liquid systems

Original Research Article

Pages 156-165

Pedro J. Carvalho, Imran Khan, António Morais, José F.O. Granjo, Nuno M.C. Oliveira, Luís M.N.B.F. Santos, João A.P. Coutinho

Reduced flash calculations with temperature dependent binary interaction coefficients

Original Research Article

Pages 166-176

Vassilis Gaganis

Asphaltene precipitation due to natural depletion of reservoir: Determination using a SARA fraction based intelligent model

Original Research Article

Pages 177-184

Abdolhossein Hemmati-Sarapardeh, Reza Alipour-Yeganeh-Marand, Ali Naseri, Anoush Safiabadi, Farhad Gharagheizi, Poorandokht Ilani-Kashkouli, Amir H. Mohammadi

Ibuprofen solubility in pure organic solvents and aqueous mixtures of

cosolvents: Interactions and thermodynamic parameters relating to the solvation process

Original Research Article

Pages 185-190

Mauricio A. Filippa, Estela I. Gasull

Solubility of CO₂ in 1-butyl-3-methylimidazolium diethylene-glycolmonomethylethersulfate and trihexyl(tetradecyl)phosphonium dodecyl-benzenesulfonate

Original Research Article

Pages 191-198

Yushu Chen, Fabrice Mutelet, Jean-Noël Jaubert

A new correlation for estimating thermal conductivity of pure ionic liquids

Original Research Article

Pages 199-206

Safar Ali Shojaee, Samira Farzam, Ali Zeinolabedini Hezave, Mostafa Lashkarbolooki, Shahab Ayatollahi

Solubilities of crotonic acid in different organic solvents at several temperatures from (278.15 to 333.15) K

Original Research Article

Pages 207-211

Zheng Cao, Yonghong Hu, Yumei Kai, Jiaojiao Li, Wenbiao Zhi, Wenge Yang

Prediction of the phase behavior of alkene-containing binary systems with the PPR78 model

Original Research Article

Pages 212-235

Jun-Wei Qian, Jean-Noël Jaubert, Romain Privat

Maltodextrin–SDS interactions: Volumetric, viscometric and surface tension study

Original Research Article

Pages 236-244

S. Chauhan, Vivek Sharma, Kundan Sharma

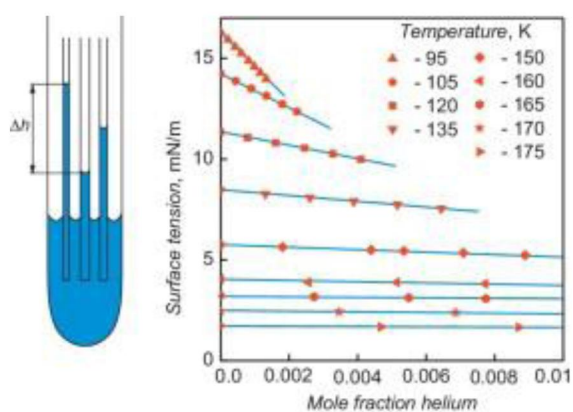

Capillary constant and surface tension of methane–helium solution

Original Research Article

Pages 245-249

Vladimir G. Baidakov, Ksenia A. Grishina

Graphical abstract

Determination of the normal boiling point of chemical compounds using a quantitative structure–property relationship strategy: Application to a very large dataset

Original Research Article

Pages 250-258

Farhad Gharagheizi, Seyyed Alireza Mirkhani, Poorandokht Ilani-Kashkouli, Amir H. Mohammadi, Deresh Ramjugernath, Dominique Richon

Measurement and correlation solubility and mixing properties of dimethyl succinylsuccinate in pure and mixture organic solvents from (278.15 to 333.15) K

Original Research Article

Pages 259-264

Yonghong Hu, Yumei Kai, Zheng Cao, Jiaojiao Li, Wenge Yang

A group contribution model for determining the sublimation enthalpy of organic compounds at the standard reference temperature of 298 K

Original Research Article

Pages 265-285

Farhad Gharagheizi, Poorandokht Ilani-Kashkouli, William E. Acree Jr., Amir H. Mohammadi, Deresh Ramjugernath

Molecular simulation of the vapor–liquid phase behavior of cyanides and their binary mixtures

Original Research Article

Pages 286-297

Svetlana Miroshnichenko, Thomas Grützner, Daniel Staak, Jadran Vrabec

Equilibrium solubility of carbon dioxide in N-methyldiethanolamine + piperazine aqueous solution: Experimental measurement and prediction

Original Research Article

Pages 298-303

Hesam Najibi, Nima Maleki

Prediction of refractive index and density of deep eutectic solvents using atomic contributions

Original Research Article

Pages 304-311

K. Shahbaz, F.S. Ghareh Bagh, F.S. Mjalli, I.M. AlNashef, M.A. Hashim

Experimental measurement and thermodynamic modeling of methane hydrate dissociation conditions in the presence of aqueous solution of ionic liquid

Original Research Article

Pages 312-318

Leila Keshavarz, Jafar Javanmardi, Ali Eslamimanesh, Amir H. Mohammadi

Measurement and correlation of liquid-liquid equilibrium data for water + methanol + methyl acetate + potassium acetate

Original Research Article

Pages 319-325

Yanru Zeng, Xiaomei Chen, Chuan Guo, Suying Zhao, Huidong Zheng, Liang'en Wang

An improved Helmholtz energy model for non-polar fluids and their mixtures. Part 2: Application to mixtures of non-polar fluids

Original Research Article

Pages 326-343

Jorge F. Estela-Urbe
