# Fluid Phase Equilibria

Volume 359, Pages 1-54 (15 December 2013)

Special Issue: 1st ICUEFA

## *Editorial Board*

Page CO2

### ***1st International Conference on Upstream Engineering and Flow Assurance (1st ICUEFA)***

Page 1

Norman F. Carnahan, Walter G. Chapman

### ***SAFT model for upstream asphaltene applications***

Original Research Article  
Pages 2-16

Sai R. Panuganti, Mohammad Tavakkoli, Francisco M. Vargas, Doris L. Gonzalez, Walter G. Chapman

### ***Phase behavior of reservoir fluids: Comparisons of PC-SAFT and cubic EOS simulations***

Original Research Article  
Pages 17-23

Sukit Leekumjorn, Kristian Krejbjerg

### ***Integrated equation of state modelling for flow assurance***

Original Research Article  
Pages 24-37

Nuno Pedrosa, Richard Szczepanski, Xiaohong Zhang

### ***Volume-translated cubic EoS and PC-SAFT density models and a free volume-based viscosity model for hydrocarbons at extreme temperature and pressure conditions***

Original Research Article  
Pages 38-44

Ward A. Burgess, Deepak Tapriyal, Bryan D. Morreale, Yee Soong, Hseen O. Baled, Robert M. Enick, Yue Wu, Babatunde A. Bamgbade, Mark A. McHugh

### ***A generalized partial molar volume algorithm provides fast estimates of CO<sub>2</sub> storage capacity in depleted oil and gas reservoirs***

Original Research Article  
Pages 45-53

Ernesto Valbuena, Maria Barrufet
